doc_id: HH-01
title: About HomeHaven Household
doc_type: about
version: 1.1
last_updated: 2026-01-12

Who we are
HomeHaven Household is a UAE household retailer offering practical products for daily home living—kitchen appliances, cleaning solutions, and smart-home essentials—through our website, mobile app, and selected stores.

What we sell
- Kitchen appliances: air fryers, blenders, kettles, coffee machines
- Cleaning & floor care: cordless vacuums, steam mops, detergents
- Smart home: smart locks, thermostats, sensors, smart plugs
- Selected built-in appliances: dishwashers and water filtration kits (limited models)

How we deliver
- Standard delivery across the UAE
- Express delivery (selected cities)
- Free Click & Collect at participating stores

Support hours
Customer support is available **daily 9:00–21:00 (GST)** via chat, email, and phone.

Sustainability note (store-style statement)
We offer e-recycling drop-off boxes at the Dubai (Al Quoz) store for small electronics and batteries.

---
doc_id: HH-02
title: Delivery & Shipping Guidelines
doc_type: policy
version: 2.0
last_updated: 2026-01-20

Delivery options

1) Standard delivery (UAE)
- **Fee:** Free on orders **AED 199+**
- **Fee (below threshold):** **AED 15**
- **Timeframes:**
  - Major cities (Dubai, Abu Dhabi, Sharjah): **Next-day** if ordered by **6:00pm**
  - Other areas: **2–3 business days**

> Business days are Monday–Saturday (Sunday is non-working for deliveries in this scenario).

2) Express delivery (selected cities)
Available for **Dubai and Abu Dhabi** only.
- **Fee:** **AED 35**
- **Cut-off:** Order by **12:00pm** for **same-day** delivery
- **Delivery window:** 16:00–22:00

3) Scheduled delivery
For bulky or installed items (e.g., dishwashers).
- Choose a date at checkout (subject to availability)
- Slots: 10:00–14:00, 14:00–18:00, 18:00–22:00

Delivery rules & exceptions
- We do not deliver to P.O. boxes. A physical address and phone number are required.
- Missed delivery: courier will attempt contact; if unsuccessful, re-delivery may incur **AED 20**.
- Building access: customers should ensure access permissions (security gate, parking, lift booking if required).
- **Bulky items:** may require two-person handling; ensure a clear pathway and measure doorways.

Damaged or missing items
- If your package arrives damaged, report it within **24 hours** with photos of:
  1) outer box
  2) inner packaging
  3) product damage
- Missing item claims should be reported within **48 hours** of delivery confirmation.

Packaging & sustainability
Where possible, we use minimal packaging. Some manufacturer boxes ship “as-is” (no extra outer box).

---
doc_id: HH-03
title: Click & Collect Policy
doc_type: policy
version: 1.3
last_updated: 2026-01-10

Overview
Click & Collect lets you order online and pick up in-store.

Fees & timing

- **Cost:** Free
- **Ready time:** Typically **within 2 hours** (during store hours)
- **Hold time:** We hold items for **3 days** from “ready for pickup” notification.

Pickup requirements
Bring:
- Order confirmation (email or app)
- Valid ID matching the order name

Someone else picking up?
Allowed if you:
- Add their name in the pickup section at checkout (or contact support before pickup)
- They present the order confirmation + their ID

What if I don’t collect in time?
If not collected within 3 days:
- Order is cancelled automatically
- Refund issued to the original payment method (timing depends on bank)

Eligible items
Most items are eligible. Some bulky installed items may be delivery-only.

---
doc_id: HH-04
title: Returns & Refunds Policy
doc_type: policy
version: 2.2
last_updated: 2026-01-22

Standard returns (most items)
You can return most items within **30 days** of delivery or pickup if:
- Unused
- In original packaging
- Includes all accessories, manuals, and free gifts

Return methods
1) **Courier pickup** (available in most areas)
2) **In-store return** (Dubai, Abu Dhabi, Sharjah stores)

Return fees
- If the return is due to a defect or our error: **no fee**
- If you changed your mind: pickup fee may apply depending on area (quoted at request time)

Non-returnable or restricted items
The following are generally not eligible once opened/used:
- Hygiene-related items (e.g., personal care trimmers, oral irrigators)

- Consumables (e.g., water filter cartridges, detergent refills)
- Gift cards and digital codes
- Items marked “Final Sale”

If an item is defective, warranty rules may apply even if opened.

Refund timelines
- Card payments: typically **5–12 business days** after inspection
- Cash on delivery refunds: bank transfer or store credit (customer choice)

Return condition checks
We may refuse a refund if:
- Serial number does not match our records
- Missing parts or heavy wear
- Damage caused by misuse, liquid ingress (where applicable), or unauthorized repair

Bundles
If you return a bundle, you must return all bundle items unless support approves a partial return (rare).

---
doc_id: HH-05
title: Warranty & Service Policy
doc_type: policy
version: 1.8
last_updated: 2026-01-18

Warranty basics
Most electrical products include a **1-year manufacturer warranty** starting from:
- Delivery date (delivery orders), or
- Pickup date (Click & Collect)

What warranty covers
- Manufacturing defects
- Faults under normal household use

What warranty usually does NOT cover
- Accidental damage, drops, cracks
- Liquid damage (unless explicitly rated and used correctly)
- Wear-and-tear parts (filters, brush rolls, batteries that degrade over time)
- Damage from voltage issues or improper installation
- Unauthorized repair or modification

How to claim warranty
1) Contact HomeHaven support with:
   - Order number
   - Product name/model

   - Short description + photos/video
2) We'll troubleshoot first.
3) If needed, we arrange:
   - Service center drop-off, or
   - Courier collection (depending on product category)

Repair, replacement, or refund
Outcome depends on service assessment:
- Repair (most common)
- Replacement (if repair not feasible and stock available)
- Refund (if replacement not available)

Service Level Target (informal)
- Initial troubleshooting response: within **24 hours**
- Typical service resolution: **7–14 business days**
(Complex parts availability can extend this.)

---
doc_id: HH-06
title: HavenPlus Rewards — Loyalty Program Terms
doc_type: loyalty
version: 1.4
last_updated: 2026-01-16

Earning points
- Earn **1 point per AED 1** spent on eligible items.
- Points are awarded after the order is marked "delivered" or "picked up".

Exclusions
Points are not earned on:
- Delivery fees
- Gift cards
- Installation fees
- Extended warranty add-ons (if offered)

Redeeming points
- **500 points = AED 25** discount at checkout.
- You can redeem in increments of 500 points.
- Points cannot be exchanged for cash.

Expiry
- Points expire **12 months after earning** (rolling expiry).
Example: points earned on 2026-02-01 expire on 2027-02-01.

Returns and points
- If you return an item, the points earned on that item are deducted.
- If you used points on an order and then return items, the refund is adjusted accordingly.

Membership tiers (simple)
- **Classic:** default for all members
- **Plus:** earned after spending AED 2,000 in a rolling 12-month period
  - Benefits: early access to promos + dedicated chat queue (when available)

Account notes
Only one HavenPlus account per phone number. HomeHaven may suspend accounts for suspected abuse.

doc_id: HH-07
title: Product Catalog — Kitchen Appliances
doc_type: product_catalog
version: 1.0
last_updated: 2026-01-14

Kitchen Appliances

1) CrispWave Air Fryer 5.5L (Model: CW-AF55)
Price: AED 299
Key features:
- 5.5L basket (fits 1.2kg fries approx.)
- Temperature range 80–200°C
- Presets: Fries, Chicken, Veg, Reheat, Bake
- Auto shut-off + cool-touch handle

In the box: Air fryer unit, basket, quick-start guide
Care: Basket is non-stick; hand wash recommended
Warranty: 1-year manufacturer warranty (see HH-05)

---

2) BrewBuddy Coffee Maker 1.25L (Model: BB-CM125)
Price: AED 179
Key features:
- 1.25L glass carafe
- Keep-warm plate (up to 40 minutes)
- Permanent washable filter + scoop
- Anti-drip pause-and-serve

In the box: Coffee maker, carafe, filter, scoop, manual
Note: Works with ground coffee only (no pods)

---

3) PureBlend Blender 900W (Model: PB-900)
Price: AED 249

Key features:
- 900W motor
- 1.5L jug, ice-crush mode
- 2 speeds + pulse
- Safety lock (won’t run unless lid is secured)

In the box: Motor base, jug, lid, manual
Safety: Do not run continuously for more than 60 seconds; rest 2 minutes.

---

4) AquaClean Dishwasher 60cm Built-in (Series: DW60)
Price: AED 1,699
Key features:
- 12 place settings
- Eco + Intensive + Quick wash
- Noise rating: 49 dB
- Stainless steel tub

Installation: Available as add-on (see HH-10 for requirements)
Installation fee (standard): AED 149
Warranty: 1-year manufacturer warranty (see HH-05)

---
doc_id: HH-08
title: Product Catalog — Cleaning & Floor Care
doc_type: product_catalog
version: 1.0
last_updated: 2026-01-14

Cleaning & Floor Care

1) DustDash Cordless Vacuum (Model: DD-VX2)
Price: AED 399
Highlights:
- Up to 35 minutes runtime (Eco mode)
- 2 power modes: Eco / Boost
- HEPA-style filter (washable)
- Wall mount included

In the box: Vacuum, crevice tool, brush tool, wall mount, charger
Filter care: Rinse filter, air-dry 24 hours before reuse
Battery note: Performance depends on floor type and mode.

---

2) SteamShine Steam Mop (Model: SS-M10)
Price: AED 189

Highlights:
- Ready in 25 seconds
- For sealed hard floors (tile, sealed wood)
- Includes 2 microfiber pads

Warning: Not recommended for unsealed wood or waxed floors.

---

3) FreshFlow Odor Neutralizer Spray 300ml
Price: AED 29
Use: Fabrics, shoes, bins (spot test recommended)
Return note: Considered a consumable; returns restricted if opened (see HH-04).

---
doc_id: HH-09
title: Product Catalog — Smart Home
doc_type: product_catalog
version: 1.0
last_updated: 2026-01-14

Smart Home

1) SecureNest Smart Lock (Model: SN-L2)
Price: AED 549
Unlock methods:
- PIN code
- Fingerprint
- Mobile app (Bluetooth)
- Physical key backup

Door compatibility (summary):
- Door thickness: 35–55 mm
- Supports common deadbolt prep (see HH-11 for exact requirements)

Power: 4x AA batteries (typical 6–9 months)
Installation: Available as add-on (AED 99) — see HH-11

---

2) ClimateCare Smart Thermostat (Model: CC-T1)
Price: AED 329
Highlights:
- Schedule + eco mode
- App control (Wi-Fi 2.4GHz)
- Supports common HVAC relays (not compatible with every system)

Note: Professional installation recommended if unsure.

---

3) AirPure Air Purifier (Model: AP-400)
Price: AED 499
Highlights:
- Room size: up to 35 m²
- 3-stage filtration (pre-filter, HEPA-style, carbon)
- Sleep mode + auto mode

Filters: Replacement filter pack (AP-F400) sold separately
Troubleshooting: See HH-15

---
doc_id: HH-100
title: Logistics & Route Optimization — Methods
doc_type: guideline
version: 1.0
last_updated: 2026-02-28

Purpose
This policy defines methods and best practices for optimizing delivery routes in a home retail environment. The goal is to improve operational efficiency, reduce transportation costs, and enhance customer satisfaction through timely deliveries.

Scope
This policy applies to:

- All delivery and distribution operations
- In-house and third-party logistics providers
- Fleet vehicles and delivery personnel
- Route planning and management systems

Objectives
- Reduce fuel consumption and environmental impact.
- Minimize delivery times and delays.
- Improve overall route efficiency.
- Monitor and analyze logistics performance for continuous improvement.

Routing Methods

1. Route Planning
- Use software tools or algorithms to calculate the most efficient delivery routes.
- Consider factors such as traffic patterns, delivery time windows, vehicle capacity, and customer priorities.
- Update routes regularly to account for changes in demand, road conditions, or new delivery locations.

2. Route Optimization
- Consolidate deliveries geographically to minimize travel distance.
- Prioritize high-density delivery areas to maximize efficiency.
- Implement dynamic rerouting in response to real-time traffic updates or delays.
- Balance workloads across drivers and vehicles to prevent bottlenecks.

3. Performance Tracking
- Monitor key route efficiency metrics, such as:
  - Average delivery time per route
  - Fuel consumption per delivery
  - Number of successful on-time deliveries
  - Vehicle utilization rates
- Use tracking data to identify areas for improvement and adjust routes accordingly.

4. Technology Integration
- Equip delivery vehicles with GPS tracking and telematics systems.
- Use route optimization software integrated with inventory and order management systems.
- Enable mobile applications for drivers to receive real-time route updates.

Roles and Responsibilities

Logistics Managers
- Oversee route planning and optimization strategies.
- Monitor performance metrics and implement improvements.

Drivers
- Follow optimized routes and report deviations or issues.
- Provide feedback on route efficiency and operational challenges.

IT / Systems Team
- Maintain route planning and tracking software.
- Ensure data accuracy and integration with operational systems.

Review and Continuous Improvement
- Routinely review delivery performance reports and efficiency metrics.
- Update routing methods and policies based on operational insights and changing business needs.

- Conduct periodic training for drivers on optimized routing and delivery best practices.

---
doc_id: HH-101
title: Vendor Management — SLA Templates
doc_type: guideline
version: 1.0
last_updated: 2026-03-01

Purpose
This document provides guidelines for creating Service Level Agreements (SLAs) with vendors. SLAs help define expectations for performance, quality, and accountability, ensuring reliable service delivery for home retail operations.

Scope
This policy applies to:

- All vendors providing goods or services to the company
- Logistics, supply chain, and procurement vendors
- Technology and IT service providers
- Maintenance, repair, and professional services vendors

Objectives
- Establish clear performance expectations with vendors.
- Ensure timely delivery of goods and services.
- Maintain consistent product or service quality.
- Provide mechanisms for monitoring, reporting, and escalation of issues.

Key SLA Components

1. Response Times
- Define maximum response times for vendor queries, support requests, or issue resolution.
- Specify different response levels based on severity:
  - Critical issues: immediate or within 2 hours
  - High-priority issues: within 24 hours
  - Standard issues: within 3–5 business days

2. Delivery Windows
- Define delivery timelines for products or services.
- Include acceptable tolerance levels for early or late deliveries.
- Specify responsibilities for delays and corrective actions.

3. Quality Metrics
- Outline measurable quality standards for goods or services.
- Examples include:
  - Product defect rates
  - Accuracy of deliveries
  - Compliance with packaging and labeling standards
  - Service uptime or performance metrics for IT vendors

4. Monitoring and Reporting
- Require vendors to provide periodic performance reports.
- Monitor compliance against SLA metrics regularly.
- Use dashboards or scorecards to track vendor performance.

5. Escalation Paths
- Define escalation procedures for SLA breaches.
- Specify contacts and hierarchy for issue resolution.
- Include timelines and actions for escalation to senior management if needed.

6. Review and Continuous Improvement
- Conduct regular performance reviews with vendors.
- Adjust SLAs based on evolving business needs and historical performance.
- Encourage vendors to propose process improvements and efficiencies.

Roles and Responsibilities

Procurement / Vendor Management Team
- Draft and negotiate SLA terms with vendors.
- Monitor vendor performance against agreed metrics.
- Maintain records of SLAs and performance reports.

Vendors
- Adhere to SLA terms, response times, and quality standards.
- Submit required reports and documentation on time.
- Notify the company promptly of any potential issues impacting SLA compliance.

Operations / Store Teams
- Provide feedback on vendor performance.
- Report any SLA breaches or recurring issues to vendor management.

Policy Review
- SLAs should be reviewed annually or whenever significant changes occur in vendor scope, business requirements, or operational priorities.
- Ensure alignment with company objectives and regulatory requirements.

---

doc_id: HH-102
title: Customer Care — Escalation Matrices
doc_type: guideline
version: 1.0
last_updated: 2026-03-02

Escalation Tiers
- Tier 1: Frontline support
- Tier 2: Specialist teams
- Tier 3: Management and legal/compliance

Overview
To ensure timely resolution of customer issues, this matrix defines the workflow for moving inquiries through progressive levels of authority.
2. Escalation TiersTier 1: Frontline Support

* Personnel: Customer Service Associates (Phone, Chat, Email).
* Scope: General inquiries, order tracking, standard returns, and basic product information.
* Authority: Standard discount codes (up to 10%), replacement of damaged parts, and processing returns within the 30-day window.
* SLA: Immediate response; resolution within 24 hours.

Tier 2: Specialist Teams

* Personnel: Subject Matter Experts (SMEs), Floor Leads, or Billing Specialists.
* Scope: Complex shipping logistics (e.g., white-glove delivery failures), technical assembly issues, and recurring billing discrepancies.
* Authority: Refunds outside standard windows, goodwill gestures (up to $100), and coordination with third-party logistics (3PL) partners.
* SLA: Response within 4 business hours; resolution within 48 hours.

Tier 3: Management & Compliance

* Personnel: Department Managers, Legal Counsel, or Executive Resolution Team.
* Scope: High-value claims ($2,000+), threats of litigation, property damage during delivery, and social media crises.
* Authority: Full liability settlements, legal responses, and structural policy overrides.
* SLA: Response within 24 business hours; resolution timeline determined by case complexity.

3. Trigger Criteria
Issues must be escalated immediately if:

* A customer explicitly requests a Supervisor.
* The issue involves safety hazards or product recalls.
* Legal action or "Better Business Bureau" (BBB) reports are mentioned.

---
doc_id: HH-103
title: Warranty Extensions — Optional Plans
doc_type: policy
version: 1.0
last_updated: 2026-03-03

Overview

Beyond the standard 1-year manufacturer’s warranty, customers may purchase Optional Extended Warranty Plans. These plans provide peace of mind by protecting home furnishings and appliances against mechanical breakdown, accidental damage, and wear and tear for an additional period.

Terms and Coverage

Coverage Details
Duration: Extensions are available in 2-year, 3-year, or 5-year increments, beginning upon the expiration of the 1-year standard warranty.
Inclusions: Protection against structural defects, electrical failure in powered furniture (e.g., recliners), and accidental stains or tears (plan-dependent).
Benefits: Includes "No Lemon" guarantees—if a product requires more than three repairs for the same issue, it will be replaced entirely.

Pricing and Eligibility
Pricing: Calculated as a percentage (typically 10-15%) of the original retail price (MSRP).
Eligibility: Must be purchased at the Point of Sale (POS) or within 30 days of the original delivery date.
Exclusions: Commercial use, cosmetic wear (intentional), or damage caused by unauthorized modifications.

Claim Process

Filing a Claim
Notification: Customers must report issues within 14 days of discovery via the Online Warranty Portal.
Documentation: Photos of the defect and the original proof of purchase are required.
Assessment: Remote troubleshooting or a local technician dispatch will be scheduled within 3-5 business days.
Exclusions & Limitations
Wear and Tear: Normal fading from sunlight or pilling of fabric.
External Factors: Damage from pests, fire, or "Acts of God" (floods/earthquakes).

Unauthorized Repair: Any attempt to repair the item via a third party prior to claim approval voids the extension.

---
doc_id: HH-104
title: Product Detail Sheets — Cleaning & Laundry Series
doc_type: product
version: 1.0
last_updated: 2026-03-04

Overview
The **Veridian Clean Series** represents our fictional premium line of high-efficiency (HE) laundry and specialized surface cleaners. These expanded detail sheets provide technical specifications for professional-grade results in residential settings.

Product Specifications (L-9 Detergent)
- Formula Type: Ultra-concentrated Bio-Enzymatic Liquid.

- Active Ingredients:

-- 1. Protease & Amylase Enzymes: For breaking down protein and starch-based stains.

-- 2. Non-ionic Surfactants (AEO-9): For superior oil and grease emulsification.

- pH Level: 7.5 – 8.5 (Neutral-balanced to protect delicate fibers).

- Viscosity: 300–500 cPs for optimal dispensing in automatic tray systems.

- Concentration: 4x Strength (use as directed, for example in a 15ml per standard 7kg load).

Compatibility & Performance

Machine Compatibility: Fully compatible with High-Efficiency (HE) front-loaders and standard top-loading machines.
Water Temperature:
Optimal: 15°C to 40°C (Cold to Warm).
Max Temp: 60°C for heavy-duty sanitation cycles.
Fabric Safety:
Recommended: Cotton, Synthetics, Linens, and Blends.
Not Recommended: Natural Silk or Unfinished Leather (Requires L-9 Delicate Variant).
Mixing Guidelines:
Safe: May be used alongside Oxygen-based bleaches or fabric softeners if added to

separate dispensers.
DANGER: Never mix with Ammonia or Chlorine-based products as this may produce toxic gases.

Care and Storage

Storage: Store in a cool, dry environment between 5°C and 30°C. Keep in original container with the label visible.
Shelf Life: 24 months from the date of manufacture when sealed.
Handling: Keep out of reach of children. If contact with eyes occurs, rinse immediately with water for 15 minutes.

---
doc_id: HH-105
title: Customer Privacy Rights — Access Requests
doc_type: policy
version: 1.0
last_updated: 2026-03-05
---

1. Overview
In accordance with global data protection standards, we grant customers full transparency regarding their personal information. This policy outlines the procedures for customers to exercise their rights to access, rectify, or erase their data stored within our systems.

Customer Rights

Access to Personal Data
Right to Know: Customers may request a comprehensive report of the personal data we maintain, including purchase history, contact details, and marketing preferences.
Data Portability: Upon request, data will be provided in a structured, commonly used, and machine-readable format (e.g., CSV or PDF).

Corrections and Updates
Accuracy: Customers have the right to request the correction of inaccurate or incomplete personal information.
Self-Service: Minor updates (address, phone number) should be encouraged through the "My Account" portal for immediate effect.

Deletion (Right to be Forgotten)
Erasure: Customers may request the permanent deletion of their personal data, provided it is no longer necessary for legal, tax, or active contractual obligations (e.g., open warranty claims).
Anonymization: In cases where transaction data must be kept for financial auditing, personal identifiers will be scrubbed to ensure the record is no longer linkable to the individual.

Submission and Processing
How to Submit Requests
Primary Channel: Requests should be submitted via the Privacy Webform located in the "Trust Center" of our website.
Secondary Channel: Verified email requests sent to privacy@homehaven.ae.
Verification: To protect customer security, all requests require identity verification (e.g., two-factor authentication or government-issued ID check) before data is released or deleted.

Expected Timelines
Acknowledgment: Receipt of the request will be acknowledged within 48 hours.
Resolution: Comprehensive data requests or deletion actions must be completed within 30 calendar days.
Extensions: In complex cases, we reserve the right to extend the deadline by an additional 60 days, provided the customer is notified of the delay and the reason.

---
doc_id: HH-106
title: Data Protection Impact Assessments (DPIA)
doc_type: policy
version: 1.0
last_updated: 2026-03-06
---

1. Purpose
The Data Protection Impact Assessment (DPIA) is a mandatory process designed to identify, analyze, and minimize the data privacy risks associated with new projects, technologies, or organizational processes. This ensures "Privacy by Design" is integrated into every home retail initiative.

2. Trigger Criteria
A DPIA must be conducted prior to the launch of any project that involves:
New Technologies: Implementing AI, biometric scanning (e.g., in-store heat mapping), or advanced tracking pixels.
Large-Scale Processing: Systematic monitoring of customer behavior or processing data for a significant portion of the customer base.
Sensitive Data: Handling "Special Category" data, including financial details, precise geolocation, or minor-related information.
Third-Party Sharing: Integrating new SaaS vendors or data aggregators that require access to the Customer Master Database.

3. Assessment Framework
Every DPIA must document the following four elements:
Description of Processing: A detailed flow of how data is collected, stored, used, and deleted.
Necessity and Proportionality: A justification of why the data is needed and an assessment of whether the project goals can be achieved with less intrusive methods.
Risk Assessment: Identification of potential threats (e.g., data breaches,

unauthorized access, or loss of consumer trust) and their likelihood/impact.
Mitigation Measures: Specific technical or organizational safeguards—such as encryption, pseudonymization, or strict access controls—implemented to reduce identified risks.

4. Roles and Responsibilities
Project Lead: Responsible for initiating the DPIA and providing technical/operational context.
Data Protection Officer (DPO): Responsible for reviewing the assessment, providing formal recommendations, and signing off on the risk level.
IT Security: Responsible for validating that the proposed technical mitigations meet company cybersecurity standards.

5. Record Keeping
All completed DPIAs are considered "Live Documents." They must be stored in the Central Compliance Registry and re-evaluated every 24 months or whenever the scope of the data processing changes significantly.

doc_id: HH-107
title: Telemetry & Application Performance — Metrics
doc_type: guideline
version: 1.0
last_updated: 2026-03-07
---

1. Overview
To ensure a seamless digital shopping experience, this guideline defines the core Service Level Indicators (SLIs) for our mobile and web applications. Continuous monitoring of these telemetry points allows the engineering team to proactively address bottlenecks before they impact conversion rates.

2. Core Performance Metrics
App Load Times & Responsiveness
Time to First Byte (TTFB): Goal < 200ms. Measures the responsiveness of the web server or API gateway.
Largest Contentful Paint (LCP): Goal < 2.5s. Measures the time it takes for the primary product image or hero banner to become visible.
First Input Delay (FID): Goal < 100ms. Tracks the time from when a user first interacts (e.g., taps "Add to Cart") to when the browser begins processing the handler.
Stability & Reliability
Crash-Free User Sessions: Target: 99.9%. Percentage of unique user sessions that do not end in a fatal application crash.
API Error Rate: Monitoring of 4xx (Client) and 5xx (Server) response codes across checkout and search microservices.
Memory Footprint: Tracking of heap usage on mobile devices to prevent background kills on low-end hardware.
Feature Adoption & Engagement
Feature Discovery Rate: Percentage of users who interact with a new feature (e.g., "AR Room Visualizer") within 48 hours of release.

Conversion Funnel Drop-off: Real-time telemetry on telemetry events at each stage of the checkout flow.
Active Session Duration: Analysis of high-value paths versus "dead-end" navigation where users exit the app.

3. Monitoring & Alerting
Critical Thresholds: Any metric falling into the "P95" (95th percentile) lag category for more than 5 minutes triggers an automated Tier 2 Engineer alert.
Reporting: Weekly performance dashboards are reviewed by the Product and UX teams to prioritize the technical debt backlog.

---
doc_id: HH-108
title: Customer Identity & Access Management (CIAM)
doc_type: guideline
version: 1.0
last_updated: 2026-03-08
---

1. Overview
This guideline establishes the framework for managing customer identities across all retail touchpoints. The goal is to provide a frictionless login experience while maintaining rigorous security standards to protect customer accounts and sensitive personal data.

2. User Provisioning & Lifecycle
Account Creation: Support for Just-In-Time (JIT) provisioning. Users may register via traditional email/password or verified Social Login (OIDC/SAML).
Progressive Profiling: To minimize friction, only essential data (Email/Name) is collected at signup. Extended profile data (Address/Preferences) is gathered incrementally as the customer interacts with the platform.
Account Deactivation: Automated workflows for handling "Right to be Forgotten" requests, ensuring data is purged from identity providers and downstream marketing systems simultaneously.

3. Authentication & Authorization
Multi-Factor Authentication (MFA): Risk-based MFA is triggered for high-value actions, such as changing shipping addresses, viewing saved payment methods, or loyalty point redemptions.
Password Policy: Minimum 12 characters with complexity requirements. Passwords must be checked against known "Pwned" databases at the time of creation.
Single Sign-On (SSO): Seamless transition between the mobile app, web store, and in-store kiosk services using a unified identity token.

4. Session Security
Token Management: Use of short-lived Access Tokens and secure Refresh Tokens.
Session Timeouts:
Inactive: Web sessions expire after 30 minutes of inactivity.
Absolute: All sessions require re-authentication after 14 days.
Concurrent Session Control: Limits the number of active logins per customer to

prevent account sharing or credential stuffing attacks.
Secure Cookies: All session cookies must be flagged as HttpOnly, Secure, and SameSite=Strict.

---
doc_id: HH-109
title: Incident Notification Templates
doc_type: template
version: 1.0
last_updated: 2026-03-09
---

1. Overview
Standardized communication templates ensure consistent, clear, and legally-vetted messaging during critical events. Use these blocks to maintain brand trust while providing necessary technical or safety information.

2. Notification Templates

A. General Service Disruption (App/Web)
Subject: We’re working on it: [System/Service] is currently down

Body:
> "Hi [Customer Name],
>
> We are currently experiencing technical difficulties with our [System, e.g., Checkout/Order Tracking]. Our engineering team is on the case and working to restore full service as quickly as possible.
>
> **What this means for you:** [Specific Impact, e.g., You may be unable to complete purchases].
>
> We apologize for the hiccup. You can monitor live updates here: [Link to Status Page]. Thank you for your patience."

B. Product Recall (Safety/Quality)
Subject: IMPORTANT: Safety Recall Notice regarding [Product Name]

Body:
> "Dear [Customer Name],
>
> Our records show you purchased the [Product Name] on [Date]. We are reaching out to inform you of a voluntary recall initiated due to [Reason, e.g., a potential structural defect].
>
> **Action Required:** Please stop using the product immediately.
>
> **Resolution:** You are eligible for a [Full Refund/Free Replacement]. Please

follow this link [Link] to schedule a pickup or visit any retail location. Your safety is our top priority."

C. Policy Update (Terms of Service/Privacy)
Subject: Updates to our [Policy Name]

Body:
> "Hello,
>
> We are updating our [Policy Name] to better serve you. These changes will take effect on [Date].
>
> **Key Changes include:**
> * [Change 1, e.g., Revised shipping timelines]
> * [Change 2, e.g., Enhanced data encryption protocols]
>
> By continuing to use our services after [Date], you agree to these updated terms. You can read the full document here: [Link]."

3. Communication Channels
*   **Critical (Recalls):** Email + SMS + Physical Mail.
*   **Operational (Outages):** In-app banner + Social Media + Status Page.
*   **Administrative (Policy):** Email + Website Footer update.

doc_id: HH-10
title: Installation Guide — AquaClean DW60 Built-in Dishwasher
doc_type: installation_guide
version: 1.2
last_updated: 2026-01-19

AquaClean DW60 Built-in Dishwasher — Installation Guide (Customer Prep + Technician Steps)

A) Before you book installation (customer checklist)
You should have:
1. **Space:** 60cm cabinet opening (standard built-in size)
2. **Power:** grounded outlet within reach (no loose adapters)
3. **Water inlet:** accessible shut-off valve
4. **Drain:** connection point ready (sink trap or dedicated drain)
5. **Pathway:** clear access from door to installation area

If any of the above are missing, installation may be postponed and a revisit fee may apply.

B) HomeHaven standard installation (service scope)
Fee: AED 149
Includes:

- Unboxing and visual inspection
- Positioning and leveling
- Connecting inlet hose and drain hose to existing points
- Basic function test (power on, fill, drain)

Not included (may require a separate contractor):
- Cabinet carpentry modifications
- New electrical wiring or new plumbing points
- Drilling stone countertops or rerouting pipes

C) Safety notes
- Turn off water before connecting
- Do not kink hoses
- Ensure no leaks before pushing unit fully into place

D) First-run recommendation
Run an empty **Quick wash** cycle to confirm drainage and remove packing residues.

E) After installation — common issues
- **Not draining:** check drain hose height and blockage
- **Water leak:** check inlet connection tightness and gasket placement
- **Door not closing:** unit may be unlevel; adjust feet

---
doc_id: HH-110
title: Digital Communications Policy
doc_type: policy
version: 1.0
last_updated: 2026-03-10

Digital Communications Policy (HH-110)

1. Overview
This policy governs the use of digital channels to communicate with customers, ensuring all messaging is purposeful, compliant with anti-spam legislation (e.g., CAN-SPAM, CASL), and respectful of user preferences.

2. Channel Utilization & Standards

Email
*   **Transactional:** Includes order confirmations, shipping updates, and password resets. These are mandatory for service fulfillment and do not require marketing consent.
*   **Marketing:** Includes newsletters, promotions, and personalized recommendations. These require explicit prior consent.
*   **Standards:** All emails must feature a clear "From" line, a physical corporate address, and a functional unsubscribe link.

SMS (Short Message Service)
*   **Use Case:** Reserved for time-sensitive alerts, such as delivery arrivals or two-factor authentication (2FA) codes.
*   **Frequency:** Marketing SMS is capped at three messages per week to prevent "notification fatigue."
*   **Quiet Hours:** No marketing SMS shall be deployed between 9:00 PM and 8:00 AM in the recipient's local time zone.

In-App & Push Notifications
*   **In-App:** Used for contextual guidance and feature announcements while the user is active in the application.
*   **Push:** Used for re-engagement and urgent order status changes. Must be used sparingly to avoid OS-level silencing by the user.

3. Consent Management & Opt-Outs

Opt-In Procedures
*   **Explicit Consent:** Marketing enrollment requires a proactive action (e.g., checking an un-ticked box). Pre-ticked boxes are prohibited.
*   **Double Opt-In:** Recommended for SMS to verify the mobile number ownership and intent.

Opt-Out Instructions
*   **Email:** One-click unsubscribe functionality required in the footer of every marketing transmission.
*   **SMS:** Customers must be able to opt-out by replying "STOP" to any mobile message.
*   **In-App:** Users must have access to a "Notification Settings" menu within the app to toggle specific alert categories.

4. Data Retention & Privacy
*   **Consent Logs:** Digital records of when and how a customer opted in must be retained for the duration of the active subscription plus 3 years.
*   **Unsubscribe Propagation:** Opt-out requests must be synchronized across all platforms within **24 hours**.
*   **Retention:** Communication metadata is retained for 13 months for performance analysis, after which it is anonymized or deleted.

doc_id: HH-11
title: Installation Guide — SecureNest SN-L2 Smart Lock
doc_type: installation_guide
version: 1.3
last_updated: 2026-01-19

SecureNest SN-L2 — Installation Guide (Compatibility + Setup)

A) Door compatibility requirements (important)

- Door thickness: **35–55 mm**
- Backset: **60 mm or 70 mm**
- Existing deadbolt hole: **54 mm** diameter (common standard)
- Edge bore: **25 mm** diameter
- Works best with a single-cylinder deadbolt door prep

If your door does not match these measurements, installation may require additional drilling.

B) HomeHaven installation add-on
Fee: AED 99
Includes:
- Removing existing lock (if compatible)
- Fitting SN-L2 exterior and interior units
- Deadbolt alignment check
- Basic app pairing (Bluetooth) and PIN setup

Not included:
- Painting/repairing door damage
- Network/Wi-Fi troubleshooting (SN-L2 uses Bluetooth for app access)
- Advanced smart-home integrations

C) Battery and maintenance
- Uses **4x AA batteries**
- Low battery warning appears in-app and on the keypad
- Keep the backup key accessible outside the home (trusted person recommended)

D) Initial setup steps (customer-friendly)
1. Insert batteries
2. Create admin PIN
3. Add fingerprints (up to the device limit shown in the app)
4. Test lock/unlock with door open first
5. Calibrate latch throw (follow in-app prompts)

title: FAQs — Orders, Delivery, Payments
doc_type: faq
version: 1.6
last_updated: 2026-01-21

Orders
Q: Can I change my delivery address after ordering?
A: Sometimes. Contact support as soon as possible. If the courier has already picked up the parcel, changes may not be possible.

Q: Do you deliver to P.O. boxes?
A: No. We require a physical address (see HH-02).

Delivery
Q: What is the free delivery threshold?
A: Free standard delivery on orders **AED 199+** (HH-02).

Q: Do you offer same-day delivery?
A: Yes—Express delivery for **Dubai and Abu Dhabi** if ordered by **12:00pm**, fee **AED 35** (HH-02).

Q: What if my item arrives damaged?
A: Report within **24 hours** with photos of packaging and damage (HH-02).

Payments
Q: What payment methods do you accept?
A: Card payments (Visa/Mastercard), Apple Pay (supported devices), and Cash on Delivery (selected areas).

Q: Do you offer installment plans?
A: Not in this fictional scenario.

Click & Collect
Q: How long do you hold Click & Collect orders?
A: **3 days** from readiness notification (HH-03).

---
doc_id: HH-13
title: FAQs — Returns, Warranty, Support
doc_type: faq
version: 1.5
last_updated: 2026-01-21

Returns
Q: What is your returns window?
A: Most items can be returned within **30 days** if unused and in original packaging (HH-04).

Q: Can I return opened consumables like sprays or filters?
A: Usually no, unless defective (HH-04).

Warranty
Q: How long is the warranty?
A: Typically **1 year manufacturer warranty** (HH-05).

Q: Does warranty cover accidental drops or water damage?
A: Usually no (HH-05).

Support
Q: What are your support hours?

A: **Daily 9:00–21:00 (GST)** (HH-01).

Q: How fast do you respond?
A: Target initial troubleshooting response within **24 hours** (HH-05).

---
doc_id: HH-14
title: Privacy & Marketing Preferences Summary
doc_type: policy
version: 1.2
last_updated: 2026-01-11

What we collect (summary)
- Account details (name, phone, email)
- Delivery address
- Order history and support interactions
- Device/app identifiers (for analytics and fraud prevention)

How we use it
- To fulfill orders and provide customer support
- To improve product recommendations (optional)
- To send marketing messages if you opt in

Marketing preferences
You can opt out of marketing at any time:
- Email unsubscribe link, or
- App settings → Notifications, or
- Contact support

Data retention (simple statement)
We retain order records for business and legal purposes. We aim to minimize access and restrict sharing with third parties to what is needed for delivery and payments.

---
doc_id: HH-15
title: Troubleshooting — AirPure AP-400 Air Purifier
doc_type: troubleshooting
version: 1.1
last_updated: 2026-01-17

AirPure AP-400 — Common Issues

1) Unit won’t turn on
- Confirm power cable is fully inserted
- Try another outlet

- If using a power strip, test without it

2) Weak airflow
- Check if the filter is still in plastic packaging (first-time setup mistake)
- Clean pre-filter (vacuum gently)
- Replace main filter if “Filter” indicator persists

3) Strange smell
- New unit smell can occur for the first few hours
- If smell persists: replace carbon filter layer (if included in your filter pack)

4) Loud noise
- Ensure purifier is on a flat surface
- Check for foreign objects near the fan intake
- Use Sleep mode at night

5) Filter replacement note
AP-400 uses replacement pack **AP-F400** (sold separately).
Filter life varies by air quality; heavy dust environments shorten lifespan.

doc_id: HH-17
title: Payments & Billing Policy
doc_type: policy
version: 1.0

last_updated: 2026-01-23

Payments & Billing Policy (HH-17)

1. Overview
HomeHaven provides a secure and transparent billing environment for all household transactions. This policy outlines the financial protocols for acquiring our kitchen, cleaning, and smart-home products within the UAE.

2. Accepted Payment Methods
To provide maximum flexibility, we support the following payment channels:
* **Credit/Debit Cards:** All UAE and international Visa and Mastercard are accepted.
* **Mobile Wallets:** Apple Pay is supported for seamless checkout on compatible iOS and macOS devices.
* **Cash on Delivery (COD):** Available for orders up to **AED 5,000** in serviceable residential areas. (Note: A non-refundable **AED 15** service fee applies).
* **Buy Now, Pay Later:** Installment options via Tabby or Tamara are available for qualifying orders at checkout.

3. Billing & Authorization
* **Data Accuracy:** To prevent processing delays, the "Cardholder Name" and "Billing Address" should align with your bank records.
* **Authorization Holds:** Upon placing an order, a temporary authorization hold may appear on your bank statement. This is a standard verification of funds; the final "Capture" of the payment occurs only once the order is "Ready for Dispatch" from our Al Quoz hub.
* **Currency:** All transactions are processed in **AED**. International cardholders may be subject to additional currency conversion fees by their issuing bank.

4. Cash on Delivery (COD) Protocols
* **Exact Change:** For the safety and efficiency of our couriers, please prepare the exact order total in AED. Drivers carry minimal change.
* **Verification:** High-value COD orders (above AED 1,000) may require a one-time phone verification by our support team before the order is released for delivery.
* **Non-Payment:** Failure to provide payment at the door will result in the order being returned to the hub. A re-delivery fee (HH-55) may apply for subsequent attempts.

5. Receipts & Documentation
* **Tax Invoices:** A formal digital Tax Invoice (including the HomeHaven TRN) is emailed automatically upon order confirmation.
* **Sustainability:** We do not provide paper receipts with deliveries to reduce environmental waste. You can download your full purchase history from the "My Account" section of the HomeHaven App.

6. Fraud Prevention & Security
*   **Verification Requests:** As part of our commitment to secure retail, our Risk Team may contact you via a verified HomeHaven email or phone number to confirm high-value or unusual transactions.
*   **Order Cancellation:** HomeHaven reserves the right to cancel any order that fails our automated fraud-screening protocols or where the customer is unreachable for identity verification.

---
doc_id: HH-18
title: Promotions & Discount Codes Terms
doc_type: policy
version: 1.1
last_updated: 2026-01-24

Promotions & Discount Codes Terms (HH-18)

1. Overview
HomeHaven offers promotional codes and seasonal discounts to provide better value on household essentials. This policy ensures fair usage and transparency regarding how these discounts interact with our standard pricing, HavenPlus rewards, and service fees.

2. General Rules & Eligibility
*   **Item Eligibility:** Promo codes are typically category-specific (e.g., "Kitchen20" for the **PureBlend** or **BrewBuddy** series). They do not apply to "Final Sale" or "Clearance" items unless explicitly stated.
*   **Service Exclusions:** Unless a promotion specifically mentions "Free Installation" or "Free Shipping," discount codes apply only to the retail price of the physical product. They cannot be used to offset:
    *   **Delivery Fees** (Standard or Express).
    *   **Professional Installation Fees** (e.g., for the **SN-L2 Smart Lock**).
    *   **COD Service Fees** (AED 15).
    *   **Extended Warranty Plans**.
*   **Usage Limits:** Most promotional codes are restricted to **one use per customer** and one code per transaction.

3. Discount Stacking & HavenPlus
*   **Code Stacking:** Multiple promo codes cannot be combined in a single order. The system will automatically apply the discount with the highest value if multiple are entered.
*   **HavenPlus Interaction:**
    *   **Points + Promo:** You may typically redeem your **HavenPlus** points (in 500-point increments) alongside a single promotional code, unless the promotion is marked as "Exclusive" or "Non-Combinable."
    *   **Tier Multipliers:** Seasonal "Double Points" promotions are calculated based on the net price paid *after* the discount code is applied.

4. Returns & Refund Logic
If a discounted item is returned, the financial reconciliation follows the "Net Paid" principle:
*   **Refund Amount:** You will be refunded the actual amount charged to your card or paid via COD. The "value" of the discount code is not refundable or transferable to a future order.
*   **Partial Returns:** If a promo code required a minimum spend (e.g., "AED 50 off AED 500") and a partial return drops your total below that threshold, the discount will be voided, and the difference will be deducted from your refund.

5. Misuse & Fraud Prevention
To maintain the integrity of our community offers, HomeHaven monitors for promotional abuse:
*   **Duplicate Accounts:** Creating multiple accounts to reuse a "New Joiner" code is prohibited.
*   **Bulk Resale:** Using promotional codes to purchase items for commercial resale is a violation of our Terms of Service.
*   **Right to Cancel:** HomeHaven reserves the right to deactivate any promo code or cancel associated orders if we suspect technical exploitation or fraudulent acquisition of codes.

6. Expiry & Technical Issues
*   **Validity:** All codes have a strict expiry date (typically 11:59 PM GST on the date of expiry).
*   **Support:** If a valid code fails to apply to an eligible **AirPure** or **DustDash** product, please contact **Customer Support (HH-30)** with a screenshot of the error before finalizing your payment.

---
doc_id: HH-19
title: Order Status Definitions
doc_type: reference
version: 1.0
last_updated: 2026-01-13

Status glossary
- **Confirmed:** payment authorized (or COD confirmed) and order placed
- **Processing:** items being picked/packed
- **Shipped:** handed to courier
- **Out for delivery:** courier is delivering today
- **Delivered:** courier marked delivered
- **Ready for pickup:** Click & Collect items prepared
- **Picked up:** collected from store
- **Cancelled:** order cancelled before fulfillment
- **Return requested:** customer initiated return
- **Returned:** items received back and under inspection

- **Refunded:** refund issued (timing depends on bank/payment method)

---
doc_id: HH-20
title: Delivery Address & Access Guidelines
doc_type: guideline
version: 1.0
last_updated: 2026-01-20

Address tips
To reduce missed deliveries:
- Provide a complete **physical address** (no P.O. boxes)
- Include building name, apartment/villa number, and nearest landmark
- Provide a reachable phone number

Building access
- If your building requires security clearance or a gate pass, arrange it before the delivery window.
- For bulky items, book lift access if required.

Missed delivery
If the courier cannot reach you, re-delivery may incur **AED 20** (see Delivery & Shipping Guidelines).

---
doc_id: HH-21
title: Packaging, Unboxing, and Proof of Damage Checklist
doc_type: guideline
version: 1.0
last_updated: 2026-01-20

Packaging, Unboxing, and Proof of Damage Checklist (HH-21)

1. Overview
At **HomeHaven**, we utilize high-durability packaging, but transit incidents can occur. This checklist ensures you have the necessary documentation to support a swift replacement or refund claim. Following these steps protects your consumer rights under our **Support Escalation Policy (HH-66)**.

2. Evidence Collection (The 5-Step Photo Rule)
If you suspect your item has been mishandled during transit, do not discard any materials. Capture the following five points of evidence before moving the product:

1. **Outer Box:** Photograph all six sides of the exterior carton, focusing on crushed corners, punctures, or water spots.
2. **Shipping Label:** A clear, legible photo of the carrier label showing your

Order ID and **Tracking Number**.
3. **Inner Packaging:** Document how the item was secured (e.g., styrofoam, bubble wrap, or cardboard inserts) and if these internal protectors were compromised.
4. **Product Damage:** Close-up shots of the specific defect (e.g., a cracked **PureBlend PB-900** pitcher or a dented **CrispWave** chassis).
5. **Retention:** You **must** keep all original packaging and the damaged unit until the claim is officially resolved and a pickup is scheduled.

3. Mandatory Reporting Timelines
Claims submitted outside of these windows may be rejected by our logistics insurers:

* **Damaged Items:** Must be reported within **24 hours** of the delivery timestamp.
* **Missing Items / Shortages:** If your order contains multiple boxes and one is missing, report it within **48 hours** of the final delivery confirmation.
* **Wrong Item Received:** Report within **48 hours**; do not open the internal product seal if the outer box indicates the incorrect model.

4. Packaging Specifics
* **"As-Is" Shipping:** To reduce environmental waste, some large-scale appliances (like the **AirPure AP-400**) ship in their original manufacturer's branded box without an additional outer brown carton. In these cases, the manufacturer's box acts as the primary shipping container.
* **Security Seals:** If the "HomeHaven Tamper-Evident Tape" appears cut or resealed upon arrival, document this immediately before opening.

5. Filing the Claim
Submit your evidence package via the **HomeHaven App** under "Returns & Support" or email `claims@homehaven.ae` with your **Order ID** in the subject line.

---
doc_id: HH-22
title: Returns — Condition Grading (Inspection Rules)
doc_type: reference
version: 1.0
last_updated: 2026-01-22

Grades
Grade A (Resellable)
Unused, complete, original packaging intact.

Grade B (Open-box)
Packaging opened but product appears unused; minor packaging wear.

Grade C (Incomplete)

Missing accessories/manuals/free gifts OR heavy packaging damage.

Grade D (Rejected)
Used signs, mismatched serial, damage from misuse/liquid ingress, or unauthorized repair.

Outcomes
- Grade A/B: eligible for refund per policy
- Grade C: partial refund may be offered at support discretion
- Grade D: refund refused; item may be returned to customer

---
doc_id: HH-23
title: Category Exceptions — Hygiene, Consumables, and Final Sale
doc_type: policy
version: 1.0
last_updated: 2026-01-22

Category Exceptions — Hygiene, Consumables, and Final Sale (HH-23)

1. Overview
While HomeHaven offers a flexible 30-day return window, certain product categories are subject to restricted return conditions due to health, safety, and hygiene regulations, or their consumable nature. This policy ensures the integrity and safety of the inventory provided to all UAE households.

2. Restricted Categories (Non-Returnable Once Opened/Used)

Hygiene-Related Items
For the protection of our customers, items that come into direct contact with the body or water systems cannot be returned once the factory seal is broken.
* **Personal Care:** Trimmers, shavers, and hair styling tools.
* **Health & Wellness:** Oral irrigators (water flossers) and electric toothbrushes.
* **Note:** If the external shrink-wrap or tamper-evident seal is intact, these items remain eligible for return under **HH-52**.

Consumables & Liquid Solutions
Products that are depleted through use are ineligible for return once opened.
* **Cleaning Solutions:** Detergent refills, specialized surface sprays, and floor polishes.
* **Filtration Media:** Replacement HEPA filters (e.g., **AP-F400**), water pitcher filters, and carbon cartridges.
* **Kitchen Sundries:** Descaling tablets and coffee-related consumables.

Final Sale & Clearance
* **Status:** Items clearly marked as "Final Sale" or "Clearance" on the product page or physical price tag.

*   **Condition:** These are sold at significant discounts and are ineligible for change-of-mind returns or exchanges.

3. Exceptions for Defective Goods
The restrictions in Section 2 apply strictly to "Change-of-Mind" returns.
*   **Manufacturing Defects:** If a hygiene-related item fails to power on or a consumable refill is found to be leaking upon arrival, the standard **Warranty (HH-51)** or **Escalation (HH-66)** protocols apply.
*   **Resolution:** In these cases, HomeHaven will provide a replacement or store credit following a technical inspection.

4. Pre-Purchase Verification Tip
To avoid disappointment, we strongly recommend the following before breaking a product seal:
*   **Dimensions:** For built-in filters or appliances, double-check the "Compatibility Notes" on the Product Detail Sheet (e.g., **HH-57**).
*   **Model Matching:** Verify that the replacement part number (e.g., **AP-F400**) matches your existing base unit model (e.g., **AP-400**).
*   **Consultation:** When in doubt, use the "Live Chat" feature in the HomeHaven app to confirm compatibility with a specialist.

---
doc_id: HH-24
title: Warranty Claim Checklist (What to Provide)
doc_type: guideline
version: 1.0
last_updated: 2026-01-18

Warranty Claim Checklist: What to Provide (HH-24)

1. Overview
To expedite the technical review of your **HomeHaven** product, please ensure all required data is prepared before initiating a claim. Providing a complete "Evidence Package" allows our Service Team to accurately diagnose issues—such as motor failure in the **PB-900** or sensor errors in the **AP-400**—without unnecessary back-and-forth.

2. Evidence Submission Requirements
When contacting Support for a warranty-related concern, please include the following:

*   **Transaction ID:** Your 10-digit Order Number (e.g., HH-XXXX-XXXX).
*   **Product Identity:** Full product name and model number (found on the base plate or original box).
*   **Unique Identifier:** The **Serial Number (S/N)**, typically found on a silver

or white sticker on the underside or rear of the unit.
*   **Problem Statement:** A brief description of the malfunction (e.g., "Unit powers on but blades do not rotate").
*   **Visual Documentation:**
    *   **Photos:** Clear shots of the unit and any visible physical defects.
    *   **Video:** A 10-15 second clip demonstrating the issue (e.g., unusual grinding noises or flashing error lights).
*   **Diagnostic Data:** Any specific **Error Codes** appearing on digital displays (e.g., "E1" on the **CC-T1 Thermostat**).

3. Post-Submission Workflow
Once your claim is logged, the following steps occur:

1. **Remote Troubleshooting:** A specialist will provide 1–2 immediate steps to attempt a reset or recalibration.
2. **Logistics Coordination:** If troubleshooting fails, HomeHaven will coordinate a **Service Center Drop-off** at our Al Quoz hub or a **Courier Collection** for bulky items.
3. **Technical Inspection:** Our certified technicians will open the unit to verify the internal fault and check for "Misuse" or "Unauthorized Repair" (refer to **HH-51**).

4. Service Level Targets (SLA)
*   **Initial Response:** Within **24 business hours** of submission.
*   **Standard Resolution:** Typically **7–14 business days** from the date the item reaches our Service Center.
*   **Extended Timeline:** If proprietary spare parts (e.g., a specific HVAC relay for the **CC-T1**) must be imported, the timeline may be extended. You will receive a weekly status update via SMS.

---
doc_id: HH-25
title: Warranty Exclusions — Quick Reference
doc_type: reference
version: 1.0
last_updated: 2026-01-18

Warranty Exclusions — Quick Reference (HH-25)

1. Overview
While **HomeHaven** products are engineered for the rigors of daily UAE household life, the standard warranty is specifically designed to protect against manufacturing defects and component failures. This reference outlines scenarios and items that fall outside of that protection.

2. Standard Exclusions (Not Covered)

Physical & Accidental Damage
*   **Impact:** Cracks, dents, or shattered glass (e.g., a dropped **BB-CM125** carafe) resulting from accidental drops or mishandling.
*   **Liquid Ingress:** Damage caused by internal spills or submersion, unless the product carries a specific IP-rating (e.g., "Waterproof") and was used within those parameters.

Consumables & High-Wear Parts
As defined in **HH-51**, these items naturally degrade and are the owner's responsibility to replace:
*   **Filters:** Clogged HEPA or carbon filters.
*   **Mechanical Wear:** Thinning bristles on vacuum brush rolls or dulled blender blades.
*   **Battery Capacity:** Normal chemical aging of lithium-ion cells (e.g., shorter runtimes after 6+ months of use).

Infrastructure & External Factors
*   **Voltage Issues:** Damage caused by power surges or the use of incorrect voltage converters/travel adapters.
*   **Improper Installation:** Failure resulting from DIY setup that contradicts the **HH-62** guidelines (e.g., reversed wiring on a **CC-T1**).
*   **Environmental Stress:** Corrosive damage or overheating caused by storing indoor appliances in high-humidity or high-heat outdoor areas (e.g., balconies or non-climate-controlled garages).

Unauthorized Intervention
*   **Third-Party Repair:** Any attempt to open the chassis or repair the unit by a non-certified technician.
*   **Modifications:** Use of non-genuine HomeHaven parts (e.g., third-party filters) that leads to motor or system failure.

3. Determining Coverage
If you are unsure whether a fault is a "Manufacturing Defect" or "Accidental Damage":
*   **Step 1:** Consult the **Warranty Claim Checklist (HH-24)**.
*   **Step 2:** Submit high-resolution photos and a video of the fault to our technical team.
*   **Step 3:** Our specialists will perform a diagnostic to determine if the failure was caused by a component flaw (covered) or an external stressor (not covered).

4. Post-Warranty Options
If your item is excluded from warranty coverage:
*   **Paid Repair:** HomeHaven offers out-of-warranty repair services at our Al Quoz hub (subject to parts and labor fees).
*   **Trade-In:** You may be eligible for a **HavenPlus** discount toward a replacement unit through our "Green-Cycle" recycling program.

title: HavenPlus — Points Examples (Worked Scenarios)
doc_type: loyalty
version: 1.0
last_updated: 2026-01-16

HavenPlus — Points Examples: Worked Scenarios (HH-26)

1. Overview
To help members maximize their savings, this guide provides practical mathematical examples of how **HavenPlus** points are earned, redeemed, and managed throughout the customer lifecycle at HomeHaven.

2. Earning Scenarios (Standard 1:1 Ratio)
Points are calculated based on the final AED value of the product (excluding VAT, shipping, and service fees).

*   **Scenario A: Kitchen Essentials**
    *   Purchase: **PureBlend Blender (PB-900)** at AED 249.
    *   Action: Order is delivered to your villa in Khalifa City.
    *   **Result:** **249 points** credited to your account within 24 hours.
*   **Scenario B: Smart Home Upgrade**
    *   Purchase: **SecureNest Smart Lock (SN-L2)** at AED 549.
    *   Action: Installation is completed by a HomeHaven technician (HH-62).
    *   **Result:** **549 points** credited (Note: The AED 99 installation fee does not earn points).

3. Redeeming Scenarios (The 500-Point Rule)
Points are redeemed in fixed blocks of 500. Each block represents a **5% cash-back value** (AED 25).

*   **Level 1 Redemption:**
    *   Balance: 650 points.
    *   Redeem: **500 points**.
    *   **Benefit:** **AED 25 discount** applied to your current cart. (150 points remain).
*   **Level 2 Redemption:**
    *   Balance: 1,200 points.
    *   Redeem: **1,000 points**.
    *   **Benefit:** **AED 50 discount** applied to your current cart. (200 points remain).

4. Rolling Expiry Logic
HomeHaven utilizes a "First-In, First-Out" (FIFO) expiry system to give you a full

year to use every point earned.

*   **Date Earned:** February 1, 2026 (e.g., from a **CC-T1 Thermostat** purchase).
*   **Validity:** 365 Days.
*   **Expiry Date:** **February 1, 2027**.
*   *Tip: Check the "Points Activity" tab in the HomeHaven App to see a 30-day warning for any upcoming expiring blocks.*

5. Returns & Refunds Impact
When a transaction is reversed, the associated points must also be reconciled.

*   **Scenario: Partial Return**
    1. You buy two **AirPure AP-400** units (Earned: 800 points).
    2. You return one unit for a refund.
    3. **Result:** **400 points** are automatically deducted from your balance.
*   **Scenario: Points-Used Return**
    1. You use 500 points (AED 25 value) to buy a **BB-CM125 Coffee Maker**.
    2. You return the coffee maker.
    3. **Result:** You receive a cash/card refund for the amount paid, and the **500 points** are restored to your HavenPlus account.

title: HavenPlus — Tier Rules and Benefits
doc_type: loyalty
version: 1.0
last_updated: 2026-01-16

HavenPlus — Tier Rules and Benefits (HH-27)

1. Overview
The **HavenPlus** loyalty program is structured to reward our most frequent HomeHaven shoppers. By reaching specific spending milestones within the UAE market, members unlock enhanced service levels and exclusive access to our premium household catalog.

2. Membership Tiers

HavenPlus Classic
*   **Status:** Default entry-level tier for all registered users.
*   **Requirement:** Successful account creation via the HomeHaven App or Website.
*   **Core Benefit:** Standard earning rate of 1 point for every AED 1 spent on qualifying products.

HavenPlus Premium (Plus)

*   **Status:** Elevated tier for frequent shoppers and smart-home early adopters.
*   **Requirement:** Total qualifying spend of **AED 2,000** within a rolling 12-month period.
*   **Maintenance:** To maintain "Plus" status, the AED 2,000 spending threshold must be met annually.

3. Plus Tier Exclusive Benefits
Once a member reaches the Plus threshold, the following enhancements are activated:
*   **Early Access:** 24-hour advance window to shop Seasonal Sales (e.g., Ramadan Specials, White Friday) before they are released to the general public.
*   **Dedicated Chat Queue:** Priority routing in the HomeHaven App's "Live Support" module, reducing wait times during peak hours.
*   **Exclusive Beta Testing:** Opportunity to purchase "First-Run" units of new Series L-9 or CrispWave releases before the official UAE launch.
*   **Birthday Reward:** A one-time 500-point bonus (AED 25 value) credited during your birthday month.

4. Program Integrity & Rules
*   **Identity Sync:** Only **one account per unique UAE mobile number** (+971) is permitted. Points cannot be merged across multiple accounts.
*   **Non-Transferable:** Benefits and tier status are tied to the individual account holder and cannot be gifted or sold.
*   **Abuse Policy:** HomeHaven reserves the right to suspend or terminate accounts suspected of loyalty fraud, including:
    *   Creating multiple accounts to bypass redemption limits.
    *   Bulk-buying for commercial resale using personal loyalty benefits.
    *   Exploiting return loops to artificially inflate point balances.

5. Tier Tracking
Members can track their progress toward the "Plus" tier via the **Progress Bar** in the HavenPlus dashboard. This displays the remaining spend required (in AED) to unlock the next level of benefits.

title: Delivery Pricing and Cut-off Times (Quick Table)
doc_type: reference
version: 1.0
last_updated: 2026-01-20

Delivery Pricing and Cut-off Times (HH-28)

1. Overview
To maintain a reliable supply chain for HomeHaven household essentials, we operate a tiered delivery system across the UAE. Logistics are optimized from our central

Al Quoz hub to ensure that high-demand items—like the **CrispWave** or **AirPure** series—reach urban centers with maximum efficiency.

2. Delivery Service Matrix

Option	Availability	Price	Order Cut-off	Typical Window
Standard	All Emirates	**Free** on AED 199+ (AED 15 below)	6:00 PM	**Next-day** (Major Cities) 2–3 days (Remote Areas)
Express	Dubai & Abu Dhabi	**AED 35**	12:00 PM	**Same-day** (16:00 – 22:00)
Click & Collect	All Stores	**Free**	N/A	**Ready in ~2 hours** (Held for 3 days)

3. Service Definitions & Restrictions

Standard Delivery
* **Major Cities:** Includes Dubai, Abu Dhabi City, Sharjah City, and Ajman.
* **Other Areas:** Includes Al Ain, Western Region (Ghayathi/Liwa), and Northern Emirates (Fujairah/RAK/UAQ).
* **Threshold:** The AED 199 free-shipping threshold is calculated on the net cart value after all HavenPlus discounts are applied.

Express Delivery (Same-Day)
* **Urgency:** Designed for immediate household needs (e.g., a broken blender or urgent air purification).
* **Geographic Limit:** Only available within the municipal limits of Dubai and Abu Dhabi. Not available for "Bulky/Installed" items (HH-54).
* **Real-Time Tracking:** Customers receive a live GPS link via SMS once the driver leaves the hub.

Click & Collect (In-Store Pickup)
* **Verification:** You must present your **Order QR Code** and a valid Emirates ID or Passport.
* **Proxy Pickup:** If sending someone else, use the **Authorization Form (HH-65B)** via the app.
* **Unclaimed Orders:** Items not collected within 72 hours are returned to inventory, and a refund is initiated (minus a 5% restocking fee).

4. Operational Notes
* **Public Holidays:** Delivery windows may be extended during UAE National Day, Eid Al Fitr, and Eid Al Adha.
* **Bulky Items:** Scheduled delivery for large appliances (HH-54) follows a separate 4-hour slot system and does not qualify for Express 12:00 PM cut-offs.
* **Inclement Weather:** During rare heavy rain or sandstorms, Express windows may be downgraded to Standard for driver safety.

---
doc_id: HH-29
title: Click & Collect — Additional FAQs
doc_type: faq
version: 1.0
last_updated: 2026-01-10

Click & Collect — Additional FAQs (HH-29)

1. Overview
Click & Collect is our fastest fulfillment method, allowing HomeHaven customers to bypass courier timelines by picking up their household essentials directly from our Experience Centers in Dubai, Abu Dhabi, or Sharjah.

2. Frequently Asked Questions

Q: Is Click & Collect free?
A: **Yes.** Unlike home delivery for low-value orders, Click & Collect has no minimum spend requirement and zero service fees. It is the most cost-effective way to secure small items like **AP-F400 Filter Packs** or **BB-CM125** accessories.

Q: When will my order be ready for pickup?
A: Typically within **2 hours** of order placement, provided the order is made during standard store operating hours (HH-65). You will receive an automated "Ready for Collection" SMS and Email containing your unique pickup QR code.
* *Note: Orders placed within 2 hours of store closing will be ready the following morning by 11:00 AM.*

Q: How long do you hold my order at the store?
A: We hold your items for a maximum of **3 calendar days** from the moment the "Ready for Collection" notification is sent.
* **Unclaimed Orders:** After 72 hours, the order is automatically cancelled, the items are returned to the shelf, and a refund is processed (minus a 5% restocking fee).

Q: Can I switch from Home Delivery to Click & Collect after I've placed my order?
A: **Sometimes.** You must contact **Customer Support (HH-66)** within 30 minutes of order confirmation. Once an order has been "Picked and Packed" at the Al Quoz hub for courier dispatch, it is moving through an automated logistics chain and the method cannot be changed.

Q: What do I need to bring to the store?
A: To prevent identity fraud and ensure your **HavenPlus** points are secured, you must present:
1. The **Order QR Code** (Digital or Printed).
2. A valid **Emirates ID** or Passport matching the name on the order.

Q: Can someone else pick up the order for me?
A: Yes. You must forward the Order QR Code to them. They will also need to show a copy of your Emirates ID (digital is fine) to our store associate for verification.

3. Location-Specific Notes
*   **Al Quoz (Dubai):** Use the dedicated "Click & Collect" parking bays near the main entrance for rapid loading of bulky items like the **CrispWave CW-AF55**.
*   **Khalidiya (Abu Dhabi):** During peak weekend hours, please allow an additional 15 minutes for curbside assistance.

doc_id: HH-30
title: Customer Support Channels & What to Include
doc_type: guideline
version: 1.0
last_updated: 2026-01-12

Customer Support Channels & What to Include (HH-30)

1. Overview
At **HomeHaven**, we aim for a "First-Contact Resolution" (FCR). To ensure our specialists can diagnose your **PureBlend** motor issues or track your **CrispWave** delivery without delay, please use the designated channels and provide the required technical context.

2. Support Hours
Our UAE-based support team is available during peak household activity hours:
*   **Daily Operating Window:** 09:00 – 21:00 (Gulf Standard Time).
*   **Response Target:**
    *   **Chat:** < 5 minutes.
    *   **Phone:** < 2 minutes.
    *   **Email:** < 4 hours.

3. Communication Channels

Live Chat (Recommended)
*   **Access:** Via the "Help" icon in the **HomeHaven App** or web portal.
*   **Best For:** Real-time troubleshooting for the **CC-T1 Thermostat**, quick order status updates, and **HavenPlus** point balance queries.

Phone Support
*   **Direct Line:** 800-HAVEN (800-42836).
*   **Best For:** Urgent delivery redirects (HH-66), reporting transit damage, or

complex installation coordination for bulky items.

Email Support
*   **Address:** `support@homehaven.ae`.
*   **Best For:** Submitting formal **Warranty Claims (HH-24)**, sending high-resolution photo evidence, or requesting data deletion under our **Privacy Policy (HH-64)**.

4. Mandatory Information Checklist
To bypass initial verification and speed up your resolution, please include the following in your initial message:

*   **Order Identifier:** Your 10-digit Order Number (e.g., HH-1234567890).
*   **Product Specifics:** The exact model (e.g., **AirPure AP-400**) and the **Serial Number (S/N)** located on the base of the unit.
*   **Visual Documentation:** Clear photos of the shipping label, damaged packaging, or a short video of a mechanical fault (e.g., unusual noises).
*   **Problem Timeline:** A concise description of when the issue started (e.g., "Immediately after the first 60-second cycle").

5. After-Hours Support
If you require assistance outside of 09:00–21:00, please submit a **Support Ticket** through the app. Our system will timestamp your request, ensuring you stay within the **24-hour reporting window** for damaged goods (HH-21), and a specialist will prioritize your case at 09:00 the following morning.

---
doc_id: HH-31
title: Product Detail Sheet — CrispWave Air Fryer CW-AF55
doc_type: product
version: 1.0
last_updated: 2026-01-14

Product Detail Sheet — CrispWave Air Fryer CW-AF55 (HH-31)

1. Overview
The **CrispWave CW-AF55** is a 5.5L high-capacity air fryer designed for healthy UAE households. Utilizing 360° Rapid Air Circulation, it achieves a crispy "deep-fried" texture using up to 85% less oil than traditional frying methods, making it ideal for family-sized portions of local favorites.

2. Key Specifications
*   **Total Capacity:** 5.5 Liters (fits a whole 1.2kg chicken or 800g of fries).
*   **Temperature Range:** Precision control from **80°C to 200°C**.
*   **Timer:** 0–60 minute programmable timer with an audible ready-signal.

*   **Power:** 1700W High-Efficiency heating element.
*   **Digital Interface:** LED Touch Control Panel with real-time temperature display.

3. Intelligent Presets & Modes
The CW-AF55 includes five "One-Touch" smart programs calibrated for optimal results:
*   **Fries:** 200°C / 18 mins (Recommended: Shake at 9 mins).
*   **Chicken:** 190°C / 25 mins (Ideal for wings or drumsticks).
*   **Veg:** 160°C / 10 mins (Perfect for roasted cauliflower or broccoli).
*   **Reheat:** 120°C / 5 mins (Restores crispness to leftover manakish or samosas).
*   **Bake:** 160°C / 30 mins (Suitable for small cakes or muffins).

4. Safety & Ergonomics
*   **Auto Shut-Off:** The unit automatically pauses heating when the basket is removed and shuts off completely when the timer hits zero.
*   **Cool-Touch Handle:** Advanced thermal insulation prevents heat transfer to the grip during high-temperature cycles.
*   **Overheat Protection:** Integrated thermal fuse prevents internal component damage during back-to-back cooking sessions.
*   **Non-Slip Feet:** High-friction rubber base prevents "walking" on granite or tiled kitchen counters.

5. Care and Maintenance
*   **Non-Stick Preservation:** The basket features a premium PFOA-free coating. **Hand washing with a soft sponge is strongly recommended** to extend the life of the non-stick surface.
*   **Dishwasher Safety:** While the basket is technically top-rack dishwasher safe, harsh detergents and high-heat drying cycles may cause the coating to flake over time.
*   **Exterior:** Wipe the matte-finish housing with a damp microfiber cloth only. Never submerge the main unit in water.

6. Warranty & Service
*   **Standard Term:** 1-year manufacturer warranty covering electrical and motor defects.
*   **Exclusions:** Damage to the non-stick coating due to metal utensils or abrasive cleaning is not covered (refer to **HH-25**).
*   **Support:** For troubleshooting or spare parts (e.g., replacement rubber feet), contact **Customer Support (HH-30)**.

---
doc_id: HH-32
title: Product Detail Sheet — PureBlend Blender PB-900
doc_type: product

version: 1.0
last_updated: 2026-01-14

Product Detail Sheet — PureBlend Blender PB-900 (HH-32)

1. Overview
The **PureBlend PB-900** is a high-torque 900W power blender engineered for the modern UAE kitchen. Designed to handle everything from frozen fruit smoothies to traditional lentil soups, the PB-900 utilizes a six-point stainless steel blade system to emulsify tough ingredients and crush ice into snow in seconds.

2. Key Specifications
* **Motor Power:** 900W High-Efficiency Copper Motor (22,000 RPM peak).
* **Jug Capacity:** **1.5L** BPA-Free Tritan™ Pitcher (Impact-resistant and thermal-shock safe).
* **Blade Assembly:** Pro-Extractor 6-blade set (Titanium-coated for edge retention).
* **Control Interface:** Precision rotary dial with blue LED illumination.
* **Base:** Vibration-dampening suction feet for high-speed stability.

3. Operational Modes & Versatility
* **Speed 1 (Low):** Ideal for soft fruits, protein shakes, and light mixing.
* **Speed 2 (High):** Optimized for fibrous vegetables, nuts, and thick purées.
* **Pulse Mode:** Provides manual control for chopping salsas or starting heavy loads.
* **Ice-Crush Function:** A specialized interval pulse program designed to crack ice cubes without overheating the motor.

4. Safety & Thermal Protection
* **Lid-Interlock System:** The PB-900 features a mechanical safety sensor; the motor will not engage unless the lid is fully seated and the locking tabs are clicked into place.
* **Thermal Overload Protector (TOP):** Automatically cuts power if the internal motor temperature exceeds safe limits.
* **Overheating Prevention (Duty Cycle):** To protect the motor's lifespan, do not run the unit continuously for more than **60 seconds**. Always allow the motor to rest for **2 minutes** between blending cycles.

5. Care & Maintenance
* **Self-Cleaning Hack:** Fill the jug halfway with warm water and a drop of dish soap; run on Speed 1 for 30 seconds, then rinse.
* **Blade Care:** The blade assembly is removable for deep cleaning. Always use a brush to clean around the blades; never use your bare hands.
* **Dishwasher Safety:** The pitcher and lid are top-rack dishwasher safe. The motor base should only be wiped with a damp cloth.

6. Support & Warranty
* **Standard Coverage:** 1-year limited warranty against motor and electrical failure.

*   **Common Issue:** If the unit stops during a heavy blend, it has likely tripped the thermal fuse. Unplug the unit and wait 30 minutes before pressing the "Reset" button on the bottom of the base.

---
doc_id: HH-33
title: Product Detail Sheet — DustDash Cordless Vacuum DD-VX2
doc_type: product
version: 1.0
last_updated: 2026-01-14

Product Detail Sheet — DustDash Cordless Vacuum DD-VX2 (HH-33)

1. Overview
The **DustDash DD-VX2** is a high-maneuverability cordless vacuum cleaner specifically balanced for UAE apartments and villas. Featuring a brushless digital motor and a multi-stage filtration system, it effectively captures fine desert dust and pet hair from both hard floors and low-pile carpets.

2. Technical Specifications & Highlights
*   **Motor Type:** 250W High-Efficiency Brushless DC (BLDC) Motor.
*   **Battery System:** 2200mAh Removable Lithium-Ion Battery.
*   **Operational Runtime:**
    *   **Eco Mode:** Up to 35 minutes (Ideal for hard floors and daily dusting).
    *   **Boost Mode:** 12–15 minutes (High-suction for carpets and stubborn debris).
*   **Weight:** 2.4kg (Fully assembled), 1.5kg (Handheld configuration).
*   **Dust Bin Capacity:** 0.6L with "One-Touch" bottom-release emptying.

3. Filtration & Air Quality
The DD-VX2 features a 4-stage cyclonic separation system to ensure exhausted air is cleaner than the intake:
1. **Primary Cyclone:** Separates large debris and hair.
2. **Stainless Steel Mesh:** Blocks fine grit and sand.
3. **Midi-Filter:** Protects the motor from micro-dust.
4. **Post-Motor HEPA-Style Filter:** Traps 99.9% of particles as small as 0.3 microns, including allergens and dust mites.

4. Included Accessories
*   **Motorized Floor Head:** Features integrated LED headlights for spotting dust under furniture.
*   **2-in-1 Crevice Tool:** For tight corners and AC vent cleaning.
*   **Upholstery Brush:** For sofas, curtains, and car interiors.
*   **Wall-Mount Dock:** Securely holds the vacuum and two accessories while charging.

5. Maintenance & Care
To maintain peak suction power and battery health, follow these critical care steps:
*   **Filter Washing:** Rinse the HEPA-style filter under cold running water monthly. **Crucial:** Allow the filter to air-dry completely for at least **24 hours** before reinserting. Using a damp filter will cause permanent motor damage and void the warranty.
*   **Brush Roll Clearance:** Use a pair of scissors to remove tangled hair or threads from the motorized floor head weekly to prevent bearing seize.
*   **Battery Health:** Avoid leaving the vacuum on the charger for more than 48 hours. Store in a cool, dry place away from direct sunlight (especially during UAE summer months).

6. Warranty & Service
*   **Main Unit:** 1-year manufacturer warranty on the motor and electronics.
*   **Consumables:** Batteries and filters are considered wear-and-tear items (refer to **HH-51**).
*   **Replacements:** Genuine replacement batteries (**DD-BAT2**) and filter packs (**DD-FLT2**) are available at all HomeHaven stores.

---
doc_id: HH-34
title: Product Detail Sheet — SteamShine Steam Mop SS-M10
doc_type: product
version: 1.0
last_updated: 2026-01-14

Product Detail Sheet — SteamShine Steam Mop SS-M10 (HH-34)

1. Overview
The **SteamShine SS-M10** is a high-temperature steam cleaning system engineered for deep sanitization of tiled and sealed floor surfaces. By converting plain water into pressurized steam, it eliminates 99.9% of common household bacteria and grime without the use of harsh chemicals, making it ideal for UAE homes with children and pets.

2. Technical Specifications & Highlights
*   **Heat-Up Time:** Rapid-start boiler technology; **ready in 25 seconds**.
*   **Water Tank Capacity:** 350ml (provides approx. 12–15 minutes of continuous steam).
*   **Steam Temperature:** 110°C at the nozzle for effective thermal sanitization.
*   **Power Cord:** 5-meter heavy-duty cable for extended reach in large living areas.
*   **Swivel Head:** 180° maneuverability for cleaning around furniture legs and

into tight corners.

3. Included Accessories
*   **Microfiber Pads (x2):** High-absorbency, triple-layer pads designed to lift and trap loosened dirt.
*   **Carpet Glider:** A clip-on frame that allows the mop to slide over low-pile rugs and carpets to refresh fibers and remove odors.
*   **Measuring Cup:** For precise, spill-free refilling of the internal reservoir.

4. Critical Floor Compatibility Warning
The SS-M10 uses high-heat moisture which can damage sensitive surfaces.
*   **Recommended:** Sealed ceramic tiles, porcelain, marble, and sealed laminate.
*   **NOT Recommended:** **Unsealed wood**, **waxed floors**, or highly porous stone. The heat may strip wax finishes or cause unsealed wood planks to warp and swell.
*   **Test Patch:** Always perform a 60-second test on an inconspicuous corner of the floor before proceeding with full-room cleaning.

5. Care & Maintenance
*   **Decalcification:** In areas with hard water, use distilled or demineralized water to prevent calcium scale from clogging the internal steam pump.
*   **Pad Care:** Microfiber pads are machine washable (up to 60°C). Do not use fabric softener or bleach, as this reduces the pads' dirt-trapping effectiveness.
*   **Storage:** Empty any remaining water from the tank after every use to prevent mold growth and mineral deposits. Store upright in a cool, dry place.

6. Safety Features
*   **Steam-on-Demand:** Trigger-controlled steam release prevents accidental moisture buildup when the unit is stationary.
*   **Thermal Cut-off:** Automatically disables the heating element if the water tank runs dry.

doc_id: HH-35
title: Product Detail Sheet — SecureNest Smart Lock SN-L2
doc_type: product
version: 1.0
last_updated: 2026-01-19

Product Detail Sheet — SecureNest Smart Lock SN-L2 (HH-35)

1. Overview
The **SecureNest SN-L2** is a premium biometric smart lock designed for high-security residential access in the UAE. Engineered for durability and ease of use, it replaces standard deadbolt or mortise systems to provide keyless entry for

modern HomeHaven households.

2. Technical Specifications & Unlock Methods
The SN-L2 offers four redundant entry methods to ensure you are never locked out:
* **Biometric Fingerprint:** High-resolution 3D semiconductor sensor (stores up to 50 unique prints). Recognition speed: < 0.5 seconds.
* **Touchscreen PIN:** Anti-peep keypad allows you to enter random digits before or after your real code to prevent shoulder surfing. (Stores up to 20 codes).
* **Mobile App Control:** Connect via **Bluetooth** within 10 meters to unlock, manage user permissions, and view entry logs through the HomeHaven App.
* **Physical Key Backup:** Includes 2 high-security mechanical override keys for emergency use.

3. Power & Battery Management
* **Power Source:** 4x AA Alkaline batteries (included).
* **Battery Life:** Typical usage lasts **6–9 months**. Battery performance may vary based on door alignment and frequency of motor engagement.
* **Low Battery Alert:** The unit will emit a series of audible beeps and a red light flash when power drops below 15%.
* **Emergency Jumpstart:** Features a **Micro-USB/USB-C emergency port** at the bottom of the exterior panel. If batteries die completely, a power bank can be used to provide temporary power for a PIN/Fingerprint entry.

4. Hardware & Compatibility
* **Door Thickness:** Fits standard doors ranging from **35mm to 55mm**.
* **Material:** Reinforced Zinc Alloy chassis with an electroplated anti-corrosion finish (suitable for indoor and climate-controlled hallway environments).
* **Mortise Type:** Compatible with most standard 60/72 mortise locks.

5. Professional Installation
While the SN-L2 includes a DIY mounting kit, HomeHaven recommends our **Professional Installation Service** to ensure perfect bolt alignment and prevent motor strain.
* **Installation Fee:** **AED 99** (covers mounting, strike plate adjustment, and app pairing).
* **Pre-Install Check:** Please refer to the **SN-L2 Installation Guide (HH-62)** to confirm your door material and lock-hole dimensions before booking.

6. Safety & Security Features
* **Auto-Lock:** Automatically engages the deadbolt 5 seconds after the door is closed (can be toggled off in settings).
* **Lockout Mode:** After 5 incorrect attempts, the keypad freezes for 3 minutes to prevent brute-force attacks.
* **Privacy Mode:** An internal "Do Not Disturb" switch disables all external electronic access (Fingerprint/PIN) from the inside.

title: Delivery — Edge Case FAQs
doc_type: faq
version: 1.0
last_updated: 2026-01-20

Delivery — Edge Case FAQs (HH-41)

1. Overview
To maintain the precision of our UAE logistics network, HomeHaven strictly enforces cut-off times. This document addresses common "Edge Case" scenarios where order timing or location may shift your expected delivery window.

2. Frequently Asked Questions

Q: I placed an order at 6:30 PM in Dubai. Is it still eligible for Next-Day delivery?
A: **No.** Our Standard Next-Day service for major cities (Dubai, Abu Dhabi, Sharjah) requires orders to be finalized by the **6:00 PM cut-off**. Orders placed at 6:30 PM will be processed the following morning and scheduled for delivery on the next available day (typically 48 hours from the original order time).

Q: I placed an Express order at 1:00 PM in Abu Dhabi. Can it be delivered same-day?
A: **No.** Express same-day delivery in Dubai and Abu Dhabi requires a strict **12:00 PM (Noon) cut-off** to allow for sorting and vehicle routing. Orders placed after 12:00 PM will shift to the next business day’s Express window or can be downgraded to Standard delivery upon request.

Q: Do you deliver on Sundays?
A: Our standard delivery operations run **Monday–Saturday**. Sunday is currently considered a non-operational day for our courier fleet. Any orders placed over the weekend (after Saturday 6:00 PM) will be dispatched on Monday for Tuesday arrival.

Q: What happens if I live in a "Remote Area" like Western Region (Ghayathi) or Hatta?
A: Remote areas do not follow the next-day major city rule. Deliveries to these locations typically occur on a **fixed weekly schedule** (e.g., Tuesdays and Thursdays). Please allow **3–5 business days** for these coordinates.

Q: My building has a 5:00 PM noise restriction for bulky items. Can you still deliver my dishwasher in the Evening Slot?
A: If your building management prohibits "Major Appliance" movement after 5:00 PM, you must select the **Morning (10:00–14:00)** or **Afternoon (14:00–18:00)** slots. If our team is turned away by security due to community rules, a **re-delivery fee (HH-54)** will apply.

3. Pro-Tips for Fast Fulfillment
* **The "Golden Hour":** Place orders before 4:00 PM to ensure ample time for payment verification and warehouse picking before the final 6:00 PM truck

departure.
*   **Payment Speed:** Orders paid via Credit Card or Apple Pay are verified instantly. **Cash on Delivery (COD)** orders may require a brief phone verification, which could push your order past the cut-off if you are unreachable.

---
doc_id: HH-42
title: Returns — Edge Case FAQs
doc_type: faq
version: 1.0
last_updated: 2026-01-22

Q: Can I return an item without the free gift included in the box?
A: Returns generally require all accessories and free gifts. Missing items may affect eligibility.

Q: I opened a consumable (spray/filter) and changed my mind. Can I return it?
A: Opened consumables are generally restricted unless defective.

Q: What if the serial number doesn’t match?
A: Returns may be refused if serial numbers do not match records.

---
doc_id: HH-43
title: Bundle Purchases — Return Handling
doc_type: policy
version: 1.0
last_updated: 2026-01-22

Bundle Purchases — Return Handling (HH-43)

1. Overview
HomeHaven frequently offers curated bundles—such as the "Smart Kitchen Starter" or "Full-Home Air Quality Pack"—at a discounted rate. Because these items are sold as a single promotional unit, specific return protocols apply to maintain the integrity of the discount provided.

2. General Return Policy for Bundles
*   **All-or-Nothing Rule:** To qualify for a full refund, customers must return **all individual components** included in the bundle. This includes any "Free Gifts," accessories, or secondary units (e.g., a spare filter pack included with an **AirPure AP-400**).
*   **Original Condition:** Every item within the bundle must meet the

"Shelf-Ready" criteria outlined in **HH-52** (unused, in original packaging, with all seals intact).
*   **Partial Returns:** Requests to return only one item from a bundle (e.g., keeping the blender but returning the toaster) are generally **not permitted**. Any exception to this rule requires manual approval from **Tier 2 Support** and may result in the forfeiture of the original bundle discount.

3. Refund Calculation & Logic
*   **Net Paid Amount:** Refunds are calculated based on the actual price paid at checkout after all promotional discounts, bundle-specific markdowns, and **HavenPlus** point redemptions are applied.
*   **Discount Forfeiture:** If a partial return is exceptionally approved, the remaining items you keep will be re-valued at their **Current Individual Retail Price**. The difference will be deducted from your refund total.
*   **Point Reconciliation:** As per **HH-26**, points earned on the entire bundle will be deducted upon return. If points were used to purchase the bundle, they will be restored to your account once the full return is processed.

4. Defective Items in a Bundle
*   **Individual Replacement:** If a single component of your bundle is found to be defective (e.g., the **PureBlend** motor fails but the accessories are fine), HomeHaven will replace only the faulty unit.
*   **Warranty:** The standard 1-year warranty (HH-51) applies to each serialized item within the bundle individually from the date of the original delivery.

5. Final Sale Bundles
Bundles marked as "Clearance" or "Final Sale" at the time of purchase are ineligible for change-of-mind returns, though statutory warranty rights for manufacturing defects remain unaffected.

---
doc_id: HH-44
title: Pricing Display and VAT Note (Scenario)
doc_type: reference
version: 1.0
last_updated: 2026-01-23

Pricing Display and VAT Note (HH-44)

1. Overview
At **HomeHaven**, we prioritize pricing transparency to ensure a seamless checkout experience for our UAE customers. All financial figures across our digital platforms and retail Experience Centers are presented in the local currency with mandatory tax inclusions as per federal regulations.

2. Currency and Display
*   **Local Currency:** All prices are displayed and transacted in **United Arab Emirates Dirhams (AED)**.

*   **Exchange Rates:** For customers using international cards, the final charged amount may fluctuate based on your issuing bank’s daily exchange rate and foreign transaction fees.

3. Value Added Tax (VAT)
In accordance with UAE Federal Tax Authority (FTA) regulations:
*   **Inclusive Pricing:** Product pages and shelf labels show **VAT-inclusive prices** (currently 5%) unless explicitly stated otherwise. The price you see on the product detail sheet (e.g., for the **PureBlend PB-900**) is the final price for the item.
*   **Tax Invoices:** A simplified or full Tax Invoice—detailing the specific VAT amount, the HomeHaven TRN (Tax Registration Number), and the subtotal—is issued for every transaction.
*   **Digital Access:** Your Tax Invoice is sent via email immediately upon order confirmation and remains accessible in the "Order History" section of the **HomeHaven App**.

4. Breakdown of Charges
While the product price includes VAT, the following may be listed as separate line items during the final checkout phase:
*   **Standard/Express Shipping Fees:** Subject to 5% VAT (included in the quoted shipping price).
*   **Installation Services:** Professional assembly or setup fees (e.g., **AED 149 for dishwashers**) include VAT.
*   **COD Convenience Fees:** The **AED 15** service charge for Cash on Delivery is a service fee and includes applicable VAT.

5. Commercial and Tax-Exempt Entities
*   **Business Purchases:** Corporate entities requiring a formal Tax Invoice with their own TRN must provide these details in the "Company Information" section at checkout.
*   **Tax Refunds:** HomeHaven does not currently participate in the "Tourist Tax Refund" scheme for in-store purchases. All sales are final regarding tax collection at the point of purchase.

doc_id: HH-45
title: Buying Guide — Choosing an Air Purifier
doc_type: buying_guide
version: 1.0
last_updated: 2026-01-17

Buying Guide — Choosing an Air Purifier (HH-45)

1. Overview
Indoor air quality in the UAE is impacted by seasonal dust storms, high humidity, and urban particulate matter. Selecting the right air purifier for your HomeHaven household requires balancing filtration efficiency with the specific volume of the

room to ensure consistent, clean airflow.

2. Core Considerations

Room Size Coverage (m²)
*   **The "Air Change" Rule:** For optimal health benefits, a purifier should be able to exchange the air in a room 4–5 times per hour.
*   **Sizing:** Always match the unit’s rated capacity to your largest open area. Using a small-room purifier in a large living hall will result in poor filtration and motor strain.

Filtration Technology
*   **HEPA-Style (H13):** Mandatory for capturing 99.97% of microscopic desert dust, pollen, and pet dander.
*   **Activated Carbon:** Essential for UAE kitchens and pet-owning homes to neutralize cooking odors, tobacco smoke, and Volatile Organic Compounds (VOCs).
*   **Pre-Filters:** A washable outer layer that traps hair and large lint, extending the life of the more expensive HEPA core.

Noise Levels & Placement
*   **Bedrooms:** Look for units with a "Sleep Mode" or noise ratings below 30dB.
*   **Placement:** Ensure the unit has at least 30cm of clearance on all sides. Placing a purifier against a wall or behind a sofa significantly reduces its intake efficiency.

Maintenance & Operating Costs
*   **Filter Availability:** Always verify that replacement filters (e.g., **AP-F400**) are readily available in-store or online.
*   **Replacement Frequency:** In the UAE, filters typically last 6–8 months. Budget for at least two filter changes per year to maintain the manufacturer's warranty.

3. HomeHaven Featured Model: AirPure AP-400
The AP-400 is our most versatile unit, balanced for the typical UAE apartment or villa bedroom.

*   **Coverage:** Up to **35 m²** (Ideal for master bedrooms or home offices).
*   **3-Stage Filtration:** Includes a primary mesh, H13 HEPA-style core, and high-density carbon layer.
*   **Smart Features:**
    *   **Auto Mode:** Uses a laser sensor to ramp up fan speed when dust is detected.
    *   **Sleep Mode:** Dims all lights and locks the fan to whisper-quiet low speed.
*   **Consumables:** Uses the **AP-F400 Replacement Pack** (HH-57).

4. Comparison Summary

| Feature | AP-400 (Standard) | AP-600 (Pro) |

| :--- | :--- | :--- |
Room Size	35 m²	65 m²
Filter Type	3-in-1 Integrated	5-Stage Medical Grade
Best For	Bedrooms / Offices	Living Rooms / Open Plans
App Control	Yes	Yes (plus Alexa/Google)

5. Buying Tip
If your home has high ceilings (above 3 meters), choose a model rated for 20% more floor area than your actual room size to compensate for the increased air volume.

---
doc_id: HH-46
title: AirPure AP-400 — Filter Replacement Steps
doc_type: howto
version: 1.0
last_updated: 2026-01-17

AirPure AP-400 — Filter Replacement Steps (HH-46)

1. Overview
To maintain the Air Quality Index (AQI) standards of your HomeHaven, the **AirPure AP-400** requires periodic filter replacement. Timely maintenance prevents motor strain and ensures that 99.97% of desert dust and household allergens are effectively trapped.

2. Identification: When to Replace
While the AP-400 features an intelligent "Filter Reset" indicator light, you should perform a manual inspection if you notice any of the following:
* **Persistent Odors:** The activated carbon layer is saturated and can no longer neutralize cooking or pet smells.
* **Reduced Airflow:** The HEPA-style core is clogged with fine particulate matter, causing the fan to sound louder while pushing less air.
* **Visual Discoloration:** The outer pre-filter has turned dark grey or black despite regular vacuuming.
* **Static Indicator:** The filter light remains illuminated even after a basic cleaning of the external grilles.

3. Step-by-Step Installation Guide

Step 1: Safety & Preparation
* **Power Down:** Press the Power button to turn off the unit.
* **Disconnect:** Unplug the power cord from the UAE wall socket. Never attempt a filter change while the unit is connected to electricity.

Step 2: Accessing the Core
* **Positioning:** Lay the unit on its side on a soft surface (like a rug) or turn it upside down.

*   **Compartment:** Locate the filter hatch at the base. Twist the locking knob counter-clockwise to release the safety cover.

Step 3: Extraction & Cleaning
*   **Removal:** Pull the old filter pack out by the fabric tabs.
*   **Disposal:** Place the old filter in a sealed bag immediately to prevent trapped dust from re-entering your room.
*   **Internal Wipe:** Use a dry microfiber cloth to wipe the internal sensor lens and the interior walls of the filter chamber.

Step 4: Installing the New AP-F400 Pack
*   **Packaging Warning:** **Crucial Step.** Remove all plastic wrapping from the new **AP-F400** filter. Failure to do so will cause the motor to overheat and potentially fail within minutes.
*   **Insertion:** Slide the new filter into the chamber with the tabs facing outward. Ensure it is seated flush against the internal gaskets.

Step 5: Finalizing & Reset
*   **Closure:** Replace the bottom cover and twist the knob clockwise until it clicks into the locked position.
*   **Power On:** Plug the unit back in and press Power.
*   **System Reset:** Press and hold the "Filter" or "Sleep" button (depending on your model revision) for **3–5 seconds** until the indicator light turns off or beeps.

4. Verification
Run the unit on "Turbo" mode for 5 minutes. Check the exhaust grille at the top to confirm strong, clean-smelling airflow and ensure the laser particle sensor is updating the LED color ring accurately.

5. Maintenance Pro-Tip
To extend the life of your new **AP-F400** pack, vacuum the outermost mesh layer of the filter every 2 weeks to remove large lint and pet hair. This allows the inner HEPA layer to focus solely on microscopic particles.

---
doc_id: HH-47
title: DustDash DD-VX2 — Maintenance Schedule
doc_type: maintenance
version: 1.0
last_updated: 2026-01-14

DustDash DD-VX2 — Maintenance Schedule (HH-47)

1. Overview
To maintain the high-velocity suction and 35-minute runtime of your **DustDash DD-VX2**, a consistent maintenance routine is essential. Given the fine nature of

desert dust in the UAE, these steps prevent motor overheating and ensure the longevity of the brushless digital system.

2. Weekly Maintenance: Performance Optimization

Perform these quick checks every 3–4 uses to prevent mechanical strain:

* **Dust Cup Clearance:** Empty the 0.6L dust bin once it reaches the "MAX" line. Operating a full bin reduces cyclonic separation efficiency and pushes dust into the secondary filters.
* **Intake Inspection:** Check the "V-Shape" floor head and the extension wand for blockages. Use a long, non-sharp object to clear any trapped debris (like large tissue fragments or plastic).
* **Brush Roll Detangling:** Hair and threads can wrap around the motorized brush. Use a pair of scissors to carefully snip along the designated groove on the roller to release hair and prevent bearing seize.

3. Monthly Maintenance: Deep Filtration Care

The DD-VX2 relies on its multi-stage HEPA-style filtration to maintain clean exhaust air.

* **Filter Rinse:** Remove the HEPA-style filter and rinse it under cold, low-pressure running water. Do not use soap, detergents, or a washing machine.
* **The 24-Hour Rule:** **Crucial Step.** Allow the filter to air-dry completely for at least **24 hours** in a well-ventilated area (away from direct UAE sunlight).
* **Warning:** Reinserting a damp or even slightly humid filter will cause irreversible motor damage and potentially create a persistent musty odor. This is considered "misuse" and is not covered under the standard warranty (HH-25).

4. Troubleshooting Performance Drops

If you notice a decrease in suction power or a shorter-than-expected battery runtime:

* **Mode Check:** Ensure the unit isn't accidentally locked in "Boost Mode" for hard floors. Switching to **Eco Mode** provides the optimal balance of power and a full 35-minute runtime for tiled surfaces.
* **Filter Integrity:** Inspect the filter for "caking." If the fine mesh is greyed out despite washing, the filter has reached its capacity. Replace it with a genuine **DD-FLT2** pack.
* **Battery Calibration:** If the runtime is inconsistent, perform a full discharge followed by an uninterrupted 5-hour charge cycle to recalibrate the Lithium-Ion cells.

5. Annual Checklist

* **Battery Replacement:** If the total runtime in Eco mode drops below 15 minutes after 12 months of daily use, consider purchasing a replacement **DD-BAT2** battery.
* **Seal Inspection:** Check the rubber gaskets around the dust cup lid. If they appear dry or cracked, wipe them with a tiny amount of silicone grease to maintain the airtight vacuum seal.

---
doc_id: HH-48
title: SteamShine SS-M10 — Floor Safety Notes
doc_type: safety
version: 1.0
last_updated: 2026-01-14

SteamShine SS-M10 — Floor Safety Notes (HH-48)

1. Overview
The **SteamShine SS-M10** uses high-temperature pressurized steam (110°C) to sanitize and lift grime. Because heat and moisture can affect different materials uniquely, adhering to these safety notes is essential to prevent warping, clouding, or permanent damage to your home’s flooring.

2. Approved & Safe Surfaces
The SS-M10 is optimized for hard, non-porous surfaces that are professionally sealed:
*   **Ceramic & Porcelain Tiles:** Ideal for high-heat steam; excellent for cleaning grout lines.
*   **Sealed Hardwood:** Safe only if the finish is intact with no visible gaps between planks. Use the "Low Steam" setting if available.
*   **Sealed Laminate:** Use with caution. Ensure the laminate is rated for steam cleaning by the manufacturer; excessive moisture can cause "peaking" at the joints.
*   **Polished Stone (Marble/Granite):** Safe for sealed stone. High-frequency use on unsealed stone may dull the natural luster over time.

3. Surfaces to Avoid (High Risk)
Do not use the SS-M10 on the following surfaces, as steam can cause immediate and irreversible damage:
*   **Unsealed Wood:** Steam will penetrate the wood fibers, causing them to swell, warp, or grow mold.
*   **Waxed or Polished Floors:** The high temperature will melt the wax or polish, leaving a cloudy, sticky residue and stripping the protective layer.
*   **Luxury Vinyl Planks (LVP) / Vinyl Tiles:** Some vinyl adhesives are heat-sensitive; check your flooring warranty before use as steam may cause the planks to lift.
*   **Delicate Surfaces:** Silk rugs, velvet upholstery, or any "Dry Clean Only" fabrics.

4. Professional Testing Protocol
*   **The "Hidden Corner" Test:** Before cleaning a visible area, apply steam to a small, inconspicuous section (e.g., behind a door or under a sofa) for **60 seconds**.
*   **Post-Test Inspection:** Wait for the area to dry completely. Check for any swelling, discoloration, loss of shine, or texture changes before proceeding with the rest of the room.

5. Operational Safety Tips

*   **Continuous Motion:** Never leave the steam mop stationary in one spot while the steam is engaged. Constant heat concentration in a single area can "burn" or cloud the floor finish.
*   **Pad Saturation:** Once the microfiber pad is fully saturated with water and dirt, replace it with a fresh one. A soaking wet pad can leave excess moisture in floor joints.
*   **Cool Down:** After use, remove the damp pad immediately and allow the mop head to cool on a non-heat-sensitive surface (like a tiled balcony or laundry room floor).

---
doc_id: HH-49
title: CrispWave CW-AF55 — Quick Cooking Tips
doc_type: tips
version: 1.0
last_updated: 2026-01-14

CrispWave CW-AF55 — Quick Cooking Tips (HH-49)

1. Overview
The **CrispWave CW-AF55** utilizes 360° Rapid Air Technology. Following these specialized tips ensures optimal texture, flavor, and longevity of your appliance in a high-performance household setting.

2. Professional Cooking Techniques
*   **Preheating Protocol:** Always preheat the unit at 200°C for 3–5 minutes. A hot basket ensures immediate searing of proteins and superior "crisp" on frozen goods.
*   **Aeration Spacing:** Avoid overfilling the basket. For meat and poultry, maintain a single layer with at least 1cm of space between items to allow unobstructed high-velocity airflow.
*   **The "Mid-Cycle Shake":** For fries, nuggets, or roasted vegetables, remove and shake the basket halfway through the timer. This redistributes oils and prevents "soft spots" caused by steam trapped between layers.
*   **Dry to Fry:** Pat proteins (like chicken skin or fish) completely dry with a paper towel before seasoning. Any surface moisture will create steam instead of a crisp crust.

3. Recommended Settings for Common Items

Item	Temperature	Time	Tip
Home Fries	200°C	15–20 mins	Soak in cold water for 30 mins first to remove starch.
Chicken Wings	180°C	12–15 mins	Spray lightly with oil for a

"deep-fried" finish. |
| **Vegetables** | 190°C | 8–10 mins | Toss in a bowl with seasoning before adding to the basket. |
| **Frozen Snacks** | 200°C | 6–10 mins | No extra oil required. |

4. Maintenance & Care
*   **Thermal Shock Prevention:** Always let the basket cool to room temperature before exposing it to water. Sudden temperature shifts can cause the metal to warp or the non-stick coating to flake.
*   **Manual Cleaning:** While the basket may be labeled dishwasher-safe, **hand washing** with a soft sponge and non-abrasive detergent is strongly recommended to preserve the premium non-stick surface for the long term.
*   **Heating Element Care:** Periodically check the top heating coil for grease splatter. If dirty, wipe with a damp cloth only once the unit is completely unplugged and cold.

5. Safety Notes
*   **External Clearances:** Maintain at least 15cm of open space behind the exhaust vent during operation to prevent overheating and wall discoloration.
*   **Paper Liners:** Never add parchment paper or liners while preheating; the air suction can pull them into the heating element, posing a fire risk.

---
doc_id: HH-50
title: PureBlend PB-900 — Safety & Overheating Prevention
doc_type: safety
version: 1.0
last_updated: 2026-01-14

PureBlend PB-900 — Safety & Overheating Prevention (HH-50)

1. Overview
The **PureBlend PB-900** features a high-torque 900W motor designed for rapid emulsification. Due to its high-speed operation, strict adherence to safety and thermal management protocols is required to prevent motor burnout and ensure user safety in the kitchen.

2. Safety Reminders
*   **Dual-Lock Lid Security:** Ensure the lid is pressed down firmly and the locking tabs are engaged. The PB-900 utilizes a safety interlock; the blades will not spin unless the sensor detects a seated lid.
*   **Thermal Expansion Warning:** **Do not blend boiling or carbonated liquids.** Steam buildup creates extreme internal pressure, which can cause the lid to eject or the pitcher to crack, leading to severe burn injuries.
*   **Mechanical Safety:** Keep hands, hair, and kitchen utensils (spatulas, spoons) away from the pitcher while the motor is engaged. Only use the provided tamper through the lid opening if the motor is at a complete stop.

*   **Stable Base:** Ensure the suction-cup feet are secured to a dry, flat surface before operation to prevent "walking" during high-speed cycles.

3. Overheating Prevention & Duty Cycle
To protect the motor’s internal copper windings and extend the life of the appliance, follow the **60/120 Rule**:

*   **Maximum Run Time:** Do not run the blender continuously for more than **60 seconds**.
*   **Mandatory Cooling Interval:** Allow the motor to rest for at least **2 minutes** between cycles.
*   **Heavy Loads:** When processing thick mixtures (e.g., nut butters or frozen açaí), reduce the continuous run time to **30 seconds** to prevent the Thermal Overload Protector (TOP) from tripping.
*   **Tripped Reset:** If the unit shuts off automatically, unplug it immediately. Wait **30 minutes** for the internal components to cool before pressing the "Reset" button located on the base.

4. Operational Best Practices
*   **Liquid-First Loading:** To reduce motor strain, always add liquid ingredients first, followed by soft solids, and finish with ice or frozen items on top.
*   **Pulse vs. Continuous:** Use the "Pulse" function for initial breakdown of large chunks. This prevents the blades from jamming and reduces the initial torque load on the motor.
*   **Blade Inspection:** Check the underside of the blade assembly regularly for signs of wear or leakage. If the bearing becomes stiff, stop use immediately to avoid overheating the drive socket.

---
doc_id: HH-51
title: Warranty Note — Batteries, Filters, and Wear Items
doc_type: reference
version: 1.0
last_updated: 2026-01-18

Warranty Note — Batteries, Filters, and Wear Items (HH-51)

1. Overview
This reference guide clarifies the distinction between manufacturing defects and "Consumable Components" or "Wear Items." While HomeHaven products are built for durability, certain parts are designed to be replaced periodically to maintain peak performance.

2. Classification of Wear Items
The following components are subject to natural degradation based on usage

frequency and environmental factors. These are generally excluded from standard long-term warranty coverage unless a defect is present at the time of purchase:

* **Filtration Systems:** HEPA filters, foam pre-filters, and carbon odor filters. These become clogged over time and require replacement to prevent motor strain.
* **Mechanical Agitators:** Vacuum brush rolls, side brushes, and floor nozzles. Bristles naturally wear down or lose stiffness through friction with floor surfaces.
* **Energy Storage (Batteries):** Lithium-ion and NiMH batteries. A gradual decline in runtime (capacity) is a chemical characteristic of the technology and is not considered a manufacturing defect unless the battery fails entirely within the first 6 months.
* **Contact Surfaces:** Rubber seals, gaskets, and non-stick coatings. These may degrade due to heat exposure, cleaning chemicals, or mechanical abrasion.

3. Warranty Coverage vs. Maintenance

What is Covered
* **Pre-existing Defects:** A battery that does not hold a charge out of the box.
* **Structural Failure:** A brush roll housing that snaps due to a plastic molding flaw.
* **Electronic Malfunction:** A filter-monitoring sensor that fails to detect a new filter.

What is Not Covered
* **Reduced Runtime:** A vacuum battery that lasts 15 minutes instead of 20 after one year of daily use.
* **Odors & Clogs:** Filters that have reached their dust capacity or developed odors due to moisture.
* **Friction Wear:** Smooth or thinning bristles on a cleaning brush after regular use on abrasive surfaces.

4. Maintenance Obligations
To keep the primary product warranty (on motors or structural frames) valid, customers must:
1. **Use Genuine Parts:** Only use HomeHaven-certified filters and batteries. Use of third-party consumables that damage the main unit will void the overall warranty.
2. **Regular Cleaning:** Clear hair and debris from brush rolls weekly to prevent bearing seize.
3. **Proper Storage:** Store battery-operated devices in a cool, dry place; extreme heat (e.g., inside a car in the UAE summer) accelerates battery degradation and is considered "misuse."

---

doc_id: HH-52
title: Returns — Methods Overview (Courier vs In-Store)
doc_type: reference
version: 1.0
last_updated: 2026-01-22

Returns — Methods Overview: Courier vs. In-Store (HH-52)

1. Overview
HomeHaven provides flexible return options for our UAE customers. Whether you prefer the convenience of a home pickup or the immediate resolution of an in-store visit, our goal is a seamless reversal of your purchase within our **30-day eligibility window**.

2. Return Methods

Courier Pickup (Home/Office)
*   **Availability:** Serviceable across all seven Emirates, including major residential hubs and remote areas.
*   **Booking:** Initiated via the "My Orders" section on the HomeHaven app or website.
*   **Fees:**
    *   **Defective/Wrong Item:** Pickup is **Free of Charge**.
    *   **Change-of-Mind:** A flat-rate courier fee (typically AED 25–50 depending on item size) will be deducted from your final refund.
*   **Process:** Our logistics partner will contact you within 24–48 hours to coordinate a 4-hour pickup window.

In-Store Returns (Drop-off)
Visit any of our flagship Experience Centers for an immediate inspection and refund processing.
*   **Dubai:** Al Quoz Industrial Area 3 (Main Warehouse & Showroom).
*   **Abu Dhabi:** Al Khalidiya, Zayed the First St.
*   **Sharjah:** Al Majaz 2, Corniche St.
*   **Benefit:** No shipping fees apply to in-store returns, regardless of the reason for return.

3. Eligibility & Condition Requirements
To ensure a successful return, all items must meet the following "Shelf-Ready" criteria:
*   **Original Packaging:** Items must be returned in their original, undamaged branded box with all internal protective styrofoam/cardboard.
*   **Unused Status:** Products must show no signs of assembly, usage, or wear. For hygiene reasons, opened cleaning solutions or used vacuum filters cannot be returned.
*   **Documentation:** A digital or physical copy of the **Tax Invoice** must be presented.
*   **Inclusions:** All accessories, manuals, and promotional "free gifts" must be included in the return package.

4. Refund Timelines
*   **Credit/Debit Card:** 7–14 business days (depending on your bank’s processing time).
*   **Tabby/Tamara:** Installment adjustments are usually reflected within 5 business days.
*   **Store Credit:** Issued immediately upon successful inspection (valid for 12 months).

---
doc_id: HH-53
title: Refund Methods and Timing (Scenario)
doc_type: policy
version: 1.0
last_updated: 2026-01-22

Refund Methods and Timing (HH-53)

1. Overview
This policy outlines the standard operating procedures for issuing refunds following a successful product inspection. Timelines and methods are dictated by the original payment channel used during the transaction at **HomeHaven**.

2. Refund Scenarios by Payment Method

Credit & Debit Card Payments (Online/In-Store)
*   **Method:** Reversal to the original card used.
*   **Timing:** Typically **5–12 business days** after the return has been inspected and approved at our Al Quoz hub.
*   **Note:** The exact posting date depends on your issuing bank’s internal processing cycles.

Cash on Delivery (COD)
As physical cash cannot be "reversed" via courier, customers may select one of the following:
*   **Bank Transfer:** Funds are wired to a UAE-based IBAN provided by the customer.
    *   **Timing:** 7–10 business days.
*   **HomeHaven Store Credit:** A digital voucher code sent via SMS/Email.
    *   **Timing:** Instant (24 hours maximum).

Buy Now, Pay Later (Tabby / Tamara)
*   **Method:** Adjustment of the remaining installment plan.
*   **Scenario A (Partial Return):** Your remaining installments will be reduced or

cancelled.
*   **Scenario B (Full Return):** Any paid installments are refunded to your card by the provider, and the plan is closed.
*   **Timing:** 3–5 business days for the provider to update their ledger.

3. Inspection & Approval Phase
Before a refund is triggered, all items undergo a **Quality Control (QC) Check**:
1. **Arrival:** Item arrives at the Service Center.
2. **Verification:** Technicians confirm the item is unused, in original packaging, and matches the serial number on the invoice.
3. **Authorization:** Once "QC Passed," the Finance Team initiates the payout within 24 hours.

4. Important Limitations
*   **Shipping & COD Fees:** Original delivery charges and COD service fees (AED 15) are **non-refundable** unless the return is due to a HomeHaven error or a manufacturing defect.
*   **Bank Holidays:** Timelines exclude UAE Public Holidays and weekends (Saturday/Sunday).
*   **International Cards:** Refunds to non-UAE issued cards may take up to 21 business days due to intermediary bank clearing.

doc_id: HH-54
title: Scheduled Delivery for Bulky / Installed Items
doc_type: policy
version: 1.0
last_updated: 2026-01-20

Scheduled Delivery for Bulky / Installed Items (HH-54)

1. Overview
To ensure the safe transport and professional setup of large-scale HomeHaven products, we provide specialized **Scheduled Delivery & Installation** services. This policy outlines the logistics framework for items that require two-person handling or specialized technical integration into the home environment.

2. Applicability
Scheduled Delivery is mandatory for the following categories:
*   **Major Appliances:** Refrigerators, washing machines, and dryers.
*   **Integrated Units:** Built-in dishwashers, hobs, and ovens requiring cabinetry fitting.
*   **Large Furniture:** Dining sets, sofas, and heavy-duty shelving units.
*   **Smart-Home Systems:** Wall-mounted displays or interconnected security hubs.

3. Delivery Slot Options

Customers can select their preferred 4-hour window via the HomeHaven App or through our Logistics Coordinator:
*   **Morning Slot:** 10:00 – 14:00
*   **Afternoon Slot:** 14:00 – 18:00
*   **Evening Slot:** 18:00 – 22:00
*   *Note: Evening slots may be subject to community noise-restriction policies.*

4. Pre-Delivery Checklist (Customer Responsibility)
To avoid failed delivery attempts or installation delays, customers must ensure the following:
*   **Building Access:** Secure necessary Move-In Permits (MIP) or Gate Passes from building management/security in advance.
*   **Service Elevator:** Ensure elevator access is available for the selected slot; our teams are not permitted to carry bulky items beyond the second floor via stairs.
*   **Clear Pathway:** Remove rugs, delicate decor, or small furniture that may obstruct the path from the entrance to the designated room.
*   **Utility Readiness:** For appliances, ensure power outlets, water inlets, and drainage points are within 1.5 meters of the installation site and meet UAE electrical standards.

5. Rescheduling & No-Show Policy
*   **Cancellations:** Must be made at least **24 hours** prior to the scheduled slot to avoid a re-delivery fee of AED 50.
*   **Late Arrival:** Our team will wait for a maximum of **20 minutes** at the location. If the customer is unreachable, the item will return to the Al Quoz warehouse, and a re-delivery charge will apply.

title: Missed Delivery — What Happens Next
doc_type: faq
version: 1.0
last_updated: 2026-01-20

Missed Delivery — What Happens Next (HH-55)

1. Overview
At **HomeHaven**, we strive to get your household essentials to you on the first try. However, when a delivery attempt fails due to customer unavailability or access issues, the following protocols apply to ensure your items are eventually secured.

2. Frequently Asked Questions

Q: What happens if I miss my delivery?
A: Our courier partner will attempt to contact you via the phone number provided at checkout. If they cannot reach you or gain access to the premises (e.g., restricted villa gate or no building security clearance), the shipment will be returned to our local sorting hub.

Q: Is there a fee for re-delivery?
A: For standard parcels, the first re-delivery attempt is free. Subsequent attempts or re-scheduling for bulky/installed items (after a "No-Show") will incur a flat **AED 20** re-delivery fee to cover additional logistics costs.

Q: How can I avoid a missed delivery?
A:
* **Be Reachable:** Ensure your primary UAE mobile number is active and the ringer is on during your selected window.
* **Permits:** Arrange all necessary **Move-In Permits (MIP)** or Gate Passes with your building management (especially in communities like Downtown Dubai, Marina, or Reem Island).
* **Alternative Drop-off:** If you won't be home, you can authorize the courier via SMS to leave the package with "Building Security" or "Reception" (at your own risk).

Q: Can I change my delivery address last minute?
A: Address changes can be made up to **12 hours** before the delivery window starts. Once the vehicle has departed the Al Quoz warehouse, any change of location will result in a failed attempt and a scheduled re-delivery for the following day.

3. Storage Policy
* **Hold Period:** If we are unable to reach you for **5 consecutive days**, the order will be automatically cancelled.
* **Refunds on Cancellation:** A refund will be processed back to your original payment method, minus any applicable shipping or "No-Show" fees.

4. Tracking Your Driver
You can view the real-time status of your delivery via the **HomeHaven App**. Once the driver is "En Route," you will receive a direct link to track their GPS location and see your estimated "Stops Away."

doc_id: HH-56
title: Address Requirement — No P.O. Boxes
doc_type: reference
version: 1.0
last_updated: 2026-01-20

Address Requirement — No P.O. Boxes (HH-56)

1. Overview
To ensure the successful hand-to-hand delivery of household goods and appliances, **HomeHaven** requires a precise physical location. This policy outlines our addressing standards to prevent shipping delays or lost consignments within the UAE.

2. Addressing Standards

Physical Address Requirement
*   **No P.O. Boxes:** We do **not** deliver to P.O. Box addresses. Our courier partners require a physical street address to complete the "last-mile" delivery and obtain a proof-of-delivery (POD) signature.
*   **Building/Villa Details:** Customers must provide a complete address including:
    *   Villa/Apartment Number
    *   Building Name / Street Name
    *   Area/District (e.g., Jumeirah 1, Khalifa City, Al Majaz)
    *   City (Emirate)

Contact Information
*   **Mandatory Phone Number:** A valid UAE mobile number (+971) is required for every order. Couriers will call or WhatsApp prior to arrival to confirm the sub-location or gate access.
*   **Alternative Contact:** For gated communities or high-security buildings, providing a secondary number (e.g., spouse or household staff) is highly recommended.

3. Why Physical Addresses are Required
*   **Signature Verification:** Most HomeHaven items (especially high-value electronics) require a recipient signature upon delivery.
*   **Bulky Item Handling:** Large appliances require specific entry points (service elevators/loading docks) that cannot be serviced via a central post office box.
*   **Real-Time Tracking:** Our GPS-linked tracking system relies on coordinates to provide "Stops Away" updates to the customer.

4. Incorrect Address Protocol
*   **Correction Window:** If you realize a P.O. Box or incorrect address was provided, contact **Customer Care** within **2 hours** of placing the order.
*   **Return to Hub:** Shipments addressed solely to a P.O. Box will be flagged by our sorting facility and held at the Al Quoz hub until a physical address is verified.
*   **Storage Fees:** If a physical address is not provided within **48 hours** of the hold, the order may be cancelled, and a restocking fee may apply.

doc_id: HH-57
title: Product Detail Sheet — AirPure Air Purifier AP-400
doc_type: product
version: 1.0
last_updated: 2026-01-17

Product Detail Sheet — AirPure Air Purifier AP-400 (HH-57)

1. Overview
The **AirPure AP-400** is a high-performance atmospheric filtration system designed for UAE households. Engineered for desert environments, it specifically targets fine dust (PM2.5), seasonal pollens, and common household odors through a triple-stage purification process.

2. Technical Specifications & Highlights
*   **Effective Coverage Area:** Optimized for rooms up to **35 m²** (approx. 375 sq. ft.). Ideal for master bedrooms, mid-sized living areas, and home offices.
*   **Clean Air Delivery Rate (CADR):** 260 m³/h.
*   **Noise Levels:**
    *   **Sleep Mode:** <25 dB (Whisper-quiet for night use).
    *   **Turbo/Auto:** Max 52 dB.
*   **Power Consumption:** 45W Energy-Efficient DC Motor.
*   **Sensor Technology:** Integrated Laser Dust Sensor for real-time air quality monitoring (displayed via LED color ring: Blue/Green/Orange/Red).

3. Filtration System
The AP-400 utilizes a 3-in-1 integrated drum filter for maximum surface area exposure:
1. **Fabric Pre-filter:** Captures large particles such as pet hair, lint, and large dust fibers. (Washable/Vacuumable).
2. **H13 HEPA-Style Filter:** Traps 99.97% of airborne particles as small as 0.3 microns, including smoke and microscopic allergens.
3. **Activated Carbon Layer:** Neutralizes VOCs (Volatile Organic Compounds), cooking smells, and formaldehydes.

4. Operational Modes
*   **Auto Mode:** Automatically adjusts fan speed based on detected particulate matter (PM2.5) levels.
*   **Sleep Mode:** Dims all display lights and locks the fan to the lowest speed setting for undisturbed rest.
*   **Timer Function:** Programmable 2h, 4h, and 8h shut-off intervals.

5. Maintenance & Support
Filter Replacement
*   **Replacement Pack:** **AP-F400** (Genuine HomeHaven multi-layer filter).
*   **Life Expectancy:** 6–8 months depending on air quality and usage. The "Filter Reset" indicator will flash when a change is required.

Critical Setup Note (New Units)
*   **Plastic Removal:** Upon unboxing, you must open the bottom hatch, remove the filter, and **take off the protective plastic packaging**. Operating the unit with the plastic on will cause motor overheating and zero filtration.

Troubleshooting
*   **Weak Airflow:** Check if the intake grilles are blocked by curtains/furniture. Ensure the pre-filter is vacuumed (recommended every 2 weeks).
*   **Unusual Noise:** Ensure the unit is on a level surface and no foreign objects have fallen through the top exhaust grille.
*   **Odors Persist:** If the unit emits a "sour" smell, the carbon layer is saturated; replace the filter immediately.

doc_id: HH-58
title: Product Detail Sheet — ClimateCare Thermostat CC-T1
doc_type: product
version: 1.0
last_updated: 2026-01-14

Product Detail Sheet — ClimateCare Thermostat CC-T1 (HH-58)

1. Overview
The **ClimateCare CC-T1** is a precision smart-climate controller designed to optimize cooling efficiency in UAE residences. By integrating advanced scheduling with real-time environmental sensing, the CC-T1 reduces energy consumption during peak summer months while maintaining a consistent comfort profile.

2. Key Features & Highlights
*   **Intelligent Scheduling:** Programmable 7-day cycles with up to 6 setpoints per day (e.g., Wake, Leave, Return, Sleep).
*   **Eco-Automation:** One-touch "Eco Mode" adjusts the setpoint to the most energy-efficient temperature (typically 24°C) when the home is unoccupied.
*   **Remote Management:** Full control via the **HomeHaven App**. Monitor home temperature and adjust cooling from anywhere.
*   **Precision Sensing:** Humidity and temperature sensors calibrated to ±0.5°C accuracy.

3. Connectivity & Requirements
*   **Network:** Compatible with **2.4GHz Wi-Fi** bands only. (Will not connect to 5GHz-only SSIDs).
*   **Power:** Requires a **C-Wire (Common Wire)** or a compatible 24V power adapter for continuous operation.
*   **HVAC Compatibility:**
    *   **Supported:** Most centralized AC systems, heat pumps, and multi-stage

cooling (2C/2H).
    *   **Not Supported:** High-voltage line systems (110V/220V), proprietary communicating thermostats, or certain district cooling (Chiller) valve actuators without a relay interface.

4. Installation & Setup
*   **Professional Recommendation:** Due to the complexity of HVAC wiring and the risk of short-circuiting the control board, **professional installation is strongly recommended**.
*   **In-App Guide:** For DIY users, the app provides a step-by-step wiring terminal map based on your existing thermostat's wire colors.
*   **Mounting:** Includes a trim plate to cover holes or paint gaps from older, larger horizontal thermostats.

5. Maintenance & Support
*   **Firmware Updates:** Ensure the device remains connected to Wi-Fi to receive automatic "Over-the-Air" (OTA) security patches and feature enhancements.
*   **Calibration:** If the displayed temperature differs from a reference thermometer, use the "Temperature Offset" feature in the Advanced Settings menu.
*   **Battery Backup:** Internal coin-cell battery retains clock and schedule settings during brief power outages.

doc_id: HH-59
title: Product Detail Sheet – BrewBuddy Coffee Maker BB-CM125
doc_type: product
version: 1.0
last_updated: 2026-01-14

Product Detail Sheet – BrewBuddy Coffee Maker BB-CM125 (HH-59)

1. Overview
The **BrewBuddy BB-CM125** is a classic drip-filtration coffee system designed for high-capacity household brewing. Engineered for reliability and ease of use, it delivers consistent extraction for up to 10–12 cups of coffee per cycle.

2. Technical Specifications & Highlights
*   **Brewing Capacity:** **1.25L** High-Borosilicate Glass Carafe (Impact and heat resistant).
*   **Keep Warm Function:** Integrated non-stick warming plate maintains optimal serving temperature (75°C–80°C) for up to **40 minutes** before automatic safety shut-off.
*   **Extraction System:** Multi-hole showerhead ensures even saturation of coffee grounds for a balanced flavor profile.
*   **Anti-Drip Valve:** "Pause-and-Serve" feature allows for pouring a cup mid-brew by temporarily sealing the filter basket for up to 30 seconds.

3. Included Accessories
*   **Washable Permanent Filter:** High-density nylon mesh filter included. Eliminates the need for disposable paper filters (though Size 4 paper filters may be used for a cleaner, sediment-free cup).
*   **Measuring Scoop:** Standardized 7g scoop for consistent dosing.
*   **Removable Filter Basket:** Easy-lift handle for quick disposal of used grounds and thorough cleaning.

4. Operational Guidelines
*   **Coffee Type:** **Works with medium-grind ground coffee only.** This unit is not compatible with capsules, pods, or whole beans (requires a separate grinder).
*   **Water Level:** Use the transparent water window to monitor levels. Do not exceed the "MAX" line to prevent overflow during the boiling phase.
*   **Initial Setup:** Before first use, run two full brewing cycles with plain water (no coffee) to sterilize the internal plumbing.

5. Care & Maintenance
*   **Descaling:** In regions with hard water (common in some UAE districts), descale the unit every 60 uses using a 50/50 white vinegar and water solution to prevent calcium buildup on the heating element.
*   **Cleaning:**
    *   **Carafe & Filter:** Dishwasher safe (top rack only), though hand washing is recommended to prevent glass etching.
    *   **Housing:** Wipe the exterior with a damp cloth only. Never submerge the base unit in water.
*   **Safety:** Always unplug the unit when the water reservoir is empty or when the device is not in use for extended periods.

title: Cash on Delivery — FAQs
doc_type: faq
version: 1.0
last_updated: 2026-01-23

Cash on Delivery — FAQs (HH-60)

1. Overview
While HomeHaven encourages digital payments for a contactless experience, we offer **Cash on Delivery (COD)** to provide flexibility for our UAE customers. This document addresses common queries regarding the handling of physical currency during the delivery process.

2. Frequently Asked Questions

Q: Is Cash on Delivery available everywhere?
A: COD is available for most residential areas across the UAE. However, it may be restricted based on:
*   **Order Value:** Maximum limit of **AED 5,000** per transaction.
*   **Location:** Certain remote or "off-shore" locations may require pre-payment.
*   **Service Fee:** A non-refundable convenience fee of **AED 15** is applied to all COD orders to cover additional logistics handling.

Q: Can I pay by card at the door?
A: **Not guaranteed.** While some of our last-mile partners carry mobile POS terminals, network connectivity and hardware availability vary by route. To ensure a successful transaction via Credit/Debit card, we strongly recommend paying at the online checkout.

Q: Should I prepare exact change?
A: **Yes.** Our couriers carry limited "float" for security reasons. Providing the exact amount in UAE Dirhams (AED) significantly speeds up the delivery process and ensures the driver can move to the next scheduled stop on time.

Q: Can I open the box before paying the courier?
A: No. Our "Open-Box" policy only applies after the payment is collected. If the item is found to be damaged or incorrect after payment, please follow the **Standard Return Process (HH-52)** for a full refund or exchange.

Q: What happens if I don't have the cash ready when the driver arrives?
A: The driver will wait for a maximum of 10 minutes. If payment cannot be made, the delivery will be marked as "Failed" and returned to the hub. A re-delivery fee may apply for the second attempt.

3. Refund Policy for COD
*   **Returns:** Refunds for items purchased via COD are issued via **Bank Transfer** (7-10 days) or **HomeHaven Store Credit** (Instant).
*   **Cash Refunds:** Under no circumstances will our drivers or retail stores issue physical cash refunds for online COD orders.

doc_id: HH-61
title: HavenPlus Rewards — FAQs
doc_type: faq
version: 1.0
last_updated: 2026-01-16

HavenPlus Rewards — FAQs (HH-61)

1. Overview

HavenPlus is the official loyalty program for HomeHaven UAE. Members earn points on every qualifying purchase, which can be converted into significant savings on future household essentials and smart-home upgrades.

2. Frequently Asked Questions

Q: When do I receive my HavenPlus points?
A: Points are automatically credited to your "Member Dashboard" once an order is officially marked as **Delivered** (for courier shipments) or **Picked Up** (for Click & Collect). For in-store purchases, points are updated within 2 hours of the transaction.

Q: How do I redeem my points for discounts?
A: You can convert points into "HomeHaven Credit" at the online checkout or via the mobile app.
* **Conversion Rate:** **500 points = AED 25** discount.
* **Incremental Rule:** Redemptions must be made in fixed increments of 500 (e.g., 500, 1000, 1500 points).

Q: Do HavenPlus points expire?
A: **Yes.** Points are valid for **12 months** from the date they were earned. We operate on a "Rolling Expiry" basis, meaning only the points earned in a specific month will expire a year later, rather than the entire balance.

Q: Do I earn points on every part of my order?
A: Points are earned on the net product value (after discounts). You **do not** earn points on:
* Standard or Scheduled Delivery fees.
* Professional Installation charges.
* Cash on Delivery (COD) service fees.
* Extended Warranty plan purchases.

Q: Can I share my points with friends or family?
A: No. Points are non-transferable and are tied to the unique Email/Mobile Number used at registration.

Q: What happens to my points if I return an item?
A: If a product is returned for a refund, the points earned from that specific item will be automatically deducted from your HavenPlus balance. If your balance is zero, the equivalent value (AED 0.05 per point) will be deducted from your refund total.

3. Membership Tiers
* **Silver:** Entry level (0–5,000 points annually).
* **Gold:** 1.5x points multiplier + Early access to Seasonal Sales.
* **Platinum:** 2x points multiplier + Free Scheduled Delivery on all bulky items.

title: Booking Installation — What to Expect
doc_type: howto
version: 1.0
last_updated: 2026-01-19

Booking Installation — What to Expect (HH-62)

1. Overview
At **HomeHaven**, we provide professional installation services for complex household appliances and smart-home essentials. This guide outlines the booking process and the technical prerequisites required to ensure a successful first-time setup by our certified technicians.

2. Booking Process
*   **Checkout Selection:** Installation services can be added directly to your cart for eligible items (e.g., built-in appliances, smart locks, or wall-mounted systems).
*   **Scheduling:** Once your order is confirmed, our Coordination Team will contact you within **24 hours** to align your installation slot with your delivery window.
*   **Combined Service:** For bulky items, we aim for "Deliver & Install" on the same visit to minimize disruption to your schedule.

3. Mandatory Site Requirements
To avoid installation failure, the following must be ready prior to the technician's arrival:
*   **Access & Permits:** Ensure the technician has building entry permission and access to the service elevator.
*   **Utility Readiness (Appliances):**
    *   **Dishwashers/Washers:** Active water inlet (threaded valve), dedicated drainage pipe, and a grounded EU-standard power socket within 1.5 meters.
    *   **Ovens/Hobs:** Proper cabinetry cut-outs (refer to the product’s spec sheet) and high-load electrical wiring.
*   **Infrastructure (Smart Home):**
    *   **Smart Locks:** Compatible door thickness (35mm–55mm) and existing mortise compatibility.
    *   **Thermostats:** Active C-Wire or 24V interface as specified in **HH-58**.
*   **Connectivity:** For smart devices, ensure your **2.4GHz Wi-Fi** password is available for the initial pairing and testing phase.

4. Standard Installation Fees
Fees cover labor, basic mounting hardware, and post-install testing. Custom modifications (e.g., cutting granite or rewiring walls) are not included.
*   **Dishwasher (DW60 Series):** AED 149
*   **Washing Machine (WM Series):** AED 129

*   **Smart Door Lock (SN-L2):** AED 99
*   **Smart Thermostat (CC-T1):** AED 79

5. Failed Appointment & Revisit Policy
If the technician arrives and the site requirements (utilities, access, or compatibility) are not met:
*   **Postponement:** The job will be logged as "Incomplete."
*   **Revisit Fee:** A flat **AED 75** charge will apply for the second appointment once the site issues are rectified.
*   **Scope Limitation:** Our technicians are not licensed plumbers or structural electricians; they cannot install new water lines or main circuit breakers.

---
doc_id: HH-63
title: Installation Day — Common Questions
doc_type: faq
version: 1.0
last_updated: 2026-01-19

Installation Day — Common Questions (HH-63)

1. Overview
To ensure a smooth service experience, this FAQ clarifies the scope of HomeHaven’s professional installation services. Our technicians are specialized in product integration and testing but operate within strict "Standard Installation" boundaries to ensure safety and compliance with UAE residential codes.

2. Frequently Asked Questions

Q: Do you perform carpentry or new plumbing for dishwasher/washing machine installs?
A: **No.** Standard installation (e.g., for the DW60) includes connecting the unit to your existing water inlet, drain point, and power socket. It does **not** include:
*   Cutting or modifying kitchen cabinetry/granite countertops.
*   Extending plumbing pipes or installing new drainage traps.
*   Running new electrical conduits or installing new breakers.

Q: Can you fix my door if the smart lock installation leaves marks or holes from the previous lock?
A: **No.** Our service covers the mechanical fitment and functional testing of the smart lock (e.g., SN-L2). Any cosmetic repairs, wood filling, or painting required to cover marks left by your old hardware are the responsibility of the homeowner.

Q: Will you set up the Wi-Fi and app configuration for my smart devices?

A: **Partial Support.**
* **Hardware Setup:** Our technician will ensure the device is powered and functioning mechanically.
* **Connectivity:** For the **SN-L2 Smart Lock**, the primary connection is via **Bluetooth** for local app access.
* **Network Troubleshooting:** While we assist with initial pairing, we do not provide IT support for home mesh networks, firewall configurations, or ISP-related connectivity issues.

Q: What if my existing valves are leaking or the power socket is faulty?
A: For safety reasons, our technicians cannot proceed with the installation if the site infrastructure is compromised. You will be advised to contact a licensed plumber or electrician to repair the utilities before we can reschedule the installation (refer to the **Revisit Fee in HH-62**).

Q: Does the installation include removing my old appliance?
A: **Disconnect Only.** We will disconnect your old unit to make space for the new one. However, "Haul-Away" or disposal services must be booked separately as a "Recycling Add-on" at checkout to ensure environmentally friendly disposal.

3. Post-Installation Sign-off
Upon completion, the technician will demonstrate the basic functions of the device. You will be asked to sign a **Digital Completion Certificate** confirming:
1. The unit is level and stable.
2. There are no visible leaks (for appliances).
3. The locking mechanism functions correctly (for smart locks).
4. The work area has been cleared of packaging debris.

doc_id: HH-64
title: Privacy — Data Retention Q&A (Scenario)
doc_type: faq
version: 1.0
last_updated: 2026-01-11

Privacy — Data Retention Q&A (HH-64)

1. Overview
At **HomeHaven**, we take the stewardship of your personal information seriously. This Q&A clarifies how we handle your data throughout its lifecycle, from the moment you place an order for a kitchen appliance to the long-term management of your account history.

2. Frequently Asked Questions

Q: Do you keep my order history indefinitely?
A: **Yes.** We retain order records (including product details, transaction amounts, and delivery addresses) to fulfill our business and legal obligations. This data is essential for:
*   **Warranty Verification:** Ensuring we can service your products throughout their lifecycle.
*   **Tax Compliance:** Meeting UAE Federal Tax Authority (FTA) requirements for financial record-keeping.
*   **Recall Notifications:** Contacting you immediately if a safety issue is identified with a product you purchased.

Q: Do you sell my personal data to third parties?
A: **No.** HomeHaven does not sell your personal information for profit. Data sharing is strictly limited to essential service providers required to fulfill your order, including:
*   **Logistics Partners:** To navigate to your physical address for delivery.
*   **Payment Processors:** To securely authorize your credit card or Tabby/Tamara transactions.
*   **Technical Support:** To troubleshoot smart-home connectivity issues (e.g., for the CC-T1 Thermostat).

Q: Can I opt out of marketing communications?
A: **Absolutely.** You have full control over your communication preferences. You can opt out via:
*   **Email:** Clicking the "Unsubscribe" link at the bottom of any promotional message.
*   **App Settings:** Toggling "Push Notifications" or "Marketing Emails" in the HavenPlus Rewards dashboard.
*   **Customer Support:** Contacting us directly to be placed on our internal "Do Not Contact" (DNC) list.
*   *Note: You will still receive transactional emails, such as order confirmations and shipping alerts.*

Q: How long do you keep my account data if I stop shopping?
A: If an account remains inactive for **3 years**, we move the profile to an "Archived" state. After **5 years** of total inactivity, personal identifiers are anonymized, though raw transaction data is kept for aggregate financial reporting.

3. Data Protection Rights
In line with UAE Data Protection laws, you may request:
1. **Access:** A digital copy of all personal data we hold about you.
2. **Correction:** Updates to incorrect phone numbers or delivery addresses.
3. **Deletion:** Permanent removal of your account, provided there are no active warranties or legal holds.

---

doc_id: HH-65
title: In-Store Services Overview
doc_type: reference
version: 1.0
last_updated: 2026-01-12

In-Store Services Overview (HH-65)

1. Overview
While **HomeHaven** is a digital-first retailer, our physical Experience Centers across the UAE serve as critical hubs for logistics, sustainability, and face-to-face customer support. Each location is equipped to handle omnichannel fulfillment and post-purchase service.

2. Core In-Store Services

Click & Collect (Ready in 2 Hours)
* **Availability:** Offered at all three flagship locations.
* **Process:** Select "Store Pickup" at checkout. You will receive an SMS/Email with a unique QR code once your items are staged and ready.
* **Holding Period:** Orders are held for **7 days**. After this period, the items are returned to stock and a refund is issued to your original payment method.

In-Store Returns & Exchanges
* **Eligibility:** Items purchased online or in-store can be returned within 30 days, provided they meet the "Shelf-Ready" criteria outlined in **HH-52**.
* **Immediate Inspection:** Our on-site technicians can verify the condition of appliances (e.g., the PB-900 or BB-CM125) immediately, speeding up the refund authorization.
* **Exchanges:** Direct swaps for different colors or models are available subject to local stock availability.

Specialized E-Recycling (Sustainability Initiative)
* **Location:** **Dubai — Al Quoz Store Only.**
* **Service:** A dedicated E-Recycling Drop Box is available for small-to-medium household electronics (e.g., old blenders, thermostats, or air purifier motors).
* **Incentive:** HavenPlus members receive **100 "Green Points"** per recycled small appliance (maximum 500 points per month).

3. Store Locations & Operating Hours

Region	Location Detail	Hours (Sun–Thu)	Hours (Fri–Sat)
Dubai	**Al Quoz Industrial 3** (Main Hub)	09:00 – 21:00	10:00 – 22:00
Abu Dhabi	**Khalidiya**, Zayed the First St.	10:00 – 22:00	10:00 – 23:00
Sharjah	**Al Majaz 2**, Corniche St.	10:00 – 22:00	14:00 – 23:00

4. In-Store Safety & Access
*   **Parking:** Dedicated customer parking is available at all locations. The Al Quoz hub includes a **Loading Zone** for large appliance pickups.
*   **Assistance:** Store staff are trained to demonstrate the **HomeHaven App** and assist with "Smart Home" pairing for the CC-T1 and SN-L2 series.

doc_id: HH-66
title: Support Escalations — When to Contact Us Urgently
doc_type: guideline
version: 1.0
last_updated: 2026-01-20

Support Escalations — When to Contact Us Urgently (HH-66)

1. Overview
While most inquiries are handled through our standard **Tier 1 Support (HH-01)**, certain critical scenarios require immediate intervention. Following this guideline ensures that high-priority issues—such as missing high-value appliances or transit damage—are fast-tracked for resolution.

2. Urgent Escalation Triggers
Contact the HomeHaven Support Team immediately if you encounter any of the following:

Missing "Delivered" Shipments
*   **Scenario:** Your tracking status shows "Delivered," but the item is not at your doorstep, with security, or at the reception.
*   **Action:** Report within **4 hours** of the notification so we can GPS-track the courier’s last position.

Transit Damage (High-Value Items)
*   **Scenario:** Your **PureBlend PB-900** or **AirPure AP-400** arrives with visible structural damage or a broken seal.
*   **Window:** You must report this within **24 hours** of receipt to remain eligible for an immediate "No-Questions-Asked" replacement.

Critical Address Corrections
*   **Scenario:** You noticed a typo in your villa number or street name after checkout.
*   **Window:** Corrections must be submitted within **2 hours** of order placement. Once a parcel moves to "Out for Delivery" status, address redirects may incur a re-delivery fee.

3. Required Documentation

To accelerate your Tier 2 or Tier 3 escalation, please provide:
*   **Order Identifier:** Your 10-digit Order Number (e.g., HH-XXXX-XXXX).
*   **Visual Evidence:** High-resolution photos of the outer packaging, the shipping label, and the specific damage to the product.
*   **Verified Contact:** The mobile number linked to your **HavenPlus** account for a direct callback from a Specialist.

4. Support Availability
Our Dubai-based Customer Care Center operates on Gulf Standard Time (GST):
*   **Daily Operating Hours:** 09:00 – 21:00 (Including Weekends).
*   **Live Chat:** Accessible via the HomeHaven App and Web portal for the fastest response.
*   **Phone Support:** Available for complex logistics or technical installation crises.
*   **Email:** `urgent@homehaven.ae` (Monitored for high-priority triggers only).

5. After-Hours Protocol
If an incident occurs outside of 09:00–21:00, please submit your claim via the **In-App Support Ticket** system. Your timestamped submission will preserve your 24-hour reporting window for damaged goods.

---
doc_id: HH-67
title: In-Store Experience Enhancements
doc_type: policy
version: 1.0
last_updated: 2026-01-25

Overview
This document outlines enhancements to the in-store experience across all HomeHaven locations. The goal is to create a more personalised, efficient, and accessible shopping environment that drives higher satisfaction, faster service, and increased loyalty. The enhancements cover staff training, guest journey mapping, accessibility upgrades, and measurement of impact.

Scope
- Applies to all physical stores in UAE and any pop-up events hosted by HomeHaven.
- Impacts floor staff, supervisors, and store managers.
- Works in tandem with Click & Collect and online support.

Staff Training & Knowledge
- Launch a quarterly training cadence focusing on product familiarity, upsell techniques, and customer empathy.
- Introduce micro-learning modules (5–7 minutes) embedded in POS terminals and the store app.

- Create a rotating “product specialist of the week” program to deepen expertise on a subset of popular items (e.g., AP-400, SN-L2, DW60).
- Implement live role-play sessions to rehearse common customer scenarios (returns, exchanges, warranty claims).

Guest Experience Protocols
- Greeting standard: “Welcome to HomeHaven—how can I help you today?” within 15 seconds of entry.
- Needs discovery: staff ask 2–3 open-ended questions to identify the customer’s goal.
- Demo zones: create small, clearly marked product demonstration areas with tactile displays.
- Checkout flow: minimize queue time via a dedicated express line for simple purchases.

Accessibility & Inclusion
- Ensure accessible routes and signage with clear font sizes, high contrast, and tactile guides where necessary.
- Wheelchair-friendly aisles with 1100 mm of clear width; seating at product demo areas.
- Hearing-impaired accommodation equipment (visual announcements, captioned video loops).

Returns Processing In-Store
- Staff are trained to verify packaging integrity and accessories with customers cooperating on the spot.
- For in-store returns, initiate the same condition checks as courier returns (HH-21) and issue refunds or store credits per policy.

Store Experience Metrics
- Customer satisfaction (CSAT) targets: 4.6/5 on average; Net Promoter Score (NPS) targets: >70 quarterly.
- First-contact resolution (FCR) target: 85% on in-store inquiries.
- Throughput: target average time in-store from entry to exit under 6 minutes for routine purchases.

Change Management
- Pilot new experience in 3 locations for 90 days, then roll out to all stores.
- Collect qualitative feedback from customers and frontline teams to adjust training content.

References
- HH-01 (Support hours)
- HH-02 (Delivery guidelines)
- HH-03 (Click & Collect)
- Training module outlines to be linked in the internal knowledge base.

---
doc_id: HH-68

title: Returns — In-Store Processing Guide
doc_type: guideline
version: 1.0
last_updated: 2026-01-26

Objective
Provide a clear, fast, and customer-friendly in-store returns process that aligns with online policies (HH-04) while ensuring proper inspection and restocking practices.

Workflow
1) Customer presents item with packaging and receipt.
2) Scan order to verify eligibility (within 30 days; items unused; original packaging present).
3) Inspect item for wear, missing parts, and serial number match (per HH-04 and HH-22).
4) Determine refund type (card refund, store credit, or exchange) based on policy and product category.
5) Process return through POS system; issue receipt or store credit; update inventory accordingly.
6) If item is defective, initiate warranty flow (HH-05) where applicable.

In-Store Documentation
- Maintain a dedicated returns folder for each location with templates for: receipt, serial capture, photos, and notes.
- Use the same photos and notes demanded for courier-based damage claims (HH-21).

Customer Communication
- Confirm the item’s condition and reason for return.
- Explain estimated processing time for refunds (5–12 business days for card; faster for store credits depending on payment method).

Exceptions
- Opened consumables are generally restricted (HH-04) unless defective.
- Bundled items may require returning the entire bundle (HH-43).

Security & Fraud
- Verify customer identity if needed by policy; avoid processing refunds to third parties.

KPIs
- In-store return processing time (target ≤ 6–8 minutes per item)
- Return accuracy rate (target ≥ 98%)

---
doc_id: HH-69
title: Sustainability Initiatives — Packaging & Recycling Programs
doc_type: policy
version: 1.0

last_updated: 2026-01-28

Packaging Reduction Goals
- Minimize packaging materials where feasible.
- Encourage customers to reuse packaging for returns or storage when safe.

E-Waste & Battery Recycling
- Dubai Al Quoz store hosts an e-recycling drop-off for small electronics and batteries.
- Provide customers with clear instructions on how to prepare items for recycling.

Take-Back & Refurbish
- Explore a voluntary take-back program for select models, with refurbishment options where feasible.
- Communicate eligibility and procedures clearly to customers.

Supplier Requirements
- Encourage suppliers to use recyclable packaging.
- Require labeling that includes recycling instructions.

Compliance & Reporting
- Track packaging-related waste reductions annually.
- Report improvements in sustainability to management and publish the results in the quarterly ESG digest.

---
doc_id: HH-70
title: Data Security — Best Practices for POS Systems
doc_type: guideline
version: 1.0
last_updated: 2026-01-29

Scope
Covers point-of-sale devices, payment terminals, and related backend services used in stores.

Core Controls
- PCI-DSS compliant handling of cardholder data; avoid storing sensitive data on devices unless required.
- End-to-end encryption (E2EE) for card data, shielded PIN entry, and tamper-evident seals.
- Strong password policies: minimum 12 characters, multi-factor authentication where possible.
- Device hardening: disable default accounts, limit remote access, keep firmware up-to-date.

Physical Security
- Secure checkout counters with access restricted to authorized personnel.

- Use tamper-evident packaging for terminals and peripherals.
- Screen privacy measures to prevent shoulder-surfing.

Incident Response
- Immediate isolation of compromised devices; reset credentials; perform forensic review.
- Notify customers if their data may have been exposed; document timelines and actions.

Training
- Regular security awareness training for store staff.
- Annual certification on PCI-DSS basics and phishing awareness.

Compliance
- Align with UAE data protection guidelines and international best practices.

---
doc_id: HH-71
title: Merchant Integrations — API & Webhooks Overview
doc_type: reference
version: 1.0
last_updated: 2026-01-30

Purpose
Provide a stable, secure gateway for merchant integrations with HomeHaven catalog and order management systems.

API Model
- RESTful endpoints for product catalog, pricing, and stock sync.
- Webhook events for order status changes, shipments, and refunds.

Authentication
- API keys with per-environment scopes.
- Rotation policy and secure storage recommended.

Rate Limits & Throttling
- Typical 1,000 requests per minute per API key; bursts managed with exponential backoff.
- Webhook retries on failure with exponential backoff.

Data Mapping
- Catalog: product_id, name, category, price, stock_level, attributes.
- Orders: order_id, status, items, totals, customer_id.

Error Handling
- Standard HTTP status codes; detailed error messages for troubleshooting.

Security
- TLS 1.2+; mutual TLS recommended for sensitive operations.

- Audit logging of all API interactions.

---
doc_id: HH-72
title: Loyalty Program Enhancements — Future Roadmap
doc_type: roadmap
version: 1.0
last_updated: 2026-01-31

Vision
Enhance HavenPlus with richer personalization, more flexible redemption options, and stronger integration with store experiences.

Key Initiatives
- Tiered promotions tailored to engagement and purchase history.
- Cross-channel redemption (in-store, online, app).
- Real-time points balance on checkout and product detail sheets.

Privacy & Compliance
- Ensure all enhancements comply with existing data protection policies (HH-14, HH-39).
- Provide opt-out controls for new promotional features.

Timeline
- Q2 2026: Design and pilot new redemption options.
- Q3 2026: Expand to all stores; update app interfaces.

---
doc_id: HH-73
title: Delivery Partner SOPs — Courier Quality Standards
doc_type: guideline
version: 1.0
last_updated: 2026-02-01

Objective
Ensure consistent courier performance, safe handling of items, and transparent communication with customers.

Quality Metrics
- On-time delivery rate
- Condition of delivered items (no damage)
- Customer updates and ETA accuracy

Operational Guidelines
- Verify recipient identity when required; obtain signed delivery notes.
- Handle bulky items with care; ensure safe loading and unloading.
- Notify customers of any delays or issues promptly.

Incident Handling
- If a delivery exception occurs, escalate to the appropriate channel and log the incident.
- Provide proactive resolution (reschedule, reattempt) within the service window.

---
doc_id: HH-74
title: Product Recall & Safety Alerts
doc_type: policy
version: 1.0
last_updated: 2026-02-02

Recall Triggers
- Manufacturer safety alerts
- Regulatory notices
- Field issues affecting user safety

Response Protocol
1) Halt distribution of affected items at all stores.
2) Notify customers via marketing channels if they own the product (based on order history).
3) Quarantine affected inventory; document serial ranges.

Customer Communication
Provide clear instructions for return or inspection; offer replacement or refund per policy.

Documentation
Maintain a recall log; track affected SKUs, quantities, and locations.

---
doc_id: HH-75
title: Accessibility & Inclusive Design — Store Accessibility
doc_type: guideline
version: 1.0
last_updated: 2026-02-03

Accessibility Principles
- Clear, high-contrast signage; large font sizes; tactile floor indicators.
- Accessible checkout options for customers with disabilities.
- Adequate seating and rest areas near product demonstrations.

Operational Practices
- Staff trained to assist customers with mobility or sensory disabilities.
- Clear pathways and unobstructed aisles; regular accessibility audits.

Feedback
Provide channels for customers to report accessibility concerns; track and address

issues promptly.

---
doc_id: HH-76
title: Marketing Compliance & Legal Notices
doc_type: policy
version: 1.0
last_updated: 2026-02-04

Advertising Standards
- Truthful claims; no deceptive pricing.
- Clear, legible terms for promotions; explicit exclusions.

Data & Privacy Notices
- Marketers must respect opt-out preferences (HH-14).
- Collect only necessary data for marketing purposes with proper consent.

Intellectual Property
- Respect brand and product copyrights; avoid unauthorized use of logos or trademarks.

Regional Compliance
- Tailor messaging to UAE regulations; include VAT disclosures where appropriate.

---
doc_id: HH-77
title: App Onboarding Guide — New User Experience
doc_type: guide
version: 1.0
last_updated: 2026-02-05

Onboarding Flow
1) Account creation and verification (phone/email).
2) Privacy & marketing preferences setup.
3) Guided tour of core features: shopping, order tracking, loyalty.
4) Permissions prompts: notifications, location (where applicable).

Best Practices
- Keep onboarding under 5 minutes.
- Use contextual prompts to guide new users to key actions.
- Provide a clear path to support if users encounter issues.

Troubleshooting
- If verification fails, offer alternative verification methods.
- If notification delivery fails, provide troubleshooting steps.

---
doc_id: HH-78

title: Payment Methods — Regional Variations & Compliance
doc_type: policy
version: 1.0
last_updated: 2026-02-06

Payment Methods — Regional Variations & Compliance (HH-78)

1. Overview
As **HomeHaven** expands its footprint across the Gulf, this policy ensures that our payment infrastructure remains compliant with the distinct financial regulations of each GCC member state while maintaining a localized, frictionless checkout experience for household essentials.

2. Regional Payment Availability

United Arab Emirates (Primary Hub)
*   **Card Payments:** Full support for Visa, Mastercard, and American Express.
*   **Mobile Wallets:** Native integration with **Apple Pay** and **Google Pay** for instant checkout via the HomeHaven App.
*   **Cash on Delivery (COD):** Available for orders up to **AED 5,000** in all major cities. A non-refundable **AED 15** service fee applies.
*   **Installments:** "Buy Now, Pay Later" (BNPL) via Tabby and Tamara for qualifying baskets.

Other GCC Regions (KSA, Oman, Qatar, Bahrain, Kuwait)
*   **Card Payments:** Support for local debit schemes, including **Mada** (KSA) and **Benefit** (Bahrain).
*   **Cash on Delivery:** Available on a restricted basis for "Non-Bulky" items only. International COD surcharges apply to cover cross-border logistics.
*   **Currency:** Transactions are processed in the local currency (SAR, OMR, QAR, BHD, KWD) based on the daily mid-market exchange rate.

3. Financial Compliance & Standards
To protect the integrity of every transaction—from a **PureBlend** purchase to a **HavenPlus** top-up—HomeHaven adheres to:
*   **PCI-DSS Level 1:** Our payment gateway undergoes annual third-party audits to ensure the highest level of Payment Card Industry Data Security Standards. No raw card data is stored on HomeHaven’s internal servers.
*   **Central Bank Regulations:** All digital wallet integrations comply with the UAE Central Bank’s Retail Payment Services and Card Schemes Regulations.
*   **AML/CTF:** Anti-Money Laundering and Counter-Terrorism Financing checks are automatically applied to high-value transactions exceeding **AED 10,000**.

4. Security & Fraud Prevention
*   **3D Secure (3DS):** Mandatory 2-factor authentication (OTP via SMS/Email) is required for all online card transactions to reduce the risk of unauthorized use.
*   **Risk Scoring:** Every order is analyzed by an AI-driven fraud engine. Indicators such as "High-Speed Velocity" or "Mismatched IP-to-Shipping Address" may trigger a manual verification call from our **Security Team (HH-83)**.

*   **Tokenization:** We utilize secure tokenization for "Saved Cards," ensuring that even if a local device is compromised, the actual card details remain unreadable.

5. Dispute & Chargeback Protocol
*   **Resolution First:** Customers are encouraged to contact **Support (HH-30)** prior to initiating a bank chargeback. Most billing discrepancies can be resolved within 48 hours via a direct refund.
*   **Documentation:** In the event of a formal dispute, HomeHaven provides the issuing bank with a comprehensive "Evidence Pack," including the **Digital Tax Invoice (HH-79)** and the **Proof of Delivery (POD)** signature.

---
doc_id: HH-79
title: VAT & Taxation — UAE Scenario Deep Dive
doc_type: reference
version: 1.0
last_updated: 2026-02-07

VAT & Taxation — UAE Scenario Deep Dive (HH-79)

1. Overview
In accordance with the UAE Federal Tax Authority (FTA) Decree-Law No. 8 of 2017, **HomeHaven** operates under a transparent "VAT-Inclusive" pricing model. This reference provides the technical breakdown of tax application for retail sales, service fees, and post-purchase reversals.

2. VAT Handling & Display
*   **Retail Standard:** As per **HH-44**, all consumer-facing prices for hardware (e.g., **PureBlend PB-900** or **SecureNest SN-L2**) include the standard 5% VAT.
*   **Service Fees:** VAT is also applied to and included in the quoted prices for:
    *   **Scheduled Installation:** The AED 149 fee for dishwashers includes AED 7.10 in VAT.
    *   **Express Delivery:** The AED 35 premium shipping fee includes AED 1.67 in VAT.
    *   **COD Fees:** The AED 15 convenience charge is a taxable service.

3. Digital Tax Invoicing
*   **Automatic Issuance:** A valid **Tax Invoice** is generated at the moment of "Order Confirmation" and dispatched via email.
*   **Mandatory Fields:** Every HomeHaven invoice includes:
    *   The HomeHaven **Tax Registration Number (TRN)**.
    *   A unique invoice reference number and date.
    *   A line-item breakdown showing the Net Price, VAT Amount (5%), and Gross Total.
*   **Billing Accuracy:** For **Cash on Delivery (COD)**, customers must ensure their "Full Legal Name" is used during checkout to ensure the invoice remains valid for potential corporate expense claims.

4. Returns & VAT Adjustments
When a product is returned under the **30-day policy (HH-52)**, a **Tax Credit Note** is issued:
*   **Full Refunds:** The refund amount credited back to your card or bank account includes the original 5% VAT paid.
*   **Partial Returns:** VAT is recalculated based on the remaining items kept. If a bundle discount is forfeited (HH-43), the tax adjustment will reflect the new individual retail prices.
*   **Restocking Fees:** If a **10% Restocking Fee (HH-86)** is applied, this fee is also considered a taxable service; the VAT for the restock service will be deducted from the total refund.

5. Non-Resident & Export Scenarios
*   **Tourist Refunds:** HomeHaven Experience Centers are currently not linked to the "Planet" digital VAT refund system. All in-store purchases are final regarding tax collection.
*   **Diplomatic Exemptions:** Entities with a valid VAT Exemption Certificate from the UAE Ministry of Foreign Affairs must contact **Business Support** prior to purchase to arrange a tax-exclusive pro-forma invoice.

6. Record Retention
In compliance with FTA requirements, all Tax Invoices and Credit Notes are digitally archived for **7 years** and remain accessible to the customer through the "My Documents" portal in the HomeHaven App.

---
doc_id: HH-80
title: Inventory Management — Stock Replenishment Rules
doc_type: guideline
version: 1.0
last_updated: 2026-02-08

Inventory Management — Stock Replenishment Rules (HH-80)

1. Overview
Efficient inventory flow is the backbone of **HomeHaven’s** commitment to "Next-Day Delivery." These guidelines ensure that high-demand household essentials—from the **CrispWave** air fryers to **AirPure** filter packs—remain in stock across our Al Quoz hub and retail Experience Centers.

2. Stock Level Optimization
To prevent "Out of Stock" (OOS) statuses during peak UAE shopping seasons (e.g., Ramadan or White Friday), the following thresholds are enforced:
*   **Minimum Safety Stock:** Each SKU carries a safety buffer calculated as 15% of the average monthly velocity.
*   **Reorder Points (ROP):** Automated triggers in the ERP system initiate a replenishment request when stock hits the ROP, accounting for the **Lead Time** of

the specific supplier.
*   **Seasonal Buffers:** Inventory targets for cleaning solutions (e.g., **SteamShine** refills) are increased by 25% during the transition into the summer months.

3. Supplier & Procurement Standards
*   **Lead Time Management:** Procurement teams must maintain a verified Lead Time Log for all international and local vendors.
*   **Minimum Order Quantity (MOQ):** Orders are optimized to meet vendor MOQs while balancing the storage capacity of the Al Quoz warehouse.
*   **Quality Audits:** 5% of every incoming shipment (e.g., a new batch of **PB-900** blenders) undergoes a "Spot-Check" for box integrity, plug compatibility (UAE 3-pin standard), and serial number accuracy.

4. Inventory Accuracy & Stock Takes
*   **Quarterly Cycle Counts:** A full wall-to-wall audit is conducted every 90 days. High-value electronics, such as the **SN-L2 Smart Lock**, are subject to monthly "High-Velocity" spot counts.
*   **Variance Investigation:** Any discrepancy exceeding 0.5% between physical stock and the digital ledger triggers an immediate "Root-Cause Analysis" (RCA) to identify potential shrinkage, scanning errors, or fulfillment leakage.
*   **System Sync:** Stock levels displayed on the **HomeHaven App** must synchronize with the warehouse management system (WMS) every 5 minutes to prevent "Ghost Orders."

5. Overstock & Obsolescence
*   **Slow-Mover Protocol:** Items with zero sales velocity for 120 days are flagged for the **HavenPlus** "Member-Only Flash Sale" or transferred to the Sharjah "Outlet" location.
*   **Expiry Management:** Consumables (cleaning chemicals/sprays) follow a **First-In, First-Out (FIFO)** picking logic to ensure customers receive products with maximum shelf life.

---
doc_id: HH-81
title: E-Waste & Battery Recycling Programs
doc_type: policy
version: 1.0
last_updated: 2026-02-09

E-Waste & Battery Recycling Programs (HH-81)

1. Overview
HomeHaven is committed to reducing the environmental footprint of household technology in the UAE. Our **Green-Cycle Initiative** provides a safe, compliant pathway for customers to dispose of end-of-life electronics, preventing hazardous materials from entering local landfills.

2. Program Details & Collection
*   **Primary Hub:** The **Dubai — Al Quoz Experience Center (HH-65)** serves as our central collection point for e-waste.
*   **Accepted Items:**
    *   **Small Household Electronics:** Defective blenders (**PB-900**), broken steam mops (**SS-M10**), and outdated thermostats.
    *   **Battery Cells:** AA/AAA alkaline batteries and specialized Lithium-Ion packs from the **DustDash** series.
*   **Disposal Guidance:** Store staff are trained to identify recyclable components versus general waste. Customers can also use the "Recycle-Scan" feature in the HomeHaven App to determine if an item is eligible for the drop-box.

3. Battery Handling & Safety Protocols
To mitigate fire risks and chemical leaks during transport and storage:
*   **Terminal Protection:** Customers are advised to tape the terminals of high-capacity Lithium batteries (e.g., **DD-BAT2**) with clear packing tape to prevent short-circuits.
*   **Damaged Cells:** Swollen, leaking, or "vented" batteries must be handed directly to a Safety Specialist in-store and should **never** be placed in the general drop-box.
*   **Storage Environment:** Collection bins are fire-rated, climate-controlled, and positioned away from flammable inventory at the Al Quoz hub.

4. Community Engagement & Incentives
*   **HavenPlus "Green Points":** Members receive **100 loyalty points** for every small appliance recycled (up to 500 points per month).
*   **Awareness Campaigns:** HomeHaven hosts quarterly "E-Waste Week" events featuring double-points for recycling and live demonstrations on how to extend the life of household batteries.
*   **Educational Content:** Monthly newsletters include "Eco-Tips" on maintaining appliance efficiency to reduce premature e-waste.

5. Downstream Processing
*   **Certified Partners:** All collected e-waste is transferred to UAE-based, municipality-approved recycling facilities.
*   **Resource Recovery:** Our partners prioritize the extraction of raw materials (copper, silver, and rare-earth metals) to be reintroduced into the global manufacturing supply chain.

---
doc_id: HH-82
title: Data Retention & Deletion — Guidance
doc_type: guideline
version: 1.0
last_updated: 2026-02-10

Data Retention & Deletion — Guidance (HH-82)

1. Overview
In alignment with UAE Data Protection laws and HomeHaven’s commitment to consumer trust, this guideline defines how we manage the lifecycle of personal information. Our goal is to balance the operational need for historical data (such as warranty tracking for the **AirPure AP-400**) with the fundamental right to data minimization and privacy.

2. Retention Periods & Logic
HomeHaven does not store data indefinitely. Retention is dictated by the category of information and its legal or functional necessity:

* **Transactional Records:** Purchase history, Tax Invoices (HH-44), and delivery addresses are retained for **7 years**. This satisfies UAE Federal Tax Authority (FTA) audit requirements and ensures long-term warranty support.
* **Marketing Data:** Email engagement logs and promotional click-tracking are retained for **24 months** of inactivity before being purged or anonymized.
* **Customer Support Logs:** Chat transcripts (HH-30) and call recordings are retained for **12 months** to ensure quality assurance and dispute resolution, unless linked to an active legal claim.
* **Technical Telemetry:** App performance logs (HH-107) and IoT heartbeat data from the **CC-T1 Thermostat** are retained for **90 days** in a raw format before being aggregated into anonymous trends.

3. Data Deletion Requests (Right to Erasure)
Customers may request the permanent removal of their personal profile through the "Privacy Center" in the HomeHaven App.

* **Processing Window:** All verified deletion requests must be acknowledged within **48 hours** and completed within **30 calendar days**.
* **System Synchronization:** Erasure commands are propagated from the primary Customer Master Database to downstream systems, including:
    * Third-party logistics (3PL) partners.
    * Email marketing platforms.
    * Loyalty program databases (**HavenPlus**).
* **Hard-Delete vs. Anonymization:** Where financial laws mandate the retention of a transaction (e.g., a **DustDash** purchase), the personal identifiers (Name/Phone/Email) are "scrubbed" and replaced with a generic ID, rendering the record non-linkable to the individual.

4. Data Security Standards
To protect data during its retention period, HomeHaven employs "Defense in Depth":
* **Encryption at Rest:** All databases utilize AES-256 bit encryption.
* **Encryption in Transit:** All data moving between the HomeHaven App and our servers is secured via TLS 1.2+.
* **Access Control:** The "Principle of Least Privilege" (PoLP) is enforced. Only authorized Customer Care Leads or Financial Auditors can access sensitive PII (Personally Identifiable Information).

5. Verification of Eradication
Upon completion of a deletion request, the system generates a **Certificate of

Erasure**. This technical log confirms that the data has been removed from all active databases and that any existing backups containing the data are encrypted and scheduled for natural rotation/overwriting within **60 days**.

---
doc_id: HH-83
title: Incident Response — Security Breach Protocols
doc_type: guideline
version: 1.0
last_updated: 2026-02-11

Incident Response — Security Breach Protocols (HH-83)

1. Overview
This guideline defines the mandatory rapid-response actions required to protect HomeHaven customer data and digital infrastructure in the event of a suspected or confirmed security breach. Our priority is the containment of threats and the transparent protection of our UAE user base.

2. Immediate Containment & Actions
Upon detection of a security anomaly (e.g., unauthorized access to the **HavenPlus** database or a brute-force attack on **SN-L2** cloud logs):
*   **Isolate & Contain:** Immediately revoke affected API keys, disable compromised administrative credentials, and segment the impacted network layer to prevent lateral movement.
*   **Evidence Preservation:** Snapshots of volatile memory and system logs must be taken before any reboot or re-imaging. All forensic data must be stored in a write-once-read-many (WORM) environment.
*   **Internal Notification:** Trigger the **Cybersecurity Incident Team (CSIT)** alert. The Data Protection Officer (DPO) and CTO must be briefed within **2 hours** of discovery.

3. Regulatory & Legal Obligations
*   **Authority Notification:** In accordance with UAE Federal Data Protection laws, HomeHaven will notify relevant authorities (such as the UAE UAE Cybersecurity Council or TDRA) if the breach poses a high risk to the rights and freedoms of individuals.
*   **Legal Counsel:** All external-facing statements must be reviewed by the Legal Department to ensure compliance with mandatory disclosure timelines.

4. Communication Plan
If customer data (e.g., email, physical address, or hashed passwords) is compromised:
*   **Direct Notification:** Affected users will be notified via verified HomeHaven email and in-app alerts within **24–72 hours** of the breach being contained.
*   **Remediation Steps:** Notifications must include clear instructions, such as:
    *   Mandatory password resets for the HomeHaven App.
    *   Enabling Two-Factor Authentication (2FA).

*   Monitoring bank statements for unusual activity (if payment metadata was involved).
*   **Transparency:** A dedicated "Security Update" landing page will be hosted on the website to provide real-time status reports and FAQ support.

5. Post-Incident Recovery & Evolution
*   **Root-Cause Analysis (RCA):** Within 10 business days, a comprehensive forensic report must identify the vulnerability (e.g., unpatched software or a phishing entry point).
*   **Control Updates:** Implement permanent technical fixes, such as enhanced encryption, stricter firewall rules, or hardware-based MFA for staff.
*   **Staff Retraining:** If the breach resulted from human error, all relevant departments must undergo mandatory **Security Awareness Training** within 30 days.
*   **Audit:** An independent third-party security audit will be commissioned to validate the integrity of the restored systems.

---
doc_id: HH-84
title: Chatbot & AI Interactions — Guidelines for Consistency
doc_type: guidelines
version: 1.0
last_updated: 2026-02-12

Chatbot & AI Interactions — Guidelines for Consistency (HH-84)

1. Overview
As HomeHaven integrates automated assistance into the UAE shopping experience, these guidelines ensure that our AI-driven touchpoints—including the "HavenBot" and automated email triaging—reflect our brand’s commitment to reliability, local cultural nuance, and technical accuracy.

2. Interaction Principles
To maintain a premium "Home-First" service standard, all AI interactions must adhere to the following:
*   **Tone and Language:** Maintain a polite, helpful, and professional persona. Avoid overly robotic phrasing; instead, use clear, conversational English (and Arabic where localized) that aligns with our **Customer Care Standards (HH-01)**.
*   **Consistency:** AI must provide identical information to our web-based FAQs. For example, if a user asks about the **CrispWave CW-AF55** capacity, the AI must consistently cite **5.5L** as per the official product sheet (**HH-31**).
*   **Proactive Escalation:** If a query remains unresolved after two automated attempts, or if the user uses keywords like "Human," "Manager," or "Complaint," the system must trigger an immediate transfer to a **Live Specialist (HH-30)** during operational hours (09:00–21:00 GST).

3. Safety & Data Privacy
The protection of HomeHaven customer data is paramount during automated sessions:
*   **Sensitive Data Masking:** AI interfaces are prohibited from requesting or

displaying full Credit Card numbers, CVVs, or account passwords. Any such data entered by a user must be automatically redacted in logs.
*   **Verified Knowledge Base:** Responses must be pulled exclusively from the **Verified Document Library** (HH-Series). AI is forbidden from "hallucinating" or speculating on future product releases or undocumented discount codes.
*   **Identity Verification:** Before disclosing order-specific details (e.g., tracking a **DustDash** delivery), the AI must confirm the user’s identity via a one-time passcode (OTP) or authenticated app session.

4. Monitoring & Quality Assurance
*   **Tone Audits:** The Customer Experience (CX) team performs weekly reviews of 5% of all chatbot transcripts to ensure the AI remains empathetic and culturally appropriate for the UAE market.
*   **Accuracy Training:** When new policies are released (e.g., **Refund Timing HH-53**), the AI’s underlying data model must be updated within **4 hours** of the document's "Last Updated" timestamp.
*   **Feedback Loop:** Every AI interaction must conclude with a 1-click "Was this helpful?" survey. Any "No" response with a negative sentiment score is automatically flagged for manual review by a Tier 2 Lead.

5. Technical Constraints
*   **Out-of-Scope Queries:** If a user asks for non-retail advice (e.g., medical or legal), the AI must politely decline and redirect the user back to HomeHaven-related topics such as product specs, shipping, or **HavenPlus** rewards.
*   **Latency Standards:** Responses should be generated within **2 seconds** to maintain a frictionless user experience on mobile networks.

---
doc_id: HH-85
title: Affiliate Program Policies
doc_type: policy
version: 1.0
last_updated: 2026-02-13

Affiliate Program Policies (HH-85)

1. Overview
The HomeHaven Affiliate Program allows partners to earn commissions by promoting our curated range of kitchen, cleaning, and smart-home essentials. This policy ensures that all referral activities align with our premium brand standards and UAE consumer protection regulations.

2. Eligibility & Application
*   **Target Partners:** Content creators, home interior influencers, real estate agencies, and lifestyle platforms with a verified audience in the GCC region.
*   **Verification:** Applicants must provide active social media handles or website URLs. HomeHaven reviews all applications within **5 business days** to ensure content quality and brand alignment.

*   **Account Limits:** One affiliate account per legal entity or individual. Sub-affiliate networks are currently not permitted without prior written consent.

3. Commission Structure & Attribution
*   **Standard Rates:**
    *   **Kitchen & Cleaning:** 5% per successful sale.
    *   **Smart-Home & Electronics:** 3% per successful sale.
    *   **Consumables (Filters/Detergents):** 8% per successful sale.
*   **Cookie Duration:** 30-day tracking window. If a customer clicks your link and purchases within 30 days, the commission is attributed to your account.
*   **Attribution Model:** "Last Click" basis. The final affiliate link clicked before the transaction receives the full commission.
*   **Exclusions:** Commissions are not earned on delivery fees, installation charges, or purchases made using **HavenPlus** points as the sole payment method.

4. Compliance & Brand Guidelines
To maintain the integrity of the HomeHaven brand, affiliates must adhere to the following:
*   **Transparency:** Clearly disclose the affiliate relationship to your audience (e.g., using #Ad or #Affiliate) as per UAE National Media Council (NMC) guidelines.
*   **Asset Usage:** Only use high-resolution imagery and logos provided in the **Affiliate Portal**. Altering brand colors or using "low-quality" screenshots is prohibited.
*   **Prohibited Content:** Affiliates may not promote HomeHaven alongside offensive, political, or non-compliant content.
*   **Search Engine Marketing (SEM):** Bidding on "HomeHaven" or specific product keywords (e.g., "CrispWave price") in Google Ads is strictly forbidden and results in immediate termination.

5. Payouts & Reporting
*   **Affiliate Portal:** Real-time tracking of clicks, conversions, and pending commissions is available 24/7.
*   **Payment Threshold:** Minimum payout is **AED 200**.
*   **Schedule:** Payments are processed via bank transfer on the **15th of each month** for the previous month’s cleared earnings.
*   **Returns Impact:** Commissions for returned items (per **HH-52**) will be clawed back or deducted from the next payout cycle.

6. Termination
HomeHaven reserves the right to suspend any affiliate found engaging in "Coupon Stuffing," cookie-dropping, or misrepresenting product specifications (e.g., claiming a **DustDash** has a 2-hour runtime).

doc_id: HH-86
title: Returns — Restocking Fees & Inventory Impact
doc_type: policy
version: 1.0
last_updated: 2026-02-14

Returns — Restocking Fees & Inventory Impact (HH-86)

1. Overview
To maintain the highest quality standards for our UAE customers while managing the high logistics costs of household appliances, HomeHaven applies a restocking and processing framework. This policy ensures that returned inventory is handled sustainably and that operational costs for non-defective returns are shared fairly.

2. Restocking Fees
Restocking fees are applied to "Change-of-Mind" returns where the product is non-defective but requires significant labor for inspection and repackaging.

* **Standard Restocking Fee:** A flat **10% of the item’s retail value** is deducted from the refund for opened but unused items (e.g., a **CrispWave CW-AF55** where the box was opened but the unit was never powered on).
* **Unclaimed Click & Collect:** As per **HH-29**, a **5% restocking fee** applies to orders not collected within the 3-day holding window.
* **Exemptions:** No restocking fees apply if:
    * The item is confirmed as **Defective** by a HomeHaven technician.
    * The item was **Damaged in Transit** (reported within 24 hours per **HH-21**).
    * The wrong model was shipped due to a HomeHaven fulfillment error.

3. Inventory Impact & Inspection Grades
Every returned item undergoes a multi-point inspection at our Al Quoz hub to determine its next lifecycle stage:

* **Grade A (Resellable):** Item is in pristine condition with all original internal packaging, manuals, and accessories. The box seal may be broken, but the product is untouched.
    * *Action:* Sanitized, resealed with "Inspected by HomeHaven" tape, and returned to active inventory.
* **Grade B (Open-Box / Outlet):** Item is functional but shows minor cosmetic handling marks or the original box is moderately damaged.
    * *Action:* Transferred to the **HomeHaven Outlet** section at a 20–30% discount. These items carry a limited 6-month warranty.
* **Grade C (Damaged / Incomplete):** Item has missing parts, visible scratches, or shows signs of actual use (e.g., food residue in a blender).
    * *Action:* Sent to the **Service Center** for parts harvesting or professional refurbishment.

4. Non-Restockable Items & Recycling
* **Hygiene & Consumables:** Items identified in **HH-23** (filters, detergents, personal care) that have been opened are immediately flagged for **E-Recycling**. They are never returned to inventory for health and safety reasons.
* **Sustainability Goal:** HomeHaven aims to divert 90% of non-resellable electronic waste from UAE landfills through our partnership with local "Green-Cycle" facilities.

5. Refund Deduction Process
When a return is approved, the **Restocking Fee** and any **Courier Pickup Fees (HH-52)** are automatically calculated and deducted from the final credit. Your "Refund Summary" email will provide a transparent line-item breakdown of these deductions.

---
doc_id: HH-87
title: Product Detail Sheets — AirPurifier Series (Extended)
doc_type: product
version: 1.0
last_updated: 2026-02-15

Product Detail Sheets — AirPurifier Series (Extended) (HH-87)

1. Overview
The HomeHaven **AirPurifier Series** is engineered specifically for the UAE's unique environmental challenges, including ultra-fine desert dust (PM2.5), high humidity, and seasonal allergens. This extended detail sheet compares the AP-200, AP-300, and AP-400 lines to help households select the optimal filtration volume.

2. Family Comparison Matrix

Feature	**AP-200 (Compact)**	**AP-300 (Standard)**	**AP-400 (Premium)**
Ideal Room Size	Up to 15 m² (Nurseries)	Up to 25 m² (Bedrooms)	Up to 35 m² (Living Areas)
Filtration Stages	2-Stage (HEPA + Carbon)	3-Stage (Pre + HEPA + Carbon)	3-Stage + UV-C Sanitization
CADR (Airflow)	120 m³/h	190 m³/h	260 m³/h
Max Noise Level	42 dB	48 dB	52 dB
Sleep Mode Noise	22 dB	24 dB	25 dB
Energy Usage	25W	32W	45W

3. Maintenance & Accessories

Filter Replacement Packs
To maintain the AHAM-verified CADR ratings, only genuine HomeHaven filters should be used:
* **AP-F200:** 2-in-1 Composite filter (Replace every 4–6 months).
* **AP-F300:** 3-stage True HEPA drum (Replace every 6 months).
* **AP-F400:** High-capacity H13 HEPA + Honeycomb Carbon (Replace every 6–8 months).

Care Instructions
* **Sensor Cleaning:** Every 30 days, wipe the laser dust sensor lens (located on

the rear panel) with a dry cotton swab to ensure accurate "Auto Mode" adjustments.
*   **Pre-Filter Vacuuming:** For the AP-300 and AP-400, vacuum the permanent fabric pre-filter every 2 weeks to prevent "caking" from heavy dust.
*   **Plastic Removal:** **CRITICAL.** New filters ship inside protective plastic. Operating the unit without removing this plastic will cause the motor to overheat and void the warranty.

4. Warranty & Support
*   **Standard Term:** 1-year limited manufacturer warranty covering the DC motor and control board.
*   **Exclusions:** Clogged filters, physical damage to the chassis, or units used in commercial smoking environments.
*   **Troubleshooting:**
    *   **Red Ring Always On:** Indicates the sensor is dirty or the filter is at 0% life. Perform a sensor wipe and check the "Filter Reset" status.
    *   **Weak Airflow:** Check if the unit is placed too close to a wall. Maintain at least 30cm of clearance for the 360° intake.
    *   **Whistling Sound:** Ensure the bottom filter hatch is locked tight (HH-46).

5. Bundle Offers
*   **The "Whole-Home" Pack:** Purchase an AP-400 and an AP-200 together to receive 15% off the total plus a free **AP-F200** replacement pack.
*   **Subscription Savings:** HavenPlus members can subscribe to "Auto-Ship" for filter packs to receive a 10% discount and double loyalty points (HH-61).

doc_id: HH-90
title: Compliance & Audit — Internal Audits & Reporting
doc_type: guideline
version: 1.0
last_updated: 2026-02-18

Internal Audit Policy

1. Purpose
The purpose of the Internal Audit Policy is to establish an independent and objective internal audit function that evaluates and improves the effectiveness of risk management, internal controls, and governance processes within the company.

The Internal Audit function provides assurance to management and the board that company operations, financial reporting, inventory management, and compliance activities are operating effectively.

---

2. Scope
The Internal Audit function covers all departments and activities within the company, including but not limited to:

- Retail store operations
- Inventory and warehouse management
- Procurement and supplier management
- Sales and point-of-sale (POS) transactions
- Finance and accounting
- IT systems and data security
- Customer service operations
- Compliance with company policies and regulatory requirements

---

3. Objectives of Internal Audit

The objectives of the Internal Audit function include:

1. Assess the effectiveness of internal controls.
2. Evaluate risk management processes.
3. Ensure compliance with company policies and procedures.
4. Verify accuracy and reliability of financial information.
5. Detect and prevent fraud or operational irregularities.
6. Improve operational efficiency and cost control.
7. Safeguard company assets including inventory and cash.

---

4. Independence
The Internal Audit Department must operate independently from operational management.

- The **Head of Internal Audit** reports functionally to the **Audit Committee / Board of Directors**.
- Administratively, the Head of Internal Audit may report to the **Chief Executive Officer (CEO)**.
- Internal auditors must not audit activities they are directly responsible for.

---

5. Internal Audit Responsibilities
The Internal Audit Department is responsible for:

- Developing an **annual risk-based audit plan**
- Conducting operational, financial, and compliance audits
- Evaluating internal controls across all departments
- Investigating suspected fraud or irregularities
- Reporting audit findings and recommendations to management
- Monitoring implementation of corrective actions

---

6. Audit Planning
An **Annual Audit Plan** shall be prepared based on risk assessment and approved by the Audit Committee.

Factors considered in risk assessment include:

- High-value inventory
- Cash handling activities
- High transaction volumes
- New store openings
- New IT systems
- Prior audit findings
- Regulatory requirements

---

7. Types of Internal Audits
The Internal Audit Department may perform the following types of audits:

Operational Audit
Review efficiency of store operations, logistics, procurement, and customer service.

Financial Audit
Review financial records, accounting accuracy, and compliance with accounting standards.

Compliance Audit
Ensure adherence to company policies and regulatory requirements.

Inventory Audit
Verify physical stock against system records to detect discrepancies.

IT Audit
Assess IT security, POS systems, ERP systems, and data protection controls.

Fraud Investigation
Investigate suspected fraud, theft, or financial irregularities.

---

8. Audit Procedures
The standard internal audit process includes:

1. Audit planning
2. Risk assessment
3. Fieldwork and data collection
4. Testing of internal controls
5. Identification of findings
6. Preparation of audit report
7. Discussion with management
8. Follow-up on corrective actions

---

9. Reporting
Internal Audit reports must include:

- Audit objective
- Scope of review
- Key findings
- Risk level (High / Medium / Low)
- Recommendations
- Management responses

- Implementation deadlines

Reports shall be submitted to:

- Senior Management
- Audit Committee
- Board of Directors (where applicable)

---

10. Access to Information
Internal auditors shall have **unrestricted access** to:

- Company records
- Financial documents
- Inventory systems
- POS transaction records
- Staff and management

All employees must cooperate with internal audit activities.

---

11. Confidentiality
Internal auditors must maintain strict confidentiality regarding company information, audit findings, and sensitive financial data.

---

12. Follow-Up
Internal Audit will monitor the implementation of corrective actions.

Follow-up reviews will be conducted to ensure:

- Recommendations are implemented
- Risks are mitigated
- Controls are strengthened

---

13. Review of Policy
This policy shall be reviewed **annually** or whenever significant changes occur in the business operations.

---
doc_id: HH-91
title: Disaster Recovery & Business Continuity

doc_type: plan
version: 1.0
last_updated: 2026-02-19

Disaster Recovery and Business Continuity Policy

Objectives
- Maintain essential business operations during disruptions such as natural disasters, IT system failures, supply chain interruptions, or facility outages.
- Protect customer, employee, and company data from loss or compromise.
- Ensure the safety and well-being of employees and customers.
- Minimize financial loss and operational downtime.
- Restore normal operations as quickly and efficiently as possible.

Scope
This policy applies to all business units, retail stores, warehouses, IT systems, and employees of the company. It covers disruptions affecting:

- Retail store operations
- Warehouse and logistics operations
- Information technology systems
- Financial and payment systems
- Customer service operations
- Corporate offices

Key Plans

Data Backup and Recovery
- Critical business data must be backed up regularly (daily or as defined by IT policy).
- Backups should be stored in secure offsite or cloud locations.
- Data recovery procedures must be documented and tested periodically.

IT System Recovery
- Maintain disaster recovery procedures for key systems such as POS, ERP, inventory management, and financial systems.
- Establish recovery time objectives (RTO) and recovery point objectives (RPO).
- Ensure redundancy for critical infrastructure where feasible.

Alternate Communication Channels
- Maintain emergency communication channels for employees and management.
- Use multiple methods such as email, messaging systems, phone trees, or internal communication platforms.
- Ensure management can quickly communicate operational updates during disruptions.

Contingency Staffing
- Identify backup personnel for critical roles.
- Cross-train employees where possible to support key operations during emergencies.
- Develop plans for temporary staffing or redistribution of staff across locations.

Alternative Operational Arrangements
- Establish procedures for operating from alternate locations if primary facilities are unavailable.
- Enable remote work capabilities for applicable roles where possible.

Emergency Response
In the event of a disaster or major disruption:

1. Ensure immediate safety of employees and customers.
2. Notify management and activate the Business Continuity Plan.
3. Assess operational impact and prioritize critical functions.
4. Initiate disaster recovery procedures for affected systems.
5. Communicate updates to employees, stakeholders, and customers as necessary.

Roles and Responsibilities

Management
- Ensure implementation and oversight of the business continuity and disaster recovery plans.
- Allocate resources for risk mitigation and recovery.

IT Department
- Maintain data backups and disaster recovery systems.
- Test system recovery procedures regularly.

Store and Operations Managers
- Implement emergency procedures at retail locations.
- Ensure staff are aware of safety protocols and communication procedures.

Employees
- Follow emergency procedures and cooperate during recovery operations.

Testing and Training
- Conduct regular disaster recovery and business continuity drills.
- Train employees on emergency response procedures.
- Review and test data restoration processes periodically.

Plan Review and Updates
The Disaster Recovery and Business Continuity Plan must be reviewed at least annually or after any major operational change or disruption to ensure effectiveness and relevance.

---
doc_id: HH-92
title: API Reference — Product Catalog Sync
doc_type: reference
version: 1.0
last_updated: 2026-02-20

Overview
The Product Catalog Sync API allows systems to retrieve, create, and update product information within the retail product catalog. This API is typically used to synchronize product data between inventory systems, ERP platforms, and e-commerce platforms.

Base URL
/api/v1/catalog

Endpoints

1. Get Products
Retrieve a list of products from the catalog.

Endpoint

GET /catalog/products

Query Parameters (Optional)

Parameter	Type	Description
category	string	Filter products by category
page	integer	Page number for pagination
limit	integer	Number of results per page

Example Request

GET /catalog/products?page=1&limit=50

Example Response
```json
{
  "products": [
    {
      "product_id": "P1001",
      "name": "Wooden Coffee Table",
      "category": "Furniture",
      "price": 199.99,
      "stock": 45
    }
  ]
}
```

2. Create Product

Add a new product to the catalog.

Endpoint

POST /catalog/products

Request Body

```json
{
  "product_id": "P1002",
  "name": "Modern Floor Lamp",
  "category": "Lighting",
  "price": 89.99,
  "stock": 120,
  "attributes": {
    "color": "black",
    "material": "metal"
  }
}
```

Response

```json
{
  "message": "Product created successfully",
  "product_id": "P1002"
}
```

3. Update Product (Full Update)

Update all details of an existing product.

Endpoint

PUT /catalog/products/{id}

Path Parameter

Parameter	Description
id	Product unique identifier

Example Request

```json
{
  "name": "Modern Floor Lamp",
  "category": "Lighting",
  "price": 79.99,
  "stock": 100,
  "attributes": {
    "color": "black",
    "material": "steel"
  }
}
```

Response

```
{
  "message": "Product updated successfully"
}
```

4. Partial Update Product

Update specific product fields.

Endpoint

PATCH /catalog/products/{id}

Example Request
```
{
  "price": 74.99,
  "stock": 90
}
```

```

**Response**
```
{
  "message": "Product updated successfully"
}
```

**Data Model**

Product Object

|Field  | Type  | Description|
|------|----|----|
|product_id     | string | Unique identifier for the product|
|name   | string        |Product name|
|category|      string| Product category|
|price| decimal |Product selling price|
|stock  |integer|       Available inventory quantity|
|attributes|    object  | Additional product attributes (color, size, material, etc.)|

---

doc_id: HH-93
title: Data Migration — Cloud to On-Prem (Mock)
doc_type: guideline
version: 1.0
last_updated: 2026-02-21
---

# Data Migration — Cloud to On-Prem (Mock)

## Purpose
This document describes an illustrative scenario for migrating data from a cloud-based system to an on-premises environment. The goal is to ensure data integrity, minimal downtime, and a controlled transition during the migration process.

---

## Scope
The migration process covers:

- Application databases
- Product catalog data
- Customer records
- Transaction history
- Supporting metadata and configuration data
```

This mock scenario is intended for documentation, testing, or demonstration purposes.

Migration Steps

1) Inventory and Data Mapping
Identify all data sources and determine how each dataset will map to the on-premises system.

Key activities:
- List all cloud data sources and storage locations.
- Identify database schemas, tables, and data types.
- Map cloud data structures to on-prem database structures.
- Identify dependencies between datasets.
- Document transformation rules if data formats differ.

Deliverables:
- Data inventory list
- Data mapping document
- Transformation specifications

---

2) Data Validation
Ensure the data being migrated is complete, accurate, and consistent before transfer.

Key activities:
- Validate schema compatibility.
- Identify missing or corrupted records.
- Remove duplicate or obsolete data if required.
- Verify referential integrity between tables.
- Perform sample extraction and validation checks.

Validation checks may include:
- Record counts
- Data type validation
- Null value checks
- Constraint validation

---

3) Cutover Plan and Rollback Strategy
Plan the transition from the cloud environment to the on-prem system while minimizing service disruption.

Cutover planning includes:

- Selecting a migration window
- Freezing changes to the cloud database during migration
- Executing final data synchronization
- Switching applications to the on-prem environment

Rollback strategy includes:
- Maintaining cloud system availability during transition
- Backing up both cloud and on-prem datasets
- Defining conditions that trigger rollback
- Procedures to restore the cloud system if migration fails

---

4) Post-Migration Verification
Confirm that the migration was successful and the system is functioning correctly.

Key activities:
- Verify record counts between source and destination systems
- Perform application testing using the migrated data
- Validate business-critical workflows
- Confirm system performance and connectivity
- Monitor logs and system behavior after cutover

Verification methods:
- Automated reconciliation scripts
- Manual sampling checks
- Application integration tests

Success Criteria
The migration is considered successful when:

- All required datasets are transferred.
- Data integrity is preserved.
- Applications function correctly with the migrated data.
- No critical errors or data loss are detected.

Documentation
All migration activities should be documented, including:

- Migration plan
- Data mapping documents
- Validation reports
- Migration logs
- Post-migration verification reports

---
doc_id: HH-94
title: Internationalization – Multilingual Support
doc_type: guideline
version: 1.0
last_updated: 2026-02-22

Purpose
The purpose of this document is to define guidelines and practices for supporting multiple languages across the company’s digital platforms, customer-facing materials, and operational documentation. The goal is to provide a consistent and accessible experience for users across different regions and languages.

Scope
Multilingual support applies to the following areas:

- Product detail sheets and catalogs
- E-commerce platforms and mobile applications
- Customer support communications
- Marketing materials and promotional content
- User documentation and guides
- In-store digital displays and kiosks (if applicable)

Key Objectives
- Provide product and service information in multiple languages.
- Ensure accurate and culturally appropriate translations.
- Improve accessibility for international customers.
- Maintain consistency in terminology across languages.
- Support regional market expansion.

Implementation

Language Selection in Applications
Applications and websites should allow users to select their preferred language.

Implementation guidelines:
- Provide a language selector in the application interface.
- Automatically detect language preferences based on browser or device settings where possible.
- Store user language preferences for future sessions.
- Ensure language selection applies consistently across pages and services.

Translation Management
Content should be translated accurately and reviewed to ensure quality.

Key practices:
- Use professional translators or verified translation services.
- Maintain a centralized translation glossary for consistent terminology.
- Implement translation workflows for new content updates.
- Avoid machine-only translations for critical customer-facing content unless reviewed.

Content Localization
Localization goes beyond translation and includes adapting content to cultural and regional contexts.

Considerations include:
- Currency formats
- Date and time formats
- Units of measurement
- Cultural imagery and messaging
- Regulatory or compliance requirements for different regions

---

System Design Considerations
Systems must be designed to support internationalization effectively.

Technical considerations:
- Use Unicode (UTF-8) encoding for text storage.
- Separate content from application logic to allow easier translation.
- Support dynamic text expansion for languages that require more space.
- Ensure compatibility with right-to-left (RTL) languages where applicable.

Quality Assurance
Multilingual content should be tested before release.

Testing includes:
- Language accuracy checks
- Layout verification for different text lengths
- Functional testing for language switching
- User acceptance testing with native speakers when possible

Maintenance and Updates
Multilingual content should be reviewed and updated regularly to reflect:

- Product updates
- Marketing campaigns
- Regulatory changes
- Customer feedback

Translation updates should follow the same review and approval workflow as original content.

Responsibilities

Product and Content Teams
- Provide source content for translation.
- Maintain product descriptions and documentation.

Localization Team / Translators
- Translate and review multilingual content.
- Maintain translation consistency across platforms.

Engineering / IT Teams
- Implement internationalization features in systems and applications.
- Ensure technical compatibility for multilingual support.

Customer Support Teams
- Provide multilingual customer assistance where required.

Success Metrics
The effectiveness of multilingual support may be measured by:

- Customer engagement in different language markets
- Reduction in support requests related to language barriers
- Customer satisfaction scores from international users
- Accuracy and consistency of translated materials

---
doc_id: HH-95
title: Security & Access Control — Physical Store
doc_type: guideline
version: 1.0
last_updated: 2026-02-23

Purpose
This document outlines the security and access control measures required to protect store assets, employees, customers, and sensitive operational areas within physical retail locations.

Scope
This policy applies to all physical retail locations, including:

- Sales floor
- Inventory storage rooms
- Cash handling areas
- Offices and administrative areas
- Loading docks and receiving areas

Objectives
- Protect company assets including inventory, equipment, and cash.
- Ensure the safety of employees and customers.
- Prevent unauthorized access to restricted areas.
- Support investigation and monitoring through surveillance systems.

Access Control

Controlled Entry Points
- Staff entry points must be clearly designated and monitored.
- Employees must use authorized access credentials (e.g., keycards, access codes, or physical keys).
- Access permissions should be granted based on job responsibilities.

Visitor Management
- Visitors entering restricted areas must sign a visitor log.
- Visitors must be accompanied by authorized staff when entering non-public areas.
- Temporary access badges may be issued where applicable.

Restricted Areas

Inventory Rooms
- Inventory storage areas must remain locked when not actively in use.
- Access should be limited to authorized staff such as inventory managers, supervisors, and store management.
- Inventory movements should be documented in the inventory management system.

Cash Handling Areas
- Cash offices or safes must be secured with restricted access.
- Only authorized employees responsible for cash management may enter these areas.
- Cash counts and transfers must follow established financial control procedures.

Surveillance and Monitoring

Camera Coverage
- Security cameras should monitor public areas including:
  - Sales floor
  - Store entrances and exits
  - Checkout counters
  - Inventory receiving areas

Data Retention
- Video recordings should be stored for a defined retention period in accordance with company policy and local regulations.
- Access to recorded footage should be limited to authorized personnel.

Alarm and Security Systems
- Stores should be equipped with alarm systems to detect unauthorized entry after business hours.
- Alarm systems must be activated when the store is closed.
- Only designated personnel should have alarm system access codes.

Incident Reporting
All security incidents must be reported immediately to store management.

Examples include:
- Unauthorized access attempts
- Theft or suspected theft
- Security system failures
- Suspicious behavior

An incident report should be completed and reviewed by management for further action.

Employee Responsibilities
All employees are responsible for maintaining store security by:

- Following access control procedures
- Reporting security concerns promptly
- Protecting company property
- Ensuring restricted areas remain secured

Policy Review
This security and access control policy should be reviewed periodically to ensure it remains effective and aligned with company operations and security requirements.

---
doc_id: HH-96
title: Offline Mode — App Features
doc_type: guideline
version: 1.0
last_updated: 2026-02-24

Offline Mode — App Features Policy

Purpose
This policy defines the guidelines for supporting offline functionality in the company’s mobile and web applications. The goal is to ensure a seamless user experience for customers and staff even when internet connectivity is limited or unavailable.

Scope
This policy applies to:

- Mobile applications (iOS, Android)
- Web applications with offline capabilities
- Retail staff apps used for inventory, sales, or customer service
- Customer-facing apps for product browsing, cart management, and order tracking

---

Objectives
- Allow essential application features to function offline.
- Maintain data integrity and consistency between offline and online states.
- Minimize operational disruptions for staff and customers.
- Ensure synchronization of data once connectivity is restored.

Offline Functionality

Data Caching
- Critical data, such as product catalogs, customer profiles, and cart items, should be cached locally on the device.
- Cached data must be stored securely to protect sensitive customer and business information.
- Cache expiration policies should be implemented to prevent stale or outdated

information.

Offline Feature Availability
Examples of features available offline include:
- Browsing product catalogs
- Viewing saved orders or wishlists
- Scanning barcodes or QR codes for inventory management
- Creating draft orders or carts for later submission
- Accessing previously loaded content for reference

Data Synchronization

Sync Rules
- Changes made while offline should be queued for automatic synchronization once connectivity is restored.
- Conflict resolution strategies must be defined for data updates occurring simultaneously offline and online.
- Transactions completed offline (e.g., draft orders) must be validated and confirmed during sync.

Error Handling
- Inform users when actions could not be completed due to offline status.
- Provide clear messaging when data synchronization fails.
- Retry mechanisms should be implemented to handle intermittent connectivity issues.

Security Considerations
- Sensitive customer or company data stored locally must be encrypted.
- Local storage must comply with data protection and privacy regulations.
- Authentication credentials must not be stored in plain text.

Testing and Validation
- Offline mode must be tested under simulated network interruptions.
- Verify that cached data is consistent and correct upon reconnection.
- Ensure that offline transactions and updates sync correctly with the central system.

Roles and Responsibilities

Engineering / IT Teams
- Implement offline caching and synchronization features.
- Maintain data integrity and security during offline operations.

- Test offline functionality during development and QA cycles.

Product Teams
- Define which features are essential for offline availability.
- Prioritize features for offline support based on user needs.

Retail Staff / Customers
- Follow app guidelines for offline usage.
- Report synchronization or functionality issues to support teams.

Policy Review
This offline mode policy should be reviewed at least annually or after major app updates to ensure continued effectiveness and alignment with business requirements and technology changes.

title: Payment Security — PCI DSS — Best Practices
doc_type: guideline
version: 1.0
last_updated: 2026-02-25

Purpose
This document provides best practice guidelines for securing payment card data in compliance with the **Payment Card Industry Data Security Standard (PCI DSS)**. It is intended for retail operations, including in-store and online payment processing systems, to minimize risk of data breaches and ensure customer trust.

Scope
This policy applies to:

- All payment card processing systems (POS terminals, online gateways)
- Databases and applications storing or transmitting cardholder data
- Network and communication channels used for payment transactions
- Employees, contractors, and third-party service providers involved in payment processing

---

Objectives
- Protect cardholder data from unauthorized access.
- Comply with PCI DSS requirements.
- Minimize the risk of financial fraud and data breaches.
- Establish processes for monitoring, reporting, and responding to security incidents.

Core Payment Security Practices

1. Tokenization
- Replace sensitive cardholder data with unique, non-sensitive tokens.
- Ensure tokens cannot be reverse-engineered to reveal the original card data.
- Use tokens consistently in internal systems instead of storing actual card numbers.

2. Encryption
- Encrypt cardholder data at rest and in transit using strong encryption standards (e.g., AES-256).
- Implement secure key management practices to protect encryption keys.
- Ensure data is encrypted end-to-end from the point of capture to the processing endpoint.

3. Secure Storage
- Avoid storing sensitive authentication data (e.g., full magnetic stripe, CVV) unless absolutely necessary.
- Use secure, access-controlled storage for permitted cardholder information.
- Regularly review stored data for compliance with retention policies and PCI DSS rules.

4. Network Security
- Use firewalls, intrusion detection systems (IDS), and intrusion prevention systems (IPS) to protect payment networks.
- Segment payment processing systems from general corporate networks where possible.
- Monitor and log access to payment systems continuously.

5. Access Control
- Grant access to cardholder data on a need-to-know basis only.
- Require strong authentication for all employees accessing payment systems.
- Regularly review and update access permissions.

6. Security Reviews and Audits
- Conduct regular internal and external security assessments.
- Perform vulnerability scanning and penetration testing according to PCI DSS requirements.
- Document and track remediation of identified vulnerabilities.

7. Incident Reporting and Response
- Establish a clear procedure for reporting suspected or confirmed data breaches.
- Ensure rapid containment, investigation, and reporting to relevant authorities.
- Maintain an incident log for audit and compliance purposes.

8. Employee Training
- Educate employees on PCI DSS requirements and best practices.

- Train staff to recognize phishing attempts and social engineering risks.
- Reinforce secure handling of payment card data at all times.

Monitoring and Maintenance
- Continuously monitor systems handling cardholder data.
- Update software, firmware, and security tools regularly.
- Review policies and procedures at least annually or after major changes in payment systems.

Compliance
Adherence to this policy ensures alignment with PCI DSS requirements, reduces the risk of payment data breaches, and protects customer trust and company reputation.

title: Returns — Repacking & Reuse Guidelines
doc_type: guideline
version: 1.0
last_updated: 2026-02-26

Purpose
This policy outlines the procedures for handling returned items in a home retail environment, ensuring that products are safely repackaged, inspected, and made available for resale or reuse while maintaining quality and customer satisfaction.

Scope
This policy applies to:

- Returned products from customers
- Items returned from stores or warehouses
- All product categories, including furniture, home décor, appliances, and accessories
- Staff involved in returns processing, quality inspection, and repackaging

---

Objectives
- Ensure returned items are repackaged safely and securely for resale or redistribution.
- Maintain product quality and brand reputation.
- Optimize reuse and minimize waste.
- Document returns and repacking procedures for traceability.

Repacking Guidelines

1. Item Inspection
- Inspect all returned items for damage, missing parts, and overall condition.
- Classify items based on condition:
  - **Grade A:** Like new, fully functional, resalable without repair.
  - **Grade B:** Minor wear or cosmetic defects, functional, suitable for resale with minor adjustments.
  - **Grade C:** Damaged, incomplete, or non-functional; not suitable for resale.

2. Repackaging Process
- Use original packaging whenever possible.
- Include all original accessories, manuals, warranty cards, and documentation.
- Replace damaged packaging materials with equivalent protective packaging if necessary.
- Ensure items are securely packed to prevent damage during storage or transport.

3. Labeling
- Clearly label repackaged items with:
  - Condition grade (A/B/C)
  - Date of repackaging
  - SKU or product code
  - Any notable defects (for Grade B items)
- Maintain records of repackaged items for inventory and audit purposes.

4. Storage and Handling
- Store repackaged items in designated areas based on grade:
  - Grade A items ready for immediate resale
  - Grade B items may require discounting or special handling
  - Grade C items should be directed to repair, recycling, or disposal
- Handle items with care to prevent additional damage during movement and storage.

Reuse and Redistribution
- Evaluate opportunities to reuse returned items internally or donate to charitable organizations if resale is not possible.
- Repair or refurbish items when feasible to maximize product lifecycle.
- Document all reuse, repair, or donation activities for compliance and traceability.

Responsibilities
- **Returns Team:** Inspect, classify, and repack returned items.
- **Inventory/Warehouse Team:** Store repackaged items according to guidelines and maintain accurate inventory records.
- **Store/Operations Managers:** Ensure staff follow repacking and reuse procedures

consistently.

Policy Review
This policy should be reviewed at least annually or whenever significant changes occur in return processes, packaging materials, or product types.

title: Marketing Material — Content Creation Guidelines
doc_type: guideline
version: 1.0
last_updated: 2026-02-27

Marketing Material — Content Creation Guidelines

Purpose
This policy establishes standards for creating marketing content that aligns with the company’s brand identity, ensures legal compliance, and delivers a consistent message to customers across all channels.

Scope
This policy applies to:

- Digital marketing content (social media, email campaigns, website banners)
- Print marketing materials (flyers, catalogs, posters)
- In-store promotional displays
- Product advertisements and promotional videos
- Content created by internal teams or external agencies on behalf of the company

---

Objectives
- Maintain consistent brand identity across all marketing materials.
- Ensure all content complies with legal, regulatory, and privacy requirements.
- Promote clear, accurate, and responsible messaging to customers.
- Protect the company’s reputation and intellectual property.

Brand Consistency

Approved Imagery and Copy
- Use only images, graphics, and copy approved by the Marketing or Brand team.
- Adhere to the company’s brand guidelines, including colors, fonts, logos, and tone of voice.

- Avoid using unlicensed or third-party content without proper permissions.
- Ensure visual and textual elements reflect the company’s brand values.

Legal Disclosures and Compliance
- Include necessary legal disclaimers, terms, and conditions where applicable.
- Follow data privacy rules (e.g., GDPR, CCPA) when using customer data in marketing campaigns.
- Ensure claims in marketing materials are accurate and substantiated.
- Avoid misleading statements, exaggerations, or unverified comparisons.

Content Creation Process
1. **Drafting:** Content creators produce initial drafts following brand and legal guidelines.
2. **Review:** Marketing and Legal teams review content for accuracy, compliance, and brand adherence.
3. **Approval:** Only content that has received formal approval may be published or distributed.
4. **Publishing:** Distribute content across approved channels in accordance with the marketing plan.
5. **Monitoring:** Track performance and feedback to ensure messaging aligns with brand objectives.

Roles and Responsibilities

Marketing Team
- Maintain brand guidelines and approved content libraries.
- Review and approve content for consistency and quality.
- Ensure all marketing campaigns comply with legal and regulatory requirements.

Legal/Compliance Team
- Review marketing materials for compliance with laws, regulations, and data protection standards.
- Advise marketing teams on disclaimers, disclosures, and risk mitigation.

Content Creators / Agencies
- Follow brand and legal guidelines when producing content.
- Submit materials for review and approval before publishing.

Policy Review
This policy should be reviewed at least annually or after significant updates to brand guidelines, legal regulations, or marketing channels.
